Note.—The times of sunrise and sunset in the above calendar are only true for Greenwich (or London) time, and for places about the same lat. (51½ degs). At other places in the United Kingdom, there is a difference of 1 to 60 min., according to the latitude and time of year. For the Moon the difference is much greater. At places abroad, local Almanacs must be consulted.

FRANCE.

(WITH A MAP IN SPECIAL EDITION.)

France—extends from the foot of the Eastern Pyrenees, lat. 42° 25′, in almost a perpendicular line to Dunkirk, in department Du Nord, 51° 5′ N.; and from long. 7° E. to 4° 55′ W. The circumference is 4,000 kilomètres. The surface is now reduced to 529,600 square kilomètres, against 562,000 before the German war; or 129 million acres; of which two-thirds are cultivated, and one-half is arable. About 6 million acres are vineyards, and about as many are orchards and gardens. France could boast of an unbroken dynasty down to the close of the eighteenth century; at which period the social grievances endured by the people produced that sanguinary convulsion called the "French Revolution;" the effects of which are felt to this day. See the articles, Metz, Paris, Sedan, Strasbourg, &c., below, for the leading events of the Franco-German war of 1870-1, which ended with the transfer to Germany, of Alsace and E. Lorraine, and the payment of an indemnity of 200 millions sterling. Upon Napoleon III.'s defeat at Sedan, the Third Republic was proclaimed 4th September, 1870. M Thiers was elected President 1871; succeeded by Marshal MacMahon, 1873; and by M. Jules Grévy, 30th January, 1879, for seven years. The National Assembly, elected 1877, consists of about 740 members; the senate of 300 members.

Population—(Census of 1876)—36,905,788; exclusive of 1½ million now transferred to Germany, and 3 millions in Algeria. Of these, 98 per cent. are Catholic, and French-born. One third lives in towns. The following towns have more than 100,000 pop. (1876); viz:—Paris, 1,988,806; Lyons, 342,815; Marseilles, 318,879; Bordeaux, 215,140; Lille, 162,775; Toulouse, 131,646; Nantes, 122,250; Rouen, 104,906; St. Etienne, 126,020.

Departments—Eighty-six, of which Corsica is one; besides three in Algeria. This number includes Alpes Maritimes (round Nice), Savoie, and Haute Savoie, all ceded by Italy, 1860; Meurthe-et-Moselle, a union of the remnants of two, now annexed to Germany, 1871; and Haut Rhin, a remnant of another one annexed to Germany. The Departments ceded to Germany, 1871, on the Rhine frontier, in the old provinces of Alsace and Lorraine, are the whole of Bas Rhin (Strassburg, &c.); the greater part of Haut Rhin (Colmar, Mulhouse, &c.); a small part of Vosges; part of Meurthe (Château-Salins, Sarrebourg); and great part of Moselle (Metz, &c.), making a total area of 5,800 square miles, with a population of 1,600,000, (census of 1866) now lost to France. About 3-10ths of these are German-speaking (mostly in Alsace), and 1-6th is Protestant.

Expenditure—119½ millions sterling, in 1879; against a Revenue of 108 millions. In 1874 it was 110 millions, representing an annual increase of 5 millions from 1831. Of this heavy increase, 23 millions were occasioned by the War Indemnity payable to Germany, under treaty. Total **Debt** (1879), about 940 millions (against 750 millions in 1873); on which there is payable about a Milliard or 40 millions sterling, for annual interest or rentes.

Army—(1878), 503,000 (with a reserve of 430,000), in 18 divisions, and 36 sub-divisions, exclusive of Algeria. With the armée territoriale (560,000 men,) troops in depôt, customs officers, &c., the total land forces of France are 1,750,000 men.—**Navy**—(1879), 256 effective vessels, of which 2-3rds are steamers, and 66 are iron-clads. Stations at Cherbourg, Brest, Lorient, Rochefort, and Toulon.

Colonies—In Asia—Pondicherry (India); and Cochin China. In Africa—Sénégal, Madagascar, Réunion, and Comoro Islands. In America—Martinique, Guadeloupe, St. Pierre, Miquelon, and Guiana. In the Pacific—Marquesas, Tahiti, New Caledonia, etc. Total pop. about 3½ millions. Their trade is almost exclusively with the mother country.

Produce and Manufactures.—The *Silk* manufactures of France began in the time of Francis I.; and in 1866 above 5,200,000 lbs. of raw silk were imported, against 136,800 in 1792. These large importations furnish the raw material for by far the largest silk manufacture in the world. In the reign of Louis XIV., under Colbert, new markets were thrown open for foreign commerce; to-day France stands second only to England in the amount of her productions and the value of her exports. One half of the population is engaged in agriculture. Land is much divided. The 90 millions of acres under cultivation are divided among 5½ millions of proprietors; most of whom own less than 6 acres. The forests cover one fifth of the whole surface. Of wheat she produces about 25 million quarters annually. Much iron is found; and 17 millions of tons of coal are raised. The cotton manufacture employs half a million persons. Linen and woollen goods are made.

Her *Vineyards* employ 2 million persons, and produce about one hundred million gallons, of which one third is exported. Principal **Wines** are Claret, in about 50 vineyards in the Médoc, near Bordeaux; the white wines of Sauterne, Graves, and Barsac; red and white Burgundy, from Beaune, Volnay, Chablis, etc.; Champagne, from Reims, Epernay, Sillery, etc.; Hermitage and Côte Rotie, from Tain; the sparkling St. Peray, etc. The colony of Martinique produces Moyeau, Vanilla, and other liqueurs. France possesses one privileged bank, the Bank of France, which is under the direction of a governer, nominated by the Government, at a salary of £4,000.

Commerce.—Commerce with England, measured by the value of the exports and imports is 69 millions sterling (1878); which is 1-14th of the total with all countries, and is equal to the total of the three next in importance, viz: Belgium, Italy, and the Zollverein (N. Germany). Chief Exports to England:—Butter, wheat, eggs, fruit, gloves silk, lace, spirits, wine, jewellery, and sugar; the last being protected by so high a bonus, as to threaten to drive the English trade out of the market. Total Imports and Exports (1876), 158 and 143 millions sterling, respectively.

Churches.—The most striking Cathedrals are at Reims, Amiens, Paris, Rouen, Chartres, Bourges, Coutances, St. Quentin, Laon, Caen, Auxerre, and Tours. There are about fifty other Cathedrals, besides several hundred Churches famous for beauty of style and elegance of proportion. The Church Establishment is under 18 archbishops and 67 bishops, in France and Algeria. NOTE.—Churches are with few exceptions open all day. In the South of France during summer they are sometimes closed from 12 to 3. Fee for visitors, 1fr., enough for a party.

French Hotels.—The Hotels in France (those of Paris and several large towns excepted scarcely merit a designation beyond that of Auberge, or Inn. They are often wanting in cleanliness, and the service is badly conducted. On the other hand, the beds are good and clean, the cooking is excellent, and the prices are moderate. In the chief towns of the Departments the traveller is badly lodged, and well fed, at 6fr. 50c to 7fr. per day, besides 1fr. for "Service" (or waiter), the usual charge everywhere. In the smaller towns the daily expenses will average 5fr. 50c. to 6fr., for which you have an ample *déjêuner à la fourchette*, dinner at table d'hôte, and bedroom. Throughout the centre and south of France, as well as in many other localities, the *vin ordinaire* and candles are rarely charged for. NOTE.—Breakfast (*déjeûner à la fourchette*,) and Dinner are the two principal meals. The Dinner hour throughout France is 5 o'clock (sometimes from half an hour to two hours later). The Breakfast hour or 1st Table d'Hôte is at 10 or 11; before which hour Frenchmen usually content themselves with an early cup of coffee. When ordering a private dinner in a small hotel, country town, or wayside inn, ask for a dinner at 3 francs a-head, including wine (unless in the North of France, where wine is one half franc extra). When stopping at an hotel, lock your room when you go out, and leave the key on the key-board, or with the *concièrge*, by which the landlord becomes responsible, but only then. See that your bill is on a stamped receipt (for which you pay—not the landlord), otherwise you are liable to a fine. Innkeepers often advertise that English is spoken; when it is the reverse. You are told you may dine "à la Carte;" which Carte when produced has no prices marked.

Furnished Apartments.—Have a written agreement, together with an inventory of everything, however trifling, also a stipulation that the owner pays the furniture tax. Rent is payable in advance, quarterly.—**Servants** are engaged by the month, but they may be discharged, or they may leave at any time, if paid up to the day. See Introduction, page xlvii.

Money.—Accounts are kept in francs and centimes: 1 franc = 100 centimes = 9½d. English. The *gold* coins are 100fr., 50fr. 20fr., 10fr., and 5 fr. Silver coins are 5fr. 2fr., 1fr., 50 centimes, and 20c. Bronze coins are 10c., 5c., 2c. and 1c. Silver and small coins are often scarce; and Travellers should provide accordingly. The 20 franc pieces are called Napoleons. Prior to 1795 the denominations of money were livres, sous, and deniers (1 livre = 20 sous; 1 sou = 12 deniers). The word *livre* is sometimes used as synonymous with *franc*; and *livre sterling* is £1 English; *sou* is continually said in Paris for 5 centimes, 2 sous for 10 centimes, and so on. When the word *écu* (crown) is used, it means 3 francs. Travellers to Bordeaux, Bayonne, Pau, the Pyrenees &c., should change their English money into French gold at Calais, Dieppe, Havre, or Boulogne; otherwise they will have to submit to a loss of 3.5 to 50c. in the £1 at the railway stations, hotels, &c., no matter in what part of France; and the same applies to Spain or Italy. It is better to have Napoleons than English gold. N.B.—Take care at the railway stations, that your Sovereigns (worth 25½fr.) are not reckoned as Napoleons (worth only 20fr). The Bank of France issues Notes for 1000 fr., 500 fr., 200 fr., 100 fr., and 50 fr.—See *The Merchants' Handbook of Money, Weights, and Measures, by* W. A. BROWNE, LL.D. (Stanford); and Introduction, p. lii.

Railways (*le Chemin de Fer*).—France is now well supplied with Railway communication, the

Digitized by Google

lines having been laid out on a most rational and comprehensive system. About 14,780 miles are open (1878); mostly all of which is held by six great companies—1st, Northern; 2nd, Western; 3rd Orleans; 4th, Eastern; 5th, Lyons and Mediterranean; 6th, the South. They are conceded for a term; after which the State may take them up. About 400 to 500 miles are opened yearly. The 3rd class are far inferior to our own, and the fare higher; the 1st class fare is on the other hand hardly higher than the average 2nd class fare in England. All trains except the express are 3rd class; and return tickets are also issued to third class travellers. The fares per English mile since the heavy war tax of Oct. 15 (1871), are 1st class, 1·87d.; 2nd class, 1·4d.; and 3rd class, 1·09d. The best express trains only carry 1st class passengers. Return Tickets are called. *Billets pour aller et retour*. Children (*enfants*) between 3 and 7, half price: with 20 kilos. (44 lbs.) of Luggage. See Introduction, pp. xliii—xliv.

Luggage (*le Bagage*).—30 kilos. or 66 lbs. allowed to all classes. Excess fare, one fourth of 3rd class fare. Get a *receipt* for luggage, whether excess or not. See Introduction, page xliii

N.B.—Remember that neither horses nor carriages are taken by the 1st Class or Express Trains.

Railway Stations (*la Gare*).—There is a bad practice of keeping passengers outside the waiting-rooms, exposed to the weather; also, of cooping up passengers who have their tickets, in close waiting-rooms (*salles d'attente*). No one is allowed to enter the waiting-room without a ticket, which is rarely issued till within 15, and in some instances only 5 minutes before the departure of the train. Ladies are not allowed to take a kitten or a puppy inside without paying its *fare*, nor sometimes if they offer to pay it. Moreover the time tables and detention on cross lines are trying; and all Trains having second class carriages are virtually slow trains (*des trains omnibus*).

Again, the privileges appertaining to ladies' waiting-rooms in England are unfortunately overlooked in France, and most parts of the continent; and the retiring-places at each station are generally placed at the extreme end of the platform, in the most exposed situations; a female stands at the door to wait on ladies: some stations are furnished with private cabinets for which there is a charge of 10 centimes. The **Buffets** (refreshment rooms) are generally well supplied with excellent refreshments: on most lines, the proprietors are obliged to show a tariff of the prices of every article in the refreshment room; nevertheless, the traveller, in the bustle of the moment, should be on his guard and ask the price of fruit in particular before he helps himself. In many instances he will find it rather exorbitant.

Circular Tickets, at about 25 per cent off, for one to two months, may be obtained on the Du Nord line in connection with the Belgian system; on the Lyons line, for Switzerland; at Bordeaux, for the Pyrenees, via Pau and Toulouse; at Perpignan and Irun, for Spain; and so on.

Diligences or Coaches.—Fares about 8 centimes per kilomètre, or 1½d. a mile. Half-price for children from 3 to 10 years. See Introduction pp. xliii—xliv.

ROUTES TO PARIS.—1. Calais Route.—London to Paris Direct, *via* Dover and Calais or Folkestone and Boulogne:—By South Eastern Railway from Cannon Street, and Charing Cross, and Victoria, or Ludgate Hill Stations, for Dover or Folkestone. (See page 685). Or by London and Chatham Railway, from Victoria Station (See page 688). The railway station at Calais is close to the quay where the steam-packets land their passengers, and every facility is given them for proceeding onwards by first train. The Passport-office is at the Station and there is a good refreshment room also. The steam-boats can enter and leave Calais except for about 1½ hour before and after low water. The mail-boats leave Dover at 9.25 a.m. and 10.20 p.m. There are also two departures from Calais for Dover daily. *French and English Money exchanged on board the Boats.* Luggage labelled through from Paris to Charing Cross is not examined *en route*. Call out the name of your Hotel on landing, and its Porter will step forward and take charge of you. This will save you from the touter. **2. Boulogne Route.**—London to Paris direct in about 9½ hours, by the South Eastern Railway and their Packets from Folkestone (See page 685). **3. London to Paris,** direct by London and Brighton Railway and Steamers from Newhaven to Dieppe, and from thence to Paris by Railway. **4. London and Calais.**—By Steam direct from Irongate and St. Katherine's Wharf, near the Tower, occasionally by General Steam Navigation Co.'s Packets; in about 8 hours—See Alphabetical list. **5. London and Boulogne.**—By Steam direct from Irongate and St. Katherine's Wharf, by the General Steam Navigation Co.'s Packets. Voyages performed in about 8 hours.—Fare 12s. and 8s. 6d. See Alphabetical List. **6. By South Western Railway** (*via* Southampton and Havre).—This route is very interesting. The average time crossing the Channel is about six and a-half hours, and about two hours additional in the river. (For hours of departure from Southampton and Havre, see Advt. p. 694.) By an arrangement entered into between the London and South Western, and Western of France Railway Companies, passengers may pay their passage-money throughout to Paris at the Waterloo Station.—First class, 33s.; Second class Railway and 2nd class Cabin, 24s. There is a steam-boat connection with Honfleur and Caen. **7. London and Dunkirk.**—By General Screw Steam Shipping Co.'s Steamers from Fenning's Wharf, London Bridge, about twice a week (See Alph. List). Fares 10s. and 7s.

It is a picturesque place divided into Upper and Lower towns, joined by a steep street called Grande Rue. Some say Godfrey de *Boullon*, the crusader, was born here.

The *Beffroy*, behind the Hotel de Ville, an ancient tower, 140 feet high, should be ascended, for a fine view of the town and beautiful environs. The modern *Cathedral* of Notre Dame, completed 1866, by Abbé Haffreingue, has two towers, with a dome and cupola; paintings, statues, a rich shrine and Lady chapel, and a splendid altar.

On the neighbouring heights are several Forts; a Column, 166 feet high, finished 1841, to commemorate the intended invasion of England, 1801-4, by Napoleon I., whose bronze statue by Bosio, is on the top; and traces of a Roman work, called Tour d'Odre.

Lat. of Fort St. John light 43° 18′ N., long 5° 22′ E. Mean temp. 43° (Jan.) to 67° (July).

The city was founded as *Massilia*, about 600 B.C., by a colony of Phocæans; and is composed of an old and a new town—the old town on the site of the Greek city on rising ground north of the harbour, with narrow ill-ventilated streets; the new town, with handsome houses and regular streets, south and east of the port, and separated from the old town by a street 3 m. long; which extends from Porte d'Aix and the triumphal Arch, past the Cours, the statue of good Bishop Belzunce, the fine *Prado*, to the Château des Fleurs. At right angles to this street is Rue Cannebière, the favourite promenade. Wide thoroughfares are opening in all directions, parallel to, and of the same breadth as the Cannebière. A new street, *Rue de la République*, intersects the oldest parts of the city. The splendid ranges of warehouses near the Bassin du Lazaret, were built of iron and stone, at a cost of a million sterling. In front are the Basins and Docks of the new port, protected by a great Breakwater, 1½ m. long. Some pictures may be seen at the Quarantine office (Consigne).

OBJECTS OF NOTICE.—The Exchange or Bourse, built 1860, a large and handsome edifice. The new Cathedral, a magnificent Byzantine structure, in progress. Notre Dame de la Garde, with its image of the Virgin at a fine point of view. Hotel de Ville, with sculptures by Puget. Palais de Justice. Notice, also, the Public Library; the Grand Théâtre and Théâtre du Gymnase; the Square and Fountain of the Obelisk; fountain in Plaine St. Michel; forts of St. Jean and St. Nicholas; also the remarkable *Château d' If*, at the entrance of the Port—boats there, 2 to 3 francs the hour. There are about 50 soap factories; 30 oil mills; candle factories; and steam-engine works (7000 men); besides lead works, and numerous sugar refineries. Fez caps are made here. The neighbouring hills are covered with villas. "Chemin de la Corniche," between the town and sea, is a fine drive.

It is celebrated for the disastrous *Battle* of Thursday, 1st Sept., 1870, followed by a capitulation, signed 2nd Sept., at 11 a.m., which delivered up to the German forces, under King William of Prussia, the French army, led by Napoleon III. and Marshal MacMahon, numbering 86,000 men and officers (besides 14,000 wounded), with 550 guns, and 10,000 horses. The Emperor surrendered himself to the King at 2 p.m.; and was sent to Wilhelmshöhe the next day. Their interview took place at M. Amour's *Château de Bellevue*, at Frenois, 3 m. W., overlooking the battle-field—a house marked by two spires, and visited by the Prince of Wales and the King of Saxony, in 1871. Napoleon had a previous meeting at 8 a.m. with Bismarck at a weaver's cottage, called *Maison de Tisserand*, at Donchéry; near a hill from which the Crown Prince watched the great battle. The King's head-quarters were on Chevenge Hill, opposite Donchéry, near a village boundary stone. *Floing*, 1½ m. N.E. of Sedan, near the peninsula of Iges, was Marshal MacMahon's head-quarters. *Bazeilles*, 1½ mile S.E., was occupied by the Bavarian corps, and was burnt (before the capitulation), with its 600 houses and 2000 inhabitants. Francheval, 5 m. E., was occupied by the Saxons.

Other noticeable points, mostly to the E. and S.E., along the rail, or the Meuse, are Rémilly, 4 m.; Douzy, 4 m., on the R. Chières; Carignan, 10 m.; Beaumont, 11 m., in the Argonne Hills, where De Failly was defeated; Stonne, & Mouzon

Toulon, 564 miles from Paris, and 30 from Marseilles, is an important naval station in dept. Var, in a beautiful bay of the Mediterranean. It is built at the foot of a ridge of hills, called Pharon or Faron, which shelter it from the north; and is surrounded with ramparts, ditches, and bastions, and defended by a fine Citadel, built by Vauban 1680, and 11 or 12 forts and batteries. One of them, La Malgue (where Abd-el-Kader was kept prisoner), has a particularly good view. In 1793, when held by Admi. Hood, Toulon was taken by the Republicans, young Bonaparte commanding the artillery.

The town is divided into two parts,—Old and New. Pierre. Public Buildings are the Townhall, by Puget; the Hotel de l'Intendance; St. Stephen's Cathedral, which has a good interior; the Civil and Naval Hospitals; a handsome Theatre; and a Jardin des Plantes, where palms grow out of doors. It is now turned into a Historical Museum, or collection of paintings, representing the wars of France, from the earliest period to the present time. It was the head-quarters of the King of Prussia, 5th Feb., 1871; who was here proclaimed Gorman Emperor, 18th February, 1871. The National Assembly removed from Bordeaux to the Theatre here, after the insurrection of the Commune at Paris, March 18, 1870; and here the two Chambers continued to meet till 1880.

The *Palace* is filled with statuary. It takes 4 hours to wander through the apartments and gardens. The principal masters who have contributed to its adornment are Horace Vernet, Paul Delaroche, and Johannot. Here are the Cabinet of Natural history, the Opera Saloon the Chapel, the gardens and statues, fountains, and cascades, planned by Louis XIV., and the two Trianons. Good fishing in the Allier. Season from 15th of May, to 1st of October.

Vichy is divided into the old and the new towns, Vichy la Ville and Vichy les Bains. The old town is picturesque, with its broken walls and its ancient tower; and it is evident from the Roman road, "the Jews' town," and other remains of olden times, that Vichy la Ville was once much more populous than it is now, and possibly ranked one of the foremost of the *aquæ calidæ* of the Romans. A large number of English and Americans resort here in the season, and many remarkable cures of gout and rheumatism are reported.

BELGIUM.

For a more detailed description of Belgium and the Rhine, see BRADSHAW'S ILLUSTRATED HANDBOOK OF BELGIUM AND THE RHINE, with Plans of the Towns, and Panorama Map of the Rhine, the Sambre, Meuse, &c.—*Price Five Shillings.*

BELGIUM, a small kingdom situated between 49°27' and 51°31' north latitude, and 2°37' and 6°0 east longitude. Its greatest length from N.W. to S.E. is about 175 English miles, and its greatest breadth from N.E. to S.W. about 127 English miles. Its superficial area is about 7,279,448 English acres, or 11,375 square miles. In this it exceeds the kingdom of Saxony, which is only 5,780 sq. miles; and of Würtemberg which is 7,530 sq. miles. The general aspect of Belgium is level, indeed it contains no ridge that could be properly called a mountain. The southern portion, however, is picturesque and romantic, like a little Switzerland, but towards the north it sinks into a flat plain. The country in the northern provinces, along the rivers and estuaries is, like that of Holland, protected from inundation by dykes; and along the open sea by sand hills or downs, which vary in breadth from one to three miles, rise to a height of fifty or sixty feet, and are in most cases thickly covered with pine trees. The coast is filled with sand banks, which render the navigation very intricate.

In climate the Belgian provinces differ much: for whilst in Luxembourg the climate is temperate, in Liège it is somewhat hazy. In Namur the air is sharp and agreeable, and in Hainault the climate is mild and temperate. East and West Flanders enjoy a moist climate. The summer here is not too warm, and the winter not very cold. In fact Belgium deserves, in every respect, the flattering denomination of "JARDIN DE L'EUROPE," which it first received from its late King, Leopold I, and it has often been said and repeated, by the most eminent travellers, that no tour on the Continent can be considered complete, without a visit to this admired country, and a sojourn of a few days in Brussels, its beautiful capital.

Commerce, Trade—Productive industry has long characterised the Belgians, the principal productions of which are Brussels, Mechlin, Bruges, Ghent, and St. Trond lace, the cloths of Flanders, Brabant, and Hainault, the printed cottons of Ghent, Brussels, and other places, the bleaching establishments of Courtrai, which rival those of Haarlem, the carpets of Tournai, the papers of Liége, with its military arms and cutlery. The industry of the Flemings has within two hundred years converted a tract of land, once a sandy and barren heath, into a beautiful garden; and the produce of its wheat is often not less than sixteen to one, and oats ten to one; whilst scarcely in any part of Britain does wheat give more than eight to ten for one. East and West Flanders alone produce annually flax to the amount of £1,600,000. The coal mines of Hainault produce more than those of the whole of France; and the annual quantity raised in Belgium is 2,000,000 chaldrons. More than 150,000 tons of iron are annually founded. The cotton manufactures have improved steadily since 1830 and now represent a capital of £3,000,000 sterling. Principal exports are corn, bran, coal, oil, lace, woollen and cotton cloths, linen, canvas, arms, cutlery, and ironmongery. The Exports and Imports to and from England, (1877) were 12½ millions and 11½ millions respectively. Antwerp, the principal port, is a growing rival to Havre.

Population—(1878)—5,477,000, of two distinct stocks—the *Germanic* & the *Celtic*. To the former belong the proper Belgians or Netherlanders, who formerly spoke only the Flemish tongue, and a small number of German-Dutch—mostly in Limburg and Luxembourg. To the latter, the Walloons, who inhabit the southern portion of the country who spoke the French-Flemish or the Walloon—two dialects of the French language, which has now become the language of the country.

Government.—The Administrative divisions of Belgium consist of nine Provinces, subdivided into arrondissements, communes, and cantons. The States composing Belgium belonged to Austria, till 1795, when France annexed them to Holland. Upon the revolution of 1830, and the separation from Holland, Prince Leopold of Saxe-Coburg, uncle to Queen Victoria, became Leopold I, King of the Belgians in June 1831. He was succeeded in 1865 by his son Leopold II, the reigning king; who was born 1835, and has three daughters. A son died 1869; and the king's brother, the Count of Flanders, is the present heir apparent.

Revenue (1879).—£10¼ millions, nearly balanced by the Expenditure. **Debt** 52 millions.

Army—Peace establishment, 46,400 men, with 204 guns. Belgium has no Navy. Her mercantile marine numbers 48 vessels (45,000 tonnage), and 260 fishing boats.

Railways.—About 2,320 miles open (1878), mostly belonging to the State. The railway system was adopted 1834, and at present there is no town of any importance without railway communication. No free allowance of luggage. Children from 3 to 8, half-price. Return Tickets at a fare and a half are issued for a great many places, at all Stations to all classes; Express fare is 25 per cent. higher than the ordinary fare.

Electric Telegraph.—About 3250 miles now open (1878), in connexion with the Submarine Telegraph. Tariff, 50c. (5d.) for 10 words, and an additional fare of 10 centimes for each series of 5 words above the first ten, to any station in Belgium; to U. Kingdom 2d. a word. From any Station in Belgium to England: 80 centimes for a message of 5 words, and an additional fare of 15 centimes for each word above the first five.

Money.—100 centimes = 1 franc = 9½d. (exactly 9 2-5th d.) GOLD COINS.—Pieces of 20, 10, and 5 francs, worth respectively 16s.; 8s.; 4s. SILVER COINS.—Pieces of 5, 2, 1 franc and 50 centimes, worth respectively 4s.; 1s. 7d.; 9½d.; 4½d. BRONZE COINS.—Pieces of 1 and 2 centimes. NICKEL COINS.—Pieces of 20, 10, and 5 centimes. English Sovereigns are convertible into francs throughout Belgium, at the rate of exchange of the day. The Sovereign or Pound Sterling, is always worth its par value of 25 francs, and sometimes from 10 to 20 centimes more.—From *The Money, Weights, and Measures of all Nations*, by W. A. BROWNE, LL.D. London: Stanford.

Postage.—10c. and 5c. per Inland letter, under ½ oz; and 25c. to England, etc., in the Postal Union. Cards 10c. (foreign) and 5c.; Newspapers 5c. Money Orders, see p. xlvii.

Hotels.—The hotels are remarkable for cleanliness, the service is well attended to, and the charges no higher than in any other Capital on the Continent. Belgium not being a wine country, the wines are not so cheap as in France, and at the table d'hôte are paid for extra. A travelling Bath is a useful thing to bring with you, as in many places baths are very small or hardly known.

Churches.—Some of the best are found in small towns seldom visited. The following are given in their order of merit:—Tournai, Brussels (St. Gudule), Antwerp, Mons, Ypres, Malines, Liége (St. Paul), Lierre, Louvain (St. Pierre), Ghent (St. Bevon), Bruges, Hal, Herenthal, Alost, Tongres, Diest, Furnes, Dixmude, &c. NOTE.—Churches are nearly always closed from 12 to 3.

Town-Halls.—The most remarkable are:—Brussels, Louvain, Ypres, Ghent, Bruges, Oudenarde, Antwerp, Courtrai, and Mons.

Routes from London to Belgium, 1.—By South Eastern Railway from Cannon Street and Charing Cross Stations to Dover, at 7.40 morn. and 8.25 night. By London, Chatham, and Dover Railway from Victoria and Ludgate Hill Stations at 7.35 morn. and 8.15 night. Steamers leave Dover for **Calais** and trains leave **Calais** for **Brussels**, *viâ* **Lille**, and thence by the newly opened short line to **Tournai, Hal,** &c. **Brussels** at 6.5 morning and 4.55 evening at the South Station.—See page 82.

For particulars—see page inside the cover. **4.**—By Steam to **Ostend** every Sunday, and Wednesday, direct from St. Katherine's Wharf. See Alphabetical list. The "Swallow" and "Swift" are good new ships, and perform the passage in ten hours.

5.—By Steam to **Antwerp**, direct from Irongate and St. Katherine's Wharf, every Tuesday, Thursday, and Saturday. See list of Steamers. The General Steam Navigation Co's. steamers are superior first-class ships. The Belgian Company's ship "Baron Osy," is also a very fine vessel. They perform the passage in about 17 hours, and reach Antwerp on the day after leaving London, in ample time to enable the passengers to proceed, if they wish, by the first or second train to Brussels. But few persons do this, as the "glorious works of art" in Antwerp are objects of too much interest to be passed unvisited. Railway to Brussels, page 85. **6.**—By the Screw Steam Shipping Co's Steamers from off Irongate Wharf to **Dunkirk**, thence by Rail to any part of Belgium.

8.—Grimsby to Antwerp, by the Manchester, Sheffield, and Lincolnshire Railway Company's first-class Steamers, every Wednesday and Saturday. Average passage, 20 hours. DESCRIPTIONS OF TOWNS, &c.

Alost, or Aalst.—*Stat.*—Pop. (1877) 21.110,
HOTELS: DE FLANDRE; DES TROIS ROIS.

On the river Dendre, 18 m. from Brussels; the chief town of the district of East Flanders, and said to owe its origin to a fortress built by the Goths in 411. It was formerly the capital of Imperial Flanders, and was burnt by a conflagration in 1360: in 1667 the celebrated Marshal Turenne took and dismantled it. The *Town Hall*, a fine Gothic edifice, built in 1210, was unfortunately burnt 1879. The collegiate church of St. Martin was built by the same architect as the cathedral of Amiens, and contains a fine picture by Rubens, representing the "Plague of Alost." Linen, soap, and thread-lace, are the chief manufactures. Great Hop Market. Railway, see pages 80, 84.

The Steam-Packet direct from London to Antwerp reaches the mouth of the Scheldt a few hours before or after midnight. Baggage is examined after passing Fort Lillo.

Capital of a province, and the first commercial town of Belgium, on the Scheldt, 60 m. from the sea, 77¼ from Brussels, 32 from Ghent, 150½ from Cologne, and 258¾ from Paris. It has magnificent Docks, constructed by Nap. I., large enough for 2000 ships. The trade of the port is on the increase; colonial produce, wool, guano, petroleum, tallow, wheat, etc., enter through it. The South Citadel has been moved to give more quay room; and a large new Citadel built.

Antwerp is improving every day, but the ancient, winding, narrow streets, like those of many of the towns in Belgium, are not laid out upon any plan, and have followed the natural caprices of a growing population. The quaint old houses, six or seven stories high, tapering up to a pinnacle, have their oriel fronts adorned with the tracery which characterises the buildings erected in Flanders by the Spaniards.

The city arms are Two Hands, in allusion to the name (*aan*, a hand, *werpen*, to throw), derived from a certain giant, Antigonus, who cut off the hands of those who would not pay toll, and threw them into the Scheldt; till he was conquered by another Giant Brabo, who gives name to Brabant. Statues of Bodnognatus (of Cæsar's time), Leopold I., Rubens, Teniers, Vandyck, Schoonbeke, Carnot, etc., are seen.

The churches are embellished by some of the best productions of *Rubens* and *Van Dyck*, and other great masters of painting, natives of the city. They are closed between 12 and 3; but this is the best time for seeing the pictures; a fee is charged, namely, 1 fr. for 1 person, and ½ a fr. for each additional person.

Cathedral of Notre Dame (open on Sunday and Thursday, Free; on other days, after 12, for 1 fr. Tickets at the Gardien's, near the south door.) The beautiful tapering Gothic *Spire*, 402 ft. (or 600 steps) high, is in lat. 51° 13′ N., long. 4° 24′ E. Entering, the first object of attraction is the celebrated painting—with engraved copies of which most people are familiar—viz., *The Descent from the Cross*—reputed to be the *chef d'œuvre* of Rubens.

On the other side is the "Elevation of the Cross," which Sir Joshua Reynolds describes as one of the best compositions painted by Rubens. The "Assumption of the Virgin," and "The Resurrection," are by the same master. "St. Francis," by Murillo. The pulpit is of carved wood.

In front of the west door of the cathedral is a remarkable work in iron, a Well by the celebrated Antwerp blacksmith, Quentin Matsys, who subsequently became a great painter; and in the Place Verte, is a fine statue of *Rubens*, born here 1577, while his father was a refugee at Siegen (which also claims him). He lived (1580 to 1600) at 54, Plain de Mer. His tercentenary was observed 1877, with great splendour.

The church of *St. Jacques* contains many precious and rare works in painting and sculpture. The tomb of Rubens (died 1640) is the principal object of attraction. The altar-piece is also by Rubens; the "Saviour Crucified" is by Van Dyck. The fine marble statue of the Virgin is by Duquesnoy.

St. Paul's Church contains a representation of Mount Calvary,—the Crucifixion—and the Ordeal of Purgatory. The rough manner in which these scenes are represented, forms a contrast to the other works of art in the church. The "Adoration of the Shepherds," is said—but not generally considered—to be the production of Rubens; others are "The Descent from the Cross," a magnificent altar piece—"The Works of Mercy,"—and last, though not least worthy of notice. "The Scourging of Christ," by Rubens.

The churches of St. Augustine and of the Jesuits also contain several good paintings and statues in wood. In St. Augustine's is Rubens's "Marriage of St. Catharine." St. Andrew's has a carved pulpit, by Verbruggen—the Calling of Andrew.

The collection of pictures at the *Museum* is

open every day (*free*), 10 to 3. Quentin Matsys has several works of merit here—his "Descent from the Cross" one of the best; "The Dead Christ;" "The Virgin and Child;" "St. John;" "A Holy Family;" "Our Saviour on the Cross;" "Christ between the two Thieves." Rubens has the "Adoration of the Magi." The wall paintings are by De Keyser. Teniers, Van Dyck, Sneiders, and Jordaens, all celebrated Flemish painters, were born in Antwerp.

At the new Town-hall are carvings and paintings of the late Baron Leys; born 1814, in Rue Leys, in a handsome house, which contains some of his frescoes & other works. The Oudheden Museum, on the site of the Steen or Castle, has a good collection of mediæval antiquities. The old house in Marché de Vendredi, of the *Plantin-Moretus* family, printers from the time of Phil. II., now belongs to the town, with its thousands of MS. letters of scholars, portraits, books, paintings, &c.

The fine old Gothic Exchange, burnt 1859, is replaced by a new one by Schadde. The Zoological Gardens are well worth visiting.

Bruges, the Flemish *Brügge* (or Bridges, of which there are fifty short ones) is the capital of W. Flanders, 55 miles from Brussels, 8 miles from the North Sea. It is 4½ miles in circuit. Here 6 canals meet, from Ghent, Ostend, Dunkirk, Sluys, Furnes, and Ypres, in the large Dock or Basin. Bruges, in the 15th and 16th centuries, was the great commercial capital of Northern Europe. Here Caxton lived, as a mercer, about 30 years (down to 1476), in the Domus Anglorum, of which he was governor 1463-9; and here, at Colard Mansion's press over the porch of St. Donatus, he brought out, about 1474, his black letter 'Recuyell of the Historyes of Troy," the first book printed in the English language. The Cathedral 330 ft. long, 90 ft. high, is a large Gothic brick building, rich in paintings, tombs, and banners of the Golden Fleece. The Gothic church of *Notre Dame* has a marble of the Virgin & Child, supposed to be by Michael Angelo, and, in the aisle south of the choir, the fine *Tombs* of Charles the Bold, the last Duke of Burgundy and his daughter, Mary. Among paintings notice the Virgin & Child, by Van Dyck; the "Adoration of the Shepherds," and the "Adoration of the Magi." The Pulpit is a highly finished carving in wood. Entrance 1 fr. when church is shut; 1 fr. to see tombs of Charles and Mary. The *Hospital of St. John*, close to Notre Dame, has pictures by Hans Memling; 50 c. entrance fee. At the Town Hall is the Chapel of St. Sang, a Gothic gem. St. Jacques is a Gothic brick church. The Jerusalem is a round church.

The *Belfrey* of Bruges 350 ft. high, at the Halles, has a celebrated chime of bells, 48 in number, played 4 times an hour by curious machinery, which can be inspected by paying a small fee. Lace-working is seen in almost every street. The Fish market is very curious. Bruges has the characteristics of a Dutch town, more than any other in Belgium. The Hôtel de Ville is a fine Gothic edifice of the 14th century; its Library (15,000 vols.) has valuable MSS. Museum or Academy has some fine paintings of Van Eyck and others. Van Eyck's statue stands near it; that of Memling, near the Palais de Justice (which has a good fire place). The Lion du Flandre was Ch. II's house.

Brussels, the cap. of the kingdom and of N. Brabant, and the seat of Government, is 88 m. from Ostend, 27¼ from Antwerp, 35 from Ghent, 71½ from Liége, 149¾ from Cologne, & 213 from Paris.

Brussels is a favourite place of resort in summer (*en route* to and from the Rhine), and of residence in winter, with the English. Hotels very good, and more economical than private lodgings Mean temp. 34° (Jan.) to 65° (July).

Brussels has formed the subject of the warmest eulogiums from three of our modern poets, Byron, Scott, and Southey. The traveller who visits the upper or "west end" of the city, the Place Royale, the church of St. Jaques sur Candenberg, and the statue of the Crusader, Godfrey of Bouillon, thence to the Place des Palais, the King's Palace, the Palace of the Prince of Orange, the Park, the Rue Royale, the buildings in the Rue de la Loi, the view from the Place du Congrès, —will admit that the good points of this part of Brussels render it a very agreeable city.

The cities of Antwerp, Bruges, and Ghent, are objects of reverence to the antiquarian, historian, and the lover of the fine arts, but the capital of Belgium is "Paris in miniature." Here Parisian toilettes, ganteries, chaussures, and above all, the genuine lace of Mechlin and Brussels manufacture are to be had on advantageous terms, in the Montagne de la Cour, the Rue de la Madeleine and the beautiful Arcade of St. Hubert. Let the visitor proceed to the Grande Place, to admire the fine Gothic spire of the Hotel de Ville, and the various architectural designs of the surrounding buildings, together with the statues in bronze of Counts Egmont and de Hoorn, (removed *pro tem.*) opposite the "Maison du Roi." It was also in the front room, on the 1st floor of this beautiful monument, now under repair that Charles V. signed his abdication.

If the traveller next visits the *Cathedral* of Sainte Gudule, (1010) he is struck by the beauti-

ful painted glass in its Windows, particularly that of the St. Sacrament Chapel, which is deemed the most exquisitely painted window in Belgium. The carved Pulpit by Verbruggen, representing the expulsion of Adam and Eve from the garden of Eden, also an object of admiration.

The amateur of paintings will be pleased by paying a visit to the *Museum*, where, among other specimens of art, he may see "The Deluge," by Corriers; "Diana," by Annibal Carracci; "Holy Family," by Guido; "Song of the Angels," by Paul Veronese; "Christ bearing the Cross," by Rubens.

For Through Route from London to the Rhine, see first Time Tables of Belgian Railways,—pages 90-91. For Route to Sédan, Metz, and Strassburg, see page 106. A New Line has been opened from the Midi Station for Waterloo and Braine d'Alleud; the latter being best for pedestrians, as being nearer to the Lion Mount.

The same pile of buildings contains a Museum of Modern Inventions, or Palace of Industry, a permanent exhibition of the products of national manufactures; also, a Gallery of Natural history and Mineralogy, exceedingly well classified, and the celebrated Burgundian *Library* containing 200,000 vols. and 18,000 MSS. of surpassing interest, many of them exquisitely ornamented with minature paintings. Here also is the MUSEUM OF MODERN PAINTINGS & STATUARY, including specimens of Belgian modern Painters; and of beautiful Statuary. Here are the celebrated "Abdication of Charles V." by Gallait and the "Compromise of the Nobles," by De Biefve.

11. THE PALACE OF THE DUKE OF ARENBERG.—Strangers are admitted to see the Picture Gallery by applying to the Porter at the Lodge. The collection has many beautiful specimens of the Dutch and Flemish Master, Van de Veldo, Van Ostade, Gerard Douw, F. Mier, several portraits by Rubens and Van Dyck—the "Game of Bowls," a clear and sparkling picture by Teniers; but the gem is the face of a Child, by a very rare Master, Van der Meer of Delft.

12. THE WIERTZ GALLERY OR MUSEUM, situated on an eminence above the Zoological Gardens, open from 10 to 4 daily, admission free.—Contains some of the most extravagant and extraordinary productions of modern times; well worth visiting. Some of the principal are:—"Fight for the body of Patroclus," (No. 1.); "The Last Cannon," No. 57); "The Triumph of Christ" (No. 20.); "The Confidence," (No. 43.); "The Rose-bud," (No. 42.); "A second after Death," (No. 51.); "The Dog in his Corner," (No. 100.); "The Concierge," (No. 79); "The beautiful Rosine," (No. 35.); "The Precipitate Burial," (No. 24.), a fine picture.

13. PALAIS DE JUSTICE.

14. Celebrated PORTE DE HAL, an ancient town gate, once a Bastille on a small scale, now used as a Museum of ancient armour and weapons of warfare from the remotest periods. The altar screens taken from suppressed convents are most beautiful specimens of carved wood.

15. GALLERY ST. HUBERT, is a noble Arcade, fitted up with elegant shops, near the Grand Place.

16. THE SQUARES OF BRUSSELS.—PLACE ROYALE contains the Palace of the Count and Countess of Flanders; the principal Hotels, and a fine statue of Godfrey de Bouillon, the hero of Tasso's Jerusalem.

17. THE GRANDE PLACE, containing the *Hotel de Ville* with its beautiful spire, 364 feet high (Waterloo seen), in the centre of the most picturesque square in Belgium, and the Fraikin's Monument to Counts Egmont and de Hoorne; see above.

18 THE PLACE DES MARTYRS, in the centre of which is a statue of Liberty, over the tombs of the Belgian Patriots who fell fighting to regain their independence. September, 1830.

19. The Place du Luxembourg, in front of the Luxembourg Station, with a statue representing John Cockerill, of Birmingham, who founded in 1817, at Seraing, the establishment for the construction of machinery and steam engines, which is now the most important on the continent.

20. FOUNTAINS.—Two in the Park; one on the boulevard opposite the "Rue de Namur"—erected, 1866, in memory of a Burgomaster of the town, Mr. Ch. De Brouckere—one on the Place de Rouppe, erected, 1840, also in memory of a magistrate Mr. Rouppe; another in the Place du Sablon, erected by Lord Ailesbury; last and also least, though the most important, the diminutive far-famed "Mannikin Fountain," in the Ruede l'Etuve, behind the Town Hall.

21. The Geographical Establishment of Van de Maelen (Porte de Flandre) open every day 9 to 1 and 1 to 4, has many interesting collections, medals, vellums, specimens of industrial art, &c.

22. To LACKEN—King's Palace: and Cemetery. Lacken or Laeken, at the end of Allée Verte, (3 m. has in the Cemetery, monumental chapels dedicated to Leopold I's wife, Maria Louise, and to Malibran. In the latter is a group by Geefs, something like Murillo's Assumption. The Palace or *Château*, built 1782, was bought by Nap. I. for Josephine, and was lately the retreat of the King's Sister, the widow of Maximilian of Mexico. It stands in beautiful grounds.

By rail, (South Station), there and back, 2 francs 30 centimes. Waterloo is still a place of surpassing interest to most Englishmen; and Hougoumont especially deserves a visit; but we trust that the monuments of international conflict will soon give way before those of more peaceful competitions, with the growing aversion which all civilized nations have to war. Near the Haye Sainte is a monument to the Hanoverians and Colonel Gordon; and the spot is shown where Picton fell.

Charleroi.—*Stat.*—Pop. 13,500.—*Buffet.*—Hotel De L'Univers; Hotel Dourin.

In Hainault, 45 m. from Brussels. The fortifications prevent Charleroi from becoming a flourishing town; but the surrounding neighbourhood has a population of 80,000. The Charleroi coal-field gives employment to 10,000 miners, and yields annually 3,000,000 tons of coal; nail making and a large glass trade are also carried on, with numerous and extensive iron works, which

derive their supplies of iron from the Sambre and Meuse district,—one of the most picturesque and interesting in Belgium. It extends about 4 m. south of Charleroi to the French Ardennes.

Vigilantes—The course, 1 fr.; 1 hour, 1 fr. 50 c.

Cap. of E. Flanders, on the Scheldt and Lys, 35 m. from Brussels. The station of the direct railway to Antwerp is at the Antwerp Gate. This line runs through the Pays de Waes, the most densely populated district in Belgium; it passes Lokeren. *The Canal up to the town has 14 feet water.*

Here John of "Gaunt," the son of Edward III., and the father of Henry IV., was born 1340; his mother being Philippa of Hainault. The streets and public squares of the city are wide and spacious; it has more the appearance of a modern city than Bruges, and elegant equipages enliven its busy thoroughfares The *Town-hall* offers an exquisite specimen of florid Gothic architecture in the right wing and corner; the other side is not so good. A bust of Philip van Artevelde, the famous Captain General, is to be seen here. The oldest and one of the finest churches is that of St. Nicholas. Visit the site of the houses of Van Artevelde and Count Egmont, also the Gilded Dragon, brought by Van Artevelde from Bruges, now on the Belfry (386 ft.), which has the Roland Bell in it.

The *Cathedral* of St. Bavon is not remarkable for external beauty, but the interior presents a singular appearance, from its being lined with black marble, and from its having 24 Chapels containing ornaments and paintings of great value. It would occupy too much space to describe each oratory; but we would direct attention to the eleventh which is embellished by one of the most remarkable works of the early Flemish school. A painting, representing "The

Digitized by Google

Adoration of the Lamb," by the brothers Van Eyck, is considered an extraordinary *chef d'œuvre*. It is part of a panel work, the other parts being at Berlin and Brussels. The colouring is as brilliant and a pure as the first day it left the hands of the painters. The 14th Chapel has an equally admired painting by Rubens; representing a religious ceremony—St. Bavon renouncing the military profession to become a monk. Sir Joshua Reynolds says of this painting, that "for composition, colouring, richness of effect, and all those qualities in which Rubens more particularly excelled, it claims a rank among his greatest and best works." The wood carvings of the pulpit and other carvings are very remarkable.

The pictures in the church of *St. Michael* have been shamefully treated by depredators and modern restorers. The beautiful Crucifixion, by Van Dyck, is so disfigured as not to be worth examination. The Museum of Ghent is by no means worthy of such a city; but the Botanical Gardens contain some choice exotics and rare plants.

The Town Library (70,000 volumes) is rich in valuable MSS., and has a folio Latin bible (of 1466 to 1470), the bible of Mayence, 1472, and other old books. The Palace of the University is remarkable; and the Academy of Paintings contains some good pictures.

Ghent is full of convents. A new *Béguinage* has been opened to replace the old one, which has been partly pulled down excepting the museum which contains one of the finest pictures in Belgium, by Raphael; the subject is the head of our Saviour. It is shewn by the inmates of the convent to any one who wishes to see it. The Theatre and public ball and concert rooms, close to the Hotel de la Poste, are worthy of a visit; as also the ruins of the Monastery of St. Bavon, near the Porte d'Anvers, about ten minutes' walk from the Church of St. Jaques. (1 franc for a party.) At the Casino, the English Volunteers were received at the International Tir of 1872. Notice the Marché au Vendredi and the Quai au Blé, with the quaint old Spanish houses.

It finally terminates at Aix-la-Chapelle, down an inclined plane, up which carriages are drawn by a stationary engine; in coming from Aix-la-Chapelle. Spa, in the province of Liége, lies on the Wayai, under the Ardennes, 17 m. from Liége (via Pepinster), 17 m. from Aix-la-Chapelle, in a spot abounding with beautiful walks and drives. Height above sea, about 1000 ft., with a bracing and healthy climate, though a little chilly just after sunset. The season is from May to October. Its chalybeate (or iron) springs, which were known even to the Romans, attract visitors from all parts of the Continent and from America; in fact, Spa has given a general name to all sites for mineral waters.

The waters are full of carbonic acid gas, sparkling, cheering, easily digested, and containing carbonate of iron, soda, lime, and magnesia. Those most frequented are as follows: The Pouhon, used by Peter the Great 1717, whose tablet and certificate are here; Sauvenière and Groesbeck in a fine wood 1½ miles from the town, and 470 feet higher, near the Promenade d'Orleans, and the pillar to Louis Philippe's mother; Geronstère, in a beautiful wood, 2 miles distant, having a slight sulphur taste; Barisart, 1 mile, sparkling and refreshing, especially good in dyspepsia; Tonnelets, 1 m., in a boggy spot; and the two Prince of Condé springs, the favourite English springs, clear, agreeable, and easily digested. Tens of thousands of bottles of the Condé and the Pouhon are exported. The waters must be taken under medical direction, and may be drunk or bathed in. In the latter case, the waters being in their nature highly charged with gases, and heated by steam, the patient fancies himself bathing in "creaming champagne." Peat and medicated baths are also administered with good effect. Breakfast parties and pic-nics are often made to the more distant Spas.

Balls, concerts, and fêtes champêtres are given at the Spa, the Redoute, near the Pouhon spring; at Vauxhall, towards the Géronstère spring; and at the Salle Levos, and other pretty gardens. A splendid Bath House was opened 1868, at a cost of £80,000; and in another part of the town there is a handsome swimming bath. Races and Steeple-chases in June and September, and Cricket in the season. Articles of painted and varnished ware are sold. Fishing and shooting may be had, and hunting at Viel Salm about an hour's distance by rail. Distant Excursions can be enjoyed to the Coo Fall, the Remouchamps, and Hoy Grottoes, and in the ravines and glens of the neighbouring hills, 2000 feet high; the plants and strata of which are described in the late Dr. Cutler's "Notes on Spa."

The Administration of the Town and the new Directors of the Casino use every means to give éclat to the Fêtes. Tax on visitors to the Casino, 1½ fr. a day, or 8 fr. the week.

Villers la Ville.—*Stat.*—Pop. 778.

A spot celebrated for its ruins, in S. Brabant, 22 m. from Brussels. The Rail (p. 103) passes through the garden of the *Abbey*, and generally so rapidly, that only a glimpse can be obtained of these magnificent ruins. The tourist should therefore make an excursion from Brussels, expressly to visit them. Arrangements have been made by which tourists can leave Brussels every day at 9.5 in the morning, and return to Brussels at 4.30 in the afternoon, in time for the table d'hôte; thus spending a most delightful day at the Abbey. The *Abbey de Villers* is one of the most romantic and picturesque piles of ruins in Belgium; in a beautiful valley, at the centre of an ancient forest, covering an immense area of enclosed grounds.

Digitized by Google

The best view of the ruins is from the terrace gardens beyond the railway. No one can behold the refectory, the cloisters, the crypts, and lastly the magnificent ruins of the beautiful church, without feelings of awe and wonder.

The Abbey de Villers was first pillaged, and then set fire to by a party of French Republican soldiers in 1793. The ruins were then sold to a person of the name of La Terrace for 70,000fr., who continued the work of destruction, and left the present ruins, which, with the adjacent land, is now the property of Madame Huart d'Enghien.

On the right bank of the Moselle, in a fine fertile valley, bounded with vine-clad hills. It is the Roman *Augusta Trevirorum*, the capital of *Gallica Belgica*, and the oldest city in Germany, having many ancient remains and curious old houses. The *Dom*, or Cathedral of St. Peter on the site of the Roman Palace, is a Romanesque group of spires and towers, 336 ft. long; containing the tombs of two Electors, and a relic called the Holy Coat, made of camels' hair, and said to have been worn by our Saviour; which drew a million of pilgrims here when exhibited in 1844. Adjoining the Dom is the *Liebfrauenkirche*, or Lady's Chapel, an ancient Gothic building, on

the site of a Baptistery. The Pillar of Granite, surmounted by a cross, standing in the market-place, commemorates the appearance of a fiery cross in the sky in 958. It was part of a church destroyed by Attila. The *Red House Hotel*, (the *Old Town Hall*) in the market place, faces St. Gangolph's. The *Roman Baths* and *Amphitheatre*, are near the Weber Gate. What remains of the latter is a Wine-store. The Black Gate (Schwarzes Thor), or *Porta Nigra*, on the N. side of the town, is a very interesting relic built about A.D. 312; sometime used as a church, but restored as a gate 1817. The Bridge over the Moselle is near the station; parts of its piers date from B.C. 28.

The Roman *Basilica* of Constantine or Heathens' Tower, has been restored, and is now a Protestant Temple. It stands on the "Pallast," near a Barrack, which was a former Palace of the Electors of Treves. The Library and Museum, in the former University buildings, now a College near the Jesuite Church, contain many rare books, MSS., coins, medals, and Roman remains.

The Hospital looks on the river, near St. Paul's Church, or *Paulinuskirche*, which stands on the site of the oldest church in Treves, and has been rebuilt five times; the present erection is of the last century. It has a fine painted ceiling by Scheffer, of Augsburg, Rubens's pupil.

The *Pallien* is a picturesque suburb, and a good point of view, across the river, near the bridge of boats. Here are the best houses and villas; with a house dedicated to Ste. Genoveva. Beyond the Amphitheatre, on the Luxemburg road is **Igel**, 6 miles off, worth visiting for its beautiful Roman monument, 70 feet high. It is a red sandstone obelisk, carved on one side, and said to be named from Aquila, or from Caius Iguis, or Caligula. Carriages can be had at Hotel de Treves. Conveyances.—Railway, pages 79, 118, 120.-5.

From Treves the line to Cologne and Düren may be followed to Kellburg (in the Hohe Eifel), Gerolstein (in Vorder Eifel), and Hillesheim. The **Eifel** is a hilly volcanic district, extending 40 m. by 25 m.; bare, but interesting, from being marked by several craters and volcanic deposits. The highest point is *Schartebery*, 2,160 ft. above sea, between Gerolstein and Daun. See p. 120.

Steamers *down the Moselle* (or *Mosel* in German), following the windings of the river to Coblenz, touching at Berncastel or Trarbach, in 9 hours. See Alphabetical list of Sailings. Its beautiful banks are bordered by undulating hills, covered not only by vines, but with rich wood; alternating with picturesque villages, promontories, ruins of castles, watch towers, and Gothic church steeples.

It is now accessible by *Rail* (p. 124), which follows a more direct route, via **Ehrang** and Schweich ferry, to Wittlich, and **Uersig**, the Stat. for Berncastle, Traben, and Trarbach. **Bullay**, halfway, is the Stat. for Zell, and for **Bertrich Baths**, on the Alf. From Cochem the Stat. for the Ellerberg and Hoch Kessel, the rail follows the river bank.

HOLLAND, OR NETHERLANDS.

HOLLAND (etymologically, Hollowland) is situated along the south-eastern coast of the North Sea; greatest length from N.E. to S.W. 190 miles; greatest breadth from E. to W., 123 miles. The area (including Limburg) is 1,860 square m.; to which the reclamation of the Zuyder Zee will add six per cent. area of Luxembourg Duchy 1,036 square miles, with a pop. of 205,160. Holland was an extended swamp, alternately covered with and abandoned by the waters of the ocean, the contest with which has ended in a great triumph for human industry, and in the country being brought into a high state of cultivation and comparative safety. The canals are very numerous, and of the greatest utility in draining off the waters and in facilitating the internal trade. They are lined with trees, which tend greatly to improve the country, in itself so flat that to those approaching it along the rivers, and some part of the coast, the trees and spires seem to rise out of the water. Along the

coast of the North Sea there is a line of broad sand-hills and downs, sometimes high enough to shut out the view of the sea even from the tops of the spires. In Zealand and North Holland the encroachment of the sea is kept back with great difficulty and at an immense expense. Friesland, which has no sandhills, is protected by broad dykes and palisadoes, which cost half a million sterling yearly. Wide meadows, clad with the richest verdure, are, during eight months of the year, covered with cattle, whose high condition attests an abundant and wholesome nutriment. In the North, wheat, flax, and madder are raised; and in the South, where agriculture has made the greatest progress, inferior tobacco is grown, and different kinds of fruit-trees cover the fields.

In the towns, beyond the complete collections of Dutch Paintings at the Hague and Amsterdam, (and the Japanese Collections,) there is little to attract. Holland, however, presents the picture of a people owing not only their wealth and high commercial position, but even the very land, to their own labour and enterprise. The best seasons for visiting Holland are May, June, Sept., and Oct.

The Dutch possess an excellent system of **Education**, regulated according to laws passed in 1857 and 1863, and based on a system of religious equality. These laws are most complete in all their details and provisions, and ensure for *every* child in the country an education in the simple branches of secular knowledge. The law does not compel parents to send their children to school, but refuses *all* relief from the public funds unless they do so; and the result is, there are *none* without education. The Universities of Leyden, Utrecht, and Groningon, contain 1400 students.

Population—(1877) 3,982,000, estimated. In 1875, about 3,809,530, exclusive of the Dutch Indies. The Colonies number 24 millions. The Protestants amount to 3-5ths; the Catholics to 2-5ths. There are about 68,000 Jews. The Protestant and Catholic clergy are paid by the state.

Several dialects are spoken in Holland; the Dutch, which is in fact an offspring of the Low German or Nieder Deutsch, is the language of two-thirds of the inhabitants. Flemish is spoken on the Belgian frontier, and the provinces have each their peculiar dialect; that of Friesland partakes of the ancient Frison, that of Guelderland and Overijssel (ij=y) retains much of the ancient Low Saxon intermixed with modern Dutch. French and English are generally understood by the middle and upper classes.

Government.—A Constitutional Monarchy, dating from 1814, and styled *Het Koningrijk der Nederlanden*, or "Kingdom of the Netherlands," the proper name of the country. William III., born 1817, is reigning King, and Grand Duke of Luxemburg and Duke of Limburg; his eldest son is William, Prince of Orange, born 1840. The First Chamber is chosen by the Provincial States, and consists of 39 members who sit during nine years. The Second Chamber consists of 86 members, sitting 4 years and chosen by ballot by the tax-payers. The chief legislative power resides in the Second Chamber, which contains the most eminent political men in the country. There is complete religious toleration. Each of the 11 Provinces has its own Governor, or "King's Commissioner," and its Provincial States. **Revenue**—(1879), 9½ millions sterling; Expenditure, 10 millions sterling. **Debt**, 80¾ millions. The Colonial Government is vested nominally in the Crown, the "States" having a right of inquiry and of voting the supplies.

Army.—59,000 in 1878, besides 100,000 militia, exclusive of the Dutch Indies. **Navy** (1878), 101 vessels (15 being ironclads), with 580 guns.

Productive Industry.—At present the manufactures of Holland are upon a narrow though gradually increasing scale. Linen, tapes, and other smallware are made for home consumption. There are large manufactories at Enschede and Tilburg for supplying the Dutch Indies with calicoes, cloths, &c. The sugar-refining trade, and the manufacture of tobacco and snuff give employment to a large number of persons. The breweries are also extensive; but the building of ships, barges, and boats, form the staple industry of many of the localities on the banks of the rivers. At Schiedam are 300 "Hollands" distilleries: at Amsterdam, Curaçoa and Dutch bitters are made. Dutch bulbs are exported from Haarlem. There are several rising Iron and Metal Works at Rotterdam, The Hague, and Amsterdam. The *Imports* and *Exports* from and to England (1878) were worth 16¾ millions, and 22½ millions respectively

Amsterdam, or Amstel-dam, the cap. of N. Holland, and the largest city in the Netherlands, 38 m. from the Hague; on the Amstel, a branch of the Ij, or Y, which is an inlet of the Zuyder Zee, and constitutes its port. It communicates with the North Sea by the *North Holland Canal*, 50 m. in length from Amsterdam to the Helder and the Texel; which took 6 years, and 12 million guilders to complete it. This, however, is inadequate to the increasing commerce, and has been in part superseded by the *North Sea Canal*, opened 1876, through the isthmus of Holland to the new Harbour of Ymuiden (or mouth of Y), on the North Sea; made at a cost of 2½ millions sterling by an English firm. The harbour is inclosed by two piers, each 5,000 feet long, with a mouth 850 ft. wide; and has a basin inside at the entrance of the canal; which is 14 miles long and 26 ft. deep, with two locks, 239 feet and 313 feet long. It follows the course of the Y, which has been drained; a rail follows the canal. Large colonial ships with coffee, tea, tobacco, sugar, etc., now come this way. Steamers run to London, Hull, and Edinburgh. The tidal waters of the Zuyder Zee are to be shut off, and the Lake is to be reclaim. 1,400 sq. m. Mean temp. 33° (Jan.) to 66° (July).

The city is 9 miles round, and is entirely built upon piles driven into the sand beneath. Its numerous canals are spanned by nearly 300 bridges; the best is that of the Hooge Sluis, on the Amstel, from which the finest view of the town may be obtained. Here is St. Anthony's Gate, a heap of brick spires, now a medical school. The *Palace* is a vast stone structure built upon 13,695 piles; it cost the city two millions and a half. It stands on the Dam; near the Memorial of 1831, the Exchange, Post Office, Nieuwe Kerk, and Seamen's Club. The Stadhuis or Town Hall has several portraits. There is a fine gallery of Dutch paintings in the Oude-mannen Huis, which belonged to the late Mr. Van der Hoop or Hope; open 10 to 4, by a small payment. There are about 200 paintings by Ruysdael, Rembrandt, Berghem, Cuyp, &c., at the national gallery in the Trippenhuis, called *Rijk's Museum*; among the principal paintings are Van der Helst's fine portrait, pictures of the City Guard and Archer's Guild, G. Douw's Evening School, P. Potter's Bear Hunt, Rembrandt's Night Watch: open daily; Saturdays by payment.

The *Crystal Palace* (Hot Palais) is a handsome pile near the Dutch Rhenish Station charge

From Queenborough to Flushing (except Sunday) in about 10 hours; thence by rail. By the two first routes, the Rhine is reached from London in twenty hours. Steamers from Hull to Antwerp and Hull to Rotterdam; see page 314. The voyage down the Rhine, from Strassburg (Kehl), to London, may be performed by steam-boat in 82 hours, for £2 17s. 10d.; and by railway and steam-boat in 42 hours. Grimsby to Antwerp, see page 312.

Travellers seldom make use of the Rhine Steamers below Cologne, as the scenery is flat and monotonous, and the expense of extra provisions and loss of time more than equals the extra expense of travelling by rail from Rotterdam. On the Rhine and in Germany the Railways are called *Eisenbahn*.

Steamers on the Rhine.—The boats are very commodious and swift. They are divided into three cabins—Pavilion, Chiefcabin, and Fore cabin; 100lbs. of luggage allowed. Refreshments on board per tariff (table d'hôte dinner 2½ m.; cup of coffee 15pf). The quickest boats go, in one day, down the Rhine, from Mannheim to Cologne and Düsseldorf; Düsseldorf to Rotterdam. Up the stream, in one day, from Cologne to Mayence in summer, and to Coblenz in winter. The following is the average time of the voyage:—

	MILES.	DOWN.	UP.
Rotterdam and Emmerich	111	8 hrs.	12 hrs.
Emmerich and Düsseldorf	73½	,,	10 ,,
Düsseldorf and Cologne	31½	3 hrs.	5 hrs.
Cologne and Mayence	127	9 ,,	13½ ,,
Mayence and Mannheim	46½	3½ ,,	5½ ,,
Mannheim and Strassburg	7½	,,	7 ,,

In addition to the above stations, there are 36 small Towns and 21 Landing-places at which the steamers touch, some at the most picturesque points. At any of them, without exception, the Tourist may land, and continue his journey when he pleases, up or down the river, by any of the Company's steamers. He has only to take care to have his ticket marked by the conductor of the boat before leaving it, and to re-embark in a steamer belonging to the *same Company*. For landing or embarking at any of these points the charge is 10 pf.=1½d. Upon disembarking, a small charge is made for each article of baggage placed in care of the boatman. A tariff fixes the amount of charge, which is often doubled by the men of the boat; but the Conductor, who generally speaks English, if referred to, will rectify this imposition, and declare the real sums which ought to be paid. In dining on board, examine, before dinner, the Tariff hung up in the cabin, note the price of dinner and the wine you require, and pay that amount to the waiter without asking what you have to pay. Tickets must be taken before going on board. The Rhine Steamer Company issues Luggage Tickets (A, B, C,) which entitle the holder (in case his luggage is lost), to 90, 30, or 15 marks compensation. Fee for these tickets between Cologne and Mannheim is A 33, B 25, C 16, pfennige.

Wines.—The Hock and Moselle wines are called Johannisberg, Steinberg, Marcobrunn, Rudesheim, Hochheim, etc. Mayence, Coblenz, and Frankfort, are the markets for sparkling wines.

Money.—See page lii, and page 432.

Scenery.—Below Bonn, 18 miles from Cologne, or above Mayence, there is scarcely any object striking enough to merit admiration. About Bonn the scenery of the Rhine may be said to begin with the Seven Mountains, between which and Mayence the turreted towns, castellated ruins, and vine-terraced hills, succeed each other in picturesque profusion. The most appropriate starting place to explore the inland beauties of the Rhine are Godesberg, Göhlenz, St. Goar, Bingen, and Mayence.

The **Sources of the Rhine** (ancient *Rhenus*, and German *Rhein*), are near those of the Rhône and Ticino, in the Rhein-thal, an elevated region of the Grisons, bordering on Mont St. Gothard, 300 miles from its mouth, 7,700 feet above the sea. Passing through Lake Constance, it tumbles over the *Falls* of Schaffhausen, receives between it and Bale the influx of several Swiss rivers, and after a course of nearly 200 miles past Strassburg and Speyer during which it is increased by the Neckar at Mannheim, and at Mayence by the Main, it enters, near Bingen, the gorge or Rheingau, of 110 or 120 miles, in which its greatest beauties lie. Some parts of the Dart and Tamar at home rival these, but they are on a smaller scale. Passing Cologne, Wesel, and Emmerich, to the Netherlands, it expands into a delta, and creeps by several mouths into the North Sea, almost losing its identity. The Waal mouth goes to Rotterdam, the Yssel to the Zuyder Zee; and one mouth called Old Rhine, but no wider than a canal, passes by Utrecht and Leyden. The greatest breadth of the river is at Düsseldorf, 2000 feet. Steamers and barges can ascend to Bâle. It flows through, and gives name to the Rhenish provinces of Prussia,—Bavaria, (called the Palatinate,) Hesse-Darmstadt, and Baden; and to the former French Departments of Haut and Bas Rhin, annexed as Elsass to Germany, 1871; so that the Rhine is now a German river. The States on the German side formed the Confederation of the Rhine under Napoleon.

Cologne, a city and fortress of Prussia, on the Rhine, having 20 churches, 8,500 houses, 19 gates in the old Walls, 33 squares, 270 streets; with a railway viaduct and a *Bridge* upon 39 boats, 1250 feet in length. (Passengers pay 2 pfennigs each.)

Objects of Attraction—St. Peter's *Cathedral*, which is 511 ft. by 231 ft. within 50 yards of the Railway Station (in lat. 50° 58' N., long. 6° 57' E.) Entrance to the nave & transept free all the day. Choir open 6 to 10 and 2 to 3.30, but you can only walk about in it from 8 to 9. At other hours you must pay: to inspect the Cathedral, 1 mrk. each; to see the Choir, and the Treasury of the Three Kings, 1 mark 50 pfennigs each person. Or 2 marks 50 pfennigs each, to see everything, and ascend the tower without a guide.

It was commenced in 1248, and is now almost finished; its colossal proportions and magnificent architecture inspire feelings of admiration. Walk round the area in which the cathedral stands, to see the full beauty of the structure. The choir and South door are especially remarkable. The nave is 160 ft., and the aisles are 80 feet high. The height to the ridge of the roof is nearly 250 feet, and the two towers of the west front (view of the Rhine, etc.) when finished will be more than 500 feet above the level of the square from which

they rise. The painted glass in the triforium, clerestory, and aisle windows is very rich, a good deal of the modern work being by Munich artists.

Notice the Chapel of the Holy Three Kings, sepulchre of Marie de Medicis, of Archbishop Conrad of Hochstetten, the founder, and of the Count of Schaumberg, &c; also the Adoration of the Magi, and other pictures.

The grandest church after the cathedral is the *St. Martin*, a fine specimen of Romanesque with a good tower. *St. Maria-in-Capitollo*, is famous for its size, antiquity, and rude grandeur. St. Gereon is a good Romanesque church. The very old church of St. Pantaleon, with St. Andreas, the new church of St. Maurice, and the old churches of St. Cunibert, and of the Apostles are all worth seeing; if possible, in the morning, as the churches are closed at mid-day.

St. Peter's Church has the "Crucifixion of Peter," by Rubens, shown by paying a fixed fee. Church of St. Ursula, and the "Eleven Thousand Virgins;" their relics are to be seen in the walls of the church (fee 1 m. 50 pf. for 1 to 3 persons). At the Jesuits' Church are the bells cast out of the cannons which Tilly took in Magdeburg. Notice also the houses in which Marie de Medicis died, and in which Rubens was born, 1577, in the Sternengasse. No. 10; the Town Hall (Rathhaus), with its 16th century Italian porch, and the Hansa Saal, or Room of the Hanse Towns; the old Gürzenich, a building restored and enlarged, and used for concerts, banquets, and as an exchange; and the restored Templars' House. Near the Gürzenich stands the fine equestrian *Statue* of Fred. Will III., with 16 life-size figures of statesmen, soldiers etc., in the pedestal the whole nearly 50 ft. high.

At the Wallraf-Richartz *Museum* in Wallraf Platz, (open daily for a small fee), there is a fine collection of stained glass, Roman antiquities, ancient and modern paintings of the Cologne School, coins, and other objects. There is a good Archiepiscopal Museum.

THE ZOOLOGICAL GARDENS are laid out, with fountains, grottos, &c.; and have a collection of animals and waterfowl. Concerts almost daily.

Express fares throughout Germany are from 20 to 25 per cent. higher than ordinary Quot-

Sailing of the Rhine steamers, see p. 330. From the Cologne Bridge, Frederich Wilhelm Strasse, the steamer starts for Mulheim. The banks of the river here, are by no means devoid of interest, but enlivened by villages and well cultivated fields. As we approach Bonn the summits of the famous *Siebengebirge* (seven mountains) rise gradually into view, sometimes to the right sometimes to the left, with the windings of the stream. These with their rugged sides and ruined castle, on a nearer approach, produce an imposing effect, and mark, as it were, the entrance into the "Paradise of Germany," as that portion of the Rhine is called which lies between Bonn and Mayence.

Deutz (left).—*Stat.*—In Rhen. Prussia, opposite Cologne, joined by a bridge of boats.

Cologne to Bonn by rail, 1 hr., see page 122; by steamer 2½ or 3 hrs. up, 1½ hr. down. Terminus at Cologne—St. Pantaleon's Gate. Toll for carriage or omnibus over viaduct, 75 pf.

Bonn, in Rhenish Prussia (right)—*Stat.*—HOTELS:—GOLDEN STAR HOTEL, one of the best on the Continent in every respect, and worthy of the highest recommendation.

THE GRAND HOTEL ROYAL, situated on the banks of the Rhine: comfortable and clean; well recommended. Ermekiel, proprietor.

RHEINECK, on the Rhine, near the landing-place and the station.

Pop. (1875) 28,114, including the students and garrison. Here the best part, or gorge, of the *Rhine* begins, and extends nearly to Mayence. The river narrows, and grows more rapid; and above the towns and villages are hills, cut in terraces for the vine, and crowned with ruined castles. Bonn is a university town in Rhenish-Prussia, the Roman *Bonna*, and sometime the residence of the Electors of Cologne. The *University*, for 800 students, formerly the Electoral Palace, contains, besides lecture rooms, a library of 150,000 volumes; the Academical Museum of Casts; the Rhenish Museum of Roman antiquities, including an altar to Victory; and the Aula, or academical hall, decorated with fresco paintings. The *Minster* (cross-shaped) has a bronze statue of the Empress Helena, mother of Constantine, by whom it was founded in 320, and built in the Byzantine style; the Collegiate Church; that of the Jesuits; St. Remi, in which is a fine painting by Spielberg; and the Schiesskirche. The house where *Beethoven* was born is pointed out in the Bonngasse, and his statue in the Münster-platz. In the *Cemetery* near the Sternenthor, are monuments of Niebuhr, the Roman historian, by Rauch; Bunsen; Schumann, &c.

There are many beautiful walks, especially to the Hofgarten, with a fine terrace on the Rhine called "der alte Zoll," which has a statue of E. M. Arndt, overlooking the river and the Siebengebirge; the Poppelsdorf Avenue, with its rows of chestnut trees, to the Castle of Poppelsdorf, containing the university collections of natural history, a laboratory, and anatomical gallery; and to the Kreuzberg Chapel, reached by 28 steps, in its picturesque grounds. Boiseri mineral water good.

Fine view of the Seven Mountains on opposite side of the river. Excursions to Godesberg, the Drachenfels, and the valley of the Ahr.

RAILWAY TERMINUS, close to Poppelsdorf avenue. Railways along both sides of the river; with stations at the best points of view; see pp. 122 and 124. Steamers p. 330.

ENGLISH CH. SERVICE.—

Königswinter (left)—Pop. 2100. HOTELS: HOTEL DE BERLIN. See Advt.

HOTEL DE L'EUROPE. See Advt.

In Rhen. Prussia. The beauties of the Rhine increase at this town, at the foot of the "*Castled crag of Drachenfels*," (*i.e.* the Dragon Rock), the nearest of the **Seven Mountains** to the river, with the Great Oelberg behind. No traveller ought to omit ascending this hill, as the view from its summit is one of the most lovely on the whole course of the Rhine. The walk from the pier to the top is not more than an hour, and mules are always in waiting at the foot of the ascent for those who prefer to ride; charge 1 mk. A small Hotel at the top of Drachenfels affords very fair sleeping accommodation, and the view at sunrise is splendid.

The best way of reaching Königswinter from Cologne is not by the steamers, which occupy nearly four hours, but by rail to the Mehlem ferry opposite Königswinter, where boats are always waiting. By leaving Cologne by the first train, the traveller may easily reach Königswinter, ascend the Drachenfels, and proceed by steamer to Coblentz about noon. But should he be obliged to spend the day at Königswinter, he will not repent the delay, as he may find a delightful and picturesque walk, turn which way he will. Boat to **Nonnenswerth** and back, 2 m. Railway, p. 124.

Excursions from Königswinter to the Abbey of Heisterbach or to the summit of the Lowenberg, the view from which extends into Westphalia.

Here commences a region of castles and vineyards which extends up the river as far as Weisel. From Königswinter by steamer or rail (p. 124) to

Rolandseck. (right)—*Stat.*—HOTELS:—HOTEL ROLANDSECK; HOTEL BILLAU.

This is a delightful residence for a few days. Visit the Castle and charming island of Nonnenswerth, celebrated in the legend of Roland, and Schiller's ballad of "Ritter Toggenburg."

Oberwinter, (right), merely a village.

Rheinbreitbach, (left), is a large village, with castles and towers, at the entrance of a valley, in which are the deserted copper mines of Birnberg and Marienberg.

At **Unkel** (left) the cliffs encroach on the bed of the stream, so as to produce a slight rapid on one side. Just above this, and on the opposite bank, is

Remagen, (right)—*Stat.*—HOTELS:—

HOTEL FURSTENBERG; this hotel affords excellent accommodation at moderate prices; well recommended. The Hotel "König von Preussen" belongs to the same proprietor.

Remagen, in Rhenish Prussia, is an agreeable place to pass a few days at. Ascend Victoriaberg for a panorama of the Rhine. The hill to the right is *Apollinarisberg*, with its splendid modern Gothic Church, built for Count Furstenberg by Zwirner (the restorer of the Dom of Cologne), and containing fine frescoes. Rail p. 122.

[From Remagen, excursions are made to the beautiful **Valley of the Ahr** called the Rhenish Switzerland. Excursions of one day, in carriages of the hotel; fixed prices. To Ahrweiler and Altenahr, among wild and picturesque scenery. At Ahrweiler is the source of the *Apollinaris Spring*, a tonic water now well-known in England. A day's excursion can be made to the Lake and Abbey of Laach, through the beautiful valley of Brohl, as below.

Ascent of the Ahr—to **Bad Neuenahr,** up the picturesque valley of the Ahr; a very agreeable and healthy spa, near Remagen. *Stat.*

HOTELS:—KURHAUS; MARIEN STRUDEL; HOF VON HOLLAND (English spoken); VICTORIA and other Hotels.

Neuenahr, in Rhen. Prussia, is 7 m. from Remagen, on the Rhine (carriages, 4 mk. to 6 mk.), Mail omnibus frequently. This watering place, which is similar to Vichy and Carlsbad, has warm alkali springs, good for the lungs, liver, gout, &c. It is full and dear in June and July, when beds should be secured beforehand. The air is highly salubrious. The gardens around the Mariensprudel well are beautifully laid out, and a band plays on the promenade. Excursions to the Apollinaris Kirche; the Landskrone, 500 ft. above the Ahr; the Neuenahrberg (700 ft.) with a fine view of the Rhine; the Schnupp, past the Konigsfold Cross, and the old town of Ahrweiler; the Calvariensberg Convent, over the Steinenthalskopf. ENGLISH CHURCH SERVICE (S.P.G.) in the Kurhaus, at 11.0 a.m. and 4.30 p.m.

PHYSICIANS.—Dr. Briegen, Dr. R. Schmitz, Dr. Anschuld, who speak English.

CONVEYANCES—Railway, see page 122.

Ahrweiler.—Pop. 3000. HOTELS:—HOTEL KRONE; STERN.

In Rhen. Prussia, at the centre of the wine trade of the valley of the Ahr; very prettily situated. The Church is a fine Gothic edifice. Further up the valley the Burgundy grape is cultivated on every accessible shelf of rock, and forming most singular but picturesque vineyards. Before reaching Altenahr the scenery becomes very fine—precipitous rocks crowned by the Castle—then a tunnel through the rock leads to the village of

Altenahr.—INN; RHINE HOTEL, at the entrance of the town. Trout.

This village on the Ahr is surrounded by an amphitheatre of slate rocks—partly wooded and partly covered with vines, and on the highest peaks are seen the ruins of the *Castle* of Altenahr, the finest object in the whole valley. The view is magnificent.

Coming back to the Rhine, a little below **Erpel,** on the left bank, opposite Remagen, is a basaltic peak, 700 ft. high called the Erpeler Ley. The vines on its slopes are rooted in baskets forced into the clefts of the rock.

Sinzig (*Stat.*) a small old town on the Ahr, about 1¼ mile from the Rhine, well worth visiting. Close to the confluence of the Ahr is the village of **Krippe,** (right), communicating by a flying bridge with

Linz. (left)—*Stat.*—Pop. 2330.—HOTEL NASSAU.

A town in Rhen. Prussia. The *Castle*, as well as the town walls of Linz, are built of basalt and the streets are paved with the same material. The country produces copper, iron, lead. Rail p. 124.

Still ascending, we pass Breisig, opposite Hemningen; Rheineck castle and Brohl, at the summit of a beautiful valley, opposite Rheinbrohl. From **Brohl** it is about 7 miles to the Laacher See (Lake), up the valley past Tönnisstein, and over hills covered with beechwood.

The **Laacher See** is a circular sheet of deep blue water, occupying what looks like the crater of an extinct volcano, 666 feet above the Rhine, about 1½ mile diameter, 170 ft. deep and surrounded by meadows and wooded hills. Traces of scoriæ, ashes, pumice, &c., have been found.

Pike and white fish are taken (all preserved); boats at the Laach Hotel. Within a short distance west is *Maria Laach Abbey*, founded 1093, and latterly made a Jesuit School till suppressed 1873; with picturesque Romanesque *Church*, having a dome and 5 towers, and restored cloisters. Krufter Open, on the south is a crater. 1540 ft. high. Niedermendig, built of dark basalt, is noted for its millstones, and beer vaults in the quarries.

Pass Hammerstein Castle, to Andernach, from which the Laacher See (as above) is 9 miles.

Andernach. (right)—*Stat.*—Pop. 3800.

HOTEL:—HACKENBRUCH HOTEL.

The Roman *Antunnacum*, in Rhen. Prussia, and in the middle ages, a free city of the empire. Enclosed with lofty old walls, it contrasts strikingly with Neuwied, further on, which lies quite open. Its Roman gate, and the ruins of the Pfalz or Episcopal palace, its ancient church and tower, with the town arms, at least 1000 years old, are well worthy of notice. Much tarrace (or trass) made hereabout, quarried and burnt; it is a mortar or cement which stands both water and heat; and is used in the dykes of Holland. Rail, p. 122.

Beyond this town the mountains again approach the river, forming a magnificent defile, and having at the water's edge on the left bank, the ruined *Castle of Friedrichstein*, the building of which was begun in the 17th century, but never finished. On the same side (left) lies the village of Irrlich, connected by an avenue of poplars with the town of

HOTEL ZUM GOLDENEN ANKER.—The best in the town, and deservedly recommended.

MORAVIAN HOTEL; WILDER MANN.

Population 7,300. Capital of the mediatized principality of Wied, in Rhen. Prussia. Over the river is the Prince's *Palace*, whose collection of very interesting Roman antiquities (chiefly from the buried city of *Victoria*, near Niederbiber, a village 2 miles to the N.), has been transferred to New York. The Museum of natural history is in the Pheasantry, (Faisanerie Gebaude,) and consists for the most part of collections made by Prince Maximilian of Neuwied, during his travels in Brazil and North America. A distinct quarter of the town is occupied by *Moravian brethren*, whose schools and workshops are worth visiting.

The chateau of Monrepos, with its park and gardens, 6 miles N.N.E., is a very pleasant excursion. Neuwied has also a flying bridge over the Rhine. Rail. pp. 122, 124.

The *Castle of Altwied*, at 3½ miles distance, is a magnificent ruin, and commands a splendid view. Carriage there and back 12 m.

Weissenthurm (White Tower), on the right bank, so called from the old watch-tower which stands at the extremity of the village; on an eminence to the left of which is the memorial to *General Hoche*, erected by the "Army of the Sambre and Meuse," 1797. Here it is asserted that Julius Cæsar constructed the famous Bridge described in his Commentaries; but this is very improbable, as he makes no mention of the island in mid-channel of which Hoche availed himself in his passage.

Further on (to the left) is **Muhlhofen**, a village at the mouth of the Sayn, from which pleasant excursions may be made through the beautifully wooded valley traversed by that stream. Krupp's Iron-works here.

Kesselheim (right).—Near this are the ruins of Schönbornlust, once a palace of the Elector of Treves; famous also as the residence of the exiled Bourbon princes, and head-quarters of the army of refugees during the Revolution.

Near the junction of the Moselle and Rhine stands the monument of General Marceau (1796).

Neuendorf.—In Rhen. Prussia. Here the smaller timber-rafts from the Upper Rhine and its branches, as also from the Moselle, are formed into the great rafts which go down to Holland.

Long before the steamer approaches Coblenz the fortress of *Ehrenbreitstein* is visible; while, as she reaches her moorings at that city, one of the most conspicuous objects is the stately Palace of the King of Prussia, formerly belonging to the Electors of Treves, stretching along the bank of the river.

Coblenz (right).—*Stat.*— Pop. (1875) with Ehrenbreitstein, 34,191.

Coblenz, the Roman *Confluentia*, a strong garrison, 56 m. from Cologne, on the left bank of the Rhine, and right of the Moselle: capital and seat of government of the Prussian Rhine province. It occupies a large triangle, formed by the influx of the Moselle into the Rhine, and has an old stone bridge over the Moselle, from which a charming view is obtained. On the opposite bank of the river is the rocky fortress of **Ehrenbreitstein**, (the "broad stone of honour"), called the Gibraltar of the Rhine, with a little town at its foot, containing 4,901 inhabitants, and connected with Coblenz by a bridge of boats 455 paces in length. The view from the summit of the fortress extends as far as the mountains of Lorraine, and amply repays the ascent. (tickets, 50 pf., issued at foot of fortress). The old *Archbishop's Castle*, near the Moselle bridge has been occupied by several Emperors. The venerable church of *St. Castor*, at the confluence of the two rivers, conspicuous by its four towers, dates from 836 and is close to the Kaufhaus with its well-known clock-work figure. Here the grandsons of Charlemagne met to divide amongst them their splendid inheritance into France, Germany, and Italy. Here also, Edward III. of England was installed Vicar of the Empire by Lewis of Bavaria. In the open space before the church stands the celebrated *Monument* erected by the French in 1812, to commemorate their ill-fated expedition against the Russians. A sarcastic addition to the inscription by the Russian General St. Priest, records that it was "seen and approved" by him as Russian Commandant of the town, 1814. At the *Elector's Palace* (built 1786) are portraits, etc.

The fortifications of Coblenz are of vast extent, and rank amongst the strongest in Europe,—of

these. Ehrenbreitstein is the most remarkable: it is said, the enormous sum of £1,860,000 has been expended on these stupendous works, of which 15,000,000 francs was extracted from France after the Revolutionary war. A quarter of a mile from the Moselle bridge, on the road to Andernach, and sheltered by the lofty walls of Fort Franz, stands the pyramidical monument to the young Republican General, *Marceau*, who was killed at the battle of Altenkirchen in 1796. Additional interest attaches to this spot as the last resting place of a vast number of French soldiers who died during their captivity 1870-71.

Hood, in 1835-7, lived at Castor Hof and Alten Graben, and here wrote his "Up the Rhine." The beautiful Rhine Anlagen, or, as they are familiarly called, "the Queen's Gardens," owe their existence to the taste and liberality of the Empress Queen, who frequently resides in Coblenz; the lime walks extend from the town almost to the adjacent hydropathic establishment at Laubach. A military band plays once a week on the Anlagen.

CHURCH OF ENGLAND Service, in the chapel of the Palace, by a resident Chaplain, Rev. E. Godfrey, M.A., supplied by Col. and Capt. Ch. Society.

In the *environs* of Coblenz are Moselweiss, a pretty village buried in cherry orchards, and much resorted to; Lahnstein, on the left bank of the Rhine; Sayn, with its ruin and modern chateau; the abbey of Rommersdorf; the *Kühkopf*, the highest hill near the town, and commanding a most magnificent view; the fine plateau of the Karthause, separating the Rhine from the Moselle, and on which many thousand French prisoners were encamped during the late war. More distant are the romantic castle of Elz, to which a visit is strongly recommended; the abbey and lake of Laach; the castle of Marksburg, a well preserved stronghold of the middle ages; Ems and Nassau.

CONVEYANCES—There are Two stations, the Rheinische and Staatsbahnhof; the latter for the Moselle line and through trains up the Lahn valley. Ems may be reached in less than an hour by train, or by taking the 2.30 p.m. steamer to Lahnstein. Steamers several times daily to Biebrich (Wiesbaden), Mayence, and Mannheim, also to Bonn, Cologne, Emmerich, and Rotterdam. Steamers also ascend the Moselle as far as Treves every alternate day at 6.30 a.m. during the summer months. Numerous trains to Bonn, Cologne, Bingen, Mayence, &c. See pp. 122, 124.

Horchheim, (left)—the last village before entering Nassau.

Stolzenfels, a fine castle of the middle ages, on a projecting rock overlooking the Rhine and the village of **Cappellen**, (*Stat.*, p. 122), the property of the Dowager Queen of Prussia. It was presented by the city of Coblenz to the late King William IV. when Crown Prince, by whom it was judiciously restored. Here Queen Victoria was entertained in 1845 by the King, and asked the question, 'How do you like the Rhine?" Admission is readily granted. The view is magnificent, and embraces the lovely valley of the Lahn, the confluence of that river with the Rhine, Coblenz and its gigantic fortifications, with the mountains of Andernach in the distance.

There is a ferry from Stolzenfels to Lahnstein, and another over the mouth of the Lahn; up the right bank of which a railway runs to Ems (see section "Prussia"). On a hill at the mouth of the Lahn is the restored castle of Lahneck.

Oberlahnstein, in Prussia, (left). — *Stat.* — HOTEL:— DIE LAHNECK.

An old walled town, with a conspicuous red building at the river's edge, once a Castle of the Electors of Mayence. At the white chapel among trees, in 1400, the deposition of the Emperor Wenceslaus was pronounced by the Elector. Victoria Fountain, a spring like Selzer water, was opened 1880.

Another ancient little town, at the entrance of the valley that winds round the Marksburg, with a fine old castle. Copper and silver mines in the neighbourhood: and a road to Ems from this place.

Boppard (right).—*Stat.*—Population 6000.

HOTELS:—RHEIN HOTEL; SPIEGEL.

An ancient walled town in Rhen. Prussia—the Roman *Bodobriga*, one of the 50 castles of Drusus, in a beautiful part of the Rhine. The walls of the castrum, a quadrangle of strong masonry, still exists in the heart of the town. In it are the remains of the Palace of the Frankish kings, and the ruins of a fine chapel. Boppard was once the seat of the *Rhine Toll*, for protecting the river trade. Many new villas have lately sprung up here. It has a Romanesque Church of the 12th century, and a Protestant Church, built 1851, where English Church Service (S. P. G.) is held in the season. Behind the town is the ancient nunnery of **Marienberg**, now a Water-cure. The Mühlbad is another. The Rhine here makes one of its most considerable curves. Rail. p. 122.

Salzig (right), an agreeable village, with large plantations of cherry trees. Opposite (left), on the twin peaks of a lofty rock, near Camp, are the ruins of Sterrenberg and Liebenstein, called the *Two Brothers*, and the subject of a legend. At the foot of the steep mountain, in a narrow valley, is the village and ancient convent of Bornhofen.

In **Ehrenthal** (left), are silver, lead, and copper works, whose annual produce is 100,000 florins.

Welmich (left), a little village with a fine old church, at the foot of the mountain on which stands the *Castle of Thurmberg*, called "the Mouse," now fast falling into ruin; the walls are, however, still perfect.

a strong fortress; now a picture of desolation. Opposite is the pretty village of St. Goarhausen. Above this point a narrow defile confines the river, where there used to be rapids, which have now almost disappeared. On the left is the precipitous rock of Lurlei, or the **Lurleiberg**, a good point of view, with an echo which repeats 15 times; and a little higher, in mid-channel, are discovered the rocks called the *Seven Sisters* (Sieben Jungfrauen).

The immense stronghold of Rheinfels was built in 1245 by a count of Katzenelnbogen. It became afterwards in the hands of the Landgrave of Hesse, a modern fortress which baffled the French in 1692, but was taken and blown up by them in 1794.

St. Goar is a sojourn for excursions to some of the finest of the Rhine scenery. Ewelish Church Service (C. C. C. Soc.), in summer. There is also a salmon fishery near the rapids. Rail. p. 122. Across the river is

St. Goarhausen (left)—*Stat.*—In Nassau.—Pop. 500.—Hotel Adler.

Still partly surrounded with its old walls. Here begins the *Forstbach*, or Swiss valley, celebrated for its beauty, being traversed by a clear stream, forming numerous cascades between precipitous masses of rock. At the entrance of this valley stands the *Cat Castle*, a very picturesque object in the landscape. An excursion well worth taking is that to the ruined Castle of Reichenberg, at a distance of a mile and a half inland.

Oberwesel. (right) *Stat.*—Hotels:—Rheinischer Hof; Teutscher Hof.

The *Vosdeis* of the Romans; a small town of 2500 inhabitants very interesting to visit, and delightfully situated. The Church of Our Lady is considered a model of the Gothic style; in St. Martin's is a "Descent from the Cross," by Diepenbrock. The picturesque appearance of this town is much increased by its turreted walls and the lofty round tower called Ox Tower, at the water side. Rail. p. 122. The village of Engehölle is worth a visit, as also are the ruins of *Schönburg Castle*, the birthplace of Marshal Schomberg, killed at the battle of the Boyne, 1690.

Caub or **Kaub** (left)—*Stat.*—H. Nassauer Hof.

A small town, above which, on a rock, are ruins of the *Castle of Gutenfels*. In the middle of the river, between Caub and Bacharach, is a well-preserved old Castle, called the Pfalz, built by the Emperor Lewis of Bavaria for a toll-house. In the lateral valleys are extensive slate-quarries.

Bacharach. (right).—*Stat.*—Hotel Post; Hotel Wasum and Pension. Pop. 1800.

A busy place, in Rhenish Prussia, formerly the entrepôt for the fine Rhenish wines, which were named on this account "the wines of Bacharach." In the Rhine, when the water is low, a large stone appears, called the Altar of Bacchus (Bacchi Ara)—hence the name. Here Blücher crossed, 1 Jan., 1814. Notice the Church of St. Peter, of the 12th century; the ruins of the *Castle* of Stahleck, with its truncated walls, on a high hill behind the town; and the town walls, with twelve towers of peculiar construction. Rail. page 123

Lorch (left)—*Stat.*—Pop. 1800. Hotel Schwan.

One of the oldest towns on the Rhine, situated at the embouchure of the *Wisperbach* in the entrance of its picturesque valley, rich in legends of sprites, dwarfs, and giants; leading through Geroldstein and Langensei fen to Schwalbach, a walk of five hours. On the right bank of the Wisp is a rocky eminence called the Devil's Ladder, with the ruins of *Nollingen Castle* on its summit. Above the village of Rheindiebach stand the round tower and broken walls of *Fürstenberg Castle*, devastated by the French in 1687. The Church is a handsome relic of the 12th century; in front of it is a carved stone cross dated 1491. Rail. page 128.

As we approach Bingen and Assmannshausen, the picturesque monuments of the old iron times become still more numerous.

One of them called the *Rheinstein*, was restored and fitted up in the antique style for a summer residence of Prince Frederick of Prussia, who is buried here. It stands upon a projecting cliff, rising almost perpendicularly from the water side. Opposite to this is the village of

Assmannshausen (left), *Stat.*, in Nassau; with a warm mineral spring Hotels: Krone Crehaus. The fine red wine of that name is produced from the vines here, which are cultivated on such steep heights as to require baskets and other contrivances to secure them in their places. Some of the terraced heights are one thousand feet above the river.

One of the finest views in the whole course of the river may be obtained by ascending to the *Rossel*, a little tower on the edge of the heights above Assmannshausen. From this village also may be made the ascent of the Niederwald.

The picturesque gorge of the Rhine, the commencement of which is above Boppard terminates near here. The *Bingerloch* obstructed for a long time the navigation of the Rhine, but the passage was widened to 210 feet—ten times its former breadth—by the Prussians, in 1830–32; and the fragments, taken from the river bed by blasting, were formed into a monument on the road side to commemorate the work. This channel is near the right bank, and overlooked by the ruins of the fortress of Ehrenfels.

On the right, and adjacent to the influx of the Nahe, is an islet, with a ruin of the *Mäusethurm* (Mouse Tower), the scene of a tradition, which Southey gives in his ballad of Bishop Hatto.

Bingerbrück or Bingen (right)—*Stat.* Pop. 7000.—Hotels: Hotel du Cheval Blanc, opposite the monument "Germania." See Advt. Hotel Victoria.

In Hesse Darmstadt, in an angle of the beautiful valley of the Nahe a market for corn and wines, much frequented by strangers. Here, where the fertile Rheingau begins, the river makes a considerable curve, and the scenery around is in the highest degree attractive. The ruins of Klopp Castle, on the *Drususberg* (once a Roman fort) afford a favourite promenade and a view from the tower of the celebrated *Nahethal*, and the environs as far as the Donnersberg.

An agreeable tour may be made to the Rochusberg and its Chapel, from whence there is a prospect of extraordinary beauty; as also on the Nahe to Kreuznach and Oberstein. Opposite Bingen, on the right of the Nahe, stands the *Rupertsberg* and, about a mile and a half distant, the Elisenhöhe, from a house on which there is another magnificent view. An excursion to Rüdesheim (another wine place), and to the heights of the Niederwald is also recommended. From Rüdesheim, on the opposite bank of the Rhine, the railway is open to Wiesbaden, Castel, and Frankfort; see p. 131, also to Ems and Nassau see p. 129. Consult Time Tables before crossing per Steamer from Bingerbrück to Rüdesheim. The trains do not await arrival of steamer, if 10 minutes behind time; it is safer and more agreeable every way to proceed by the left bank of the river. From Bingen (Bingerbrück) by rail to Kreuznach, see p. 125. To Coblenz, Bonn, and Cologne, p. 123. To Mayence, p. 126. Away from the Rhine to the right, is

The waters are highly beneficial in scrofulous diseases. There is a Kurhaus and adjacent beautiful gardens and fine old forest trees. A good Band performs in the early morning, and from 4 to 6 and 8 to 10 p.m. Carriages, horses, donkeys, and boats to row on the river Nahe, including canoes, can be had. Munster is a quiet spot in a picturesque country, and offers attractions; including the ruined *Castle of Ebernburg* (good hotel), with beautiful views, where Luther stopped for a time; the Huttenthal, the romantic ruins of Alten Baumburg. The baths at Munster-am-Stein are very efficacious, especially in the case of children; they are chiefly saline. 2. On the left will be seen a beautiful panorama of the Rhine; the château and vineyards of Johannisberg, and the castle and park of Biebarich; further on, the town of Mayence, and opposite Bingen, at the junction of the Nahe with the Rhine, the view of the ruin of Ehrenfels; and lastly, the Bezauberte Höhle (magic cave), whence there are miniature views of three different landscapes, so exquisitely beautiful, as to elicit the greatest admiration. Returning from this excursion, a draught of the Rüdesheimer, Rottland, or Hinterhausen wines, will be found a luxury.

Mayence (the Roman *Moguntiacum*), 22 m. from Frankfort, since the campaign of 1866 has become one of the most important Prussian fortresses. The *Cathedral* dates from 978, and has several good monuments; it is built of red sandstone, peculiar architecture, and very picturesque style. The restored interior is embellished with gilding and frescoes.

In the old Electoral *Palace* are the Museum of Roman antiquities, the finest perhaps in Germany; paintings; large cabinets of natural history; coins and medals; model of a double bridge, intended to have been built by Napoleon over the Rhine; the astronomical clock by Alexius Johann, one of the most scientific pieces of mechanism extant; also the town library, (open daily excepting Saturday and Sunday) containing about 100,000 vols., manuscripts of 10th century downwards; the first psalter of *Gutenberg*, inventor of printing, who was born here, 1397. His bronze *Statue* after Thorwaldsen, stands in Guttenberg Platz; the site of his house, in Emmerans Gasse, is now a literary club. A monument of Schiller, is in Schiller Platz, near the Käthrich and St. Stephen's church (a fine view). For the *Tomb of Drusus*, in the Citadel, an order is requisite. On Wednesday afternoon from 2 o'clock, much company is attracted from Wiesbaden, &c., by the performance of the regimental bands in the public Gardens. A fine view is had here of the Rhine, with the Taunus mountains in the distance, and of the Main; on the right bank of which, about three miles off, are the Hochheim vineyards producing the celebrated Hock. Notice the Markets and Hotel de Ville. There existed a convent of Capuchins the *Church* of which is called the Liebfrauen Kirche, erected in the 14th century. Baden-Baden, the Roman *Aurelia Aquensis*, in the Duchy of Baden, 2 m. from Oos station, 9 m. from the Rhine, and 18 m. from the capital, Carlsruhe, is romantically seated on the Schlossberg, a slope above the Oosbach, and among the lower hills of the Black Forest; which are 1,000 ft. to 2,000 ft. high, and covered with tall dark pine trees, contrasting well with the meadows below. The thirteen Hot Springs (Ursprung being the chief one) have a temp. of 115°.0 150° F., and are good for rheumatism, gout, and stomach complaints. Here are the Bath House; Trinkhalle, or Pump Room, with fresco by Götzenberger; the handsome Conversationshaus and Reading Room, surrounded by pleasure-grounds (entrance 50 pf., or 8 marks for 10 days); with a Theatre. Hospital; English Church, and Greek or Stourdza Church. The Pfarrkirche (parish church) of the 15th cent., has monuments of the Margraves of Baden from 1431; including Lewis, a great soldier of Pr. Eugene's day. A statue of Grand D. Leopold (1852) stands in Leopolds platz.

Friedrichsbad, or the New Bath House, near the parish church, is a large and handsome building (1877), a model of its kind, supplied with hot, cold, vapour, swimming baths, at moderate charges; and a Hall for promenades (20 pf.). Medical Inspector, Dr. Heiligenthal.

Except Carlsbad in Bohemia, Baden is the most fashionable lounge in Europe standing in a delightful spot, sheltered in summer, warm in winter, abounding in lovely walks and drives with good fishing and shooting. About 50,000 visitors come in the season, from July to Sept., attended by concerts, dramatic performances, balls, &c. Races take place in September. The time for drinking the waters is between 6½ and 7½ a.m., when the band plays from a pavilion. The avenue leading to the Conversation House is a bazaar, filled with stalls of traders from Switzerland, the Tyrol, and Paris; where people meet at the end of the day to take coffee, ices, etc., and listen to the band.

Notice Villa Lembourg, which was occupied by Queen Victoria 1872, and again in 1876. The High Rocks (Die Hohe Felsen), are within 10 minutes' walk of the fine Old Castle (Das Alte Schloss) an hour's easy walk or drive from the town. This Castle, now a ruin, was the first seat of the Margraves. Their Neue Schloss (begun 1469) is the Grand Duke's summer residence: its gloomy dungeons are shown. His hunting seat, La Favorite, is 6 m. distant, near Oos.

WALKS AND DRIVES.—To Lichtenthal Convent (1½ m.) and the Orphanage founded by Baron Stultz, the tailor, under the Cadlienberg; and to the Geroldsau Waterfall, near Beuren. Further off (3 m. to 7 m.), is the Staufenberg, or Mercuriusberg (2,200 ft. high), where an altar to Mercury was found; and thence to the Devil's Pulpit and the Roman tower of Ebersteinburg. Another Roman tower stands on the Yburg. A more distant excursion is the Murg Thal or valley of the Murg, a river flowing down to the fortress of Rastadt, through some romantic scenery, among precipitous heights covered with fir forests. Amalienberg Castle, commanding a fine prospect of the valley, is Dr. Hudler's educational establishment, for the sons of English and American families. It is under the patronage of the Grand Duchess, and was visited by Prince Leopold, 1875. Beyond it are Gernsbach, and Schloss Eberstein, containing an armoury and pictures. Still further off are Wildbad, Achern, Allerheiligen, etc.

CONVEYANCES:—Railway, see pp. 64, 132, 134.

There are several entrances into that part of the Grand Duchy of Baden which goes under the name of the Black Forest, justly called one of the most interesting districts of Western Germany. The scenery is wild and romantic, and the views from its mountains extensive. The population is remarkable for primitive manners, idiom, and costume. They make clocks, watches, toys, jewellery. Dresden, 109 m. from Berlin, is the capital of the kingdom of Saxony and a favourite residence of English people, celebrated for cheap living, cheap good music, and works of art. It stands on both banks of the Elbe, which are united by two beautiful Bridges, 552 yards long, (a third is in progress); and consists of the Altstadt on the left bank, and Neustadt on the right bank. The best *Shops* are in the Schloss-Str. and Alt and Neu Markts, or Old and New Markets. The fine Bruhl Terrace, near the Old Bridge is ¼ ml. long. Among the *Statues*, are Fred. Angustus at the Zwinger; Fred. August, II. in the New Market; Electress Anna at the Fountain, near the Annen Church; Körner (a native) in George Platz; Weber, near the *Hof Theatre* or Opera House. This last is a large and handsome new building by Semper, rebuilt since a fire in 1869; having statues of Göthe, Schiller, Mozart, etc. By way of Ostend and Cologne Dresden may be reached in 38 hours. The traveller should visit The Saxon Switzerland (as below).

A week or fortnight may be most pleasantly passed in Dresden; and, unlike most continental towns, the principal places of resort are at easy walking distances. The abundance of cheap good music is remarkable; for 6d. an excellent concert may be heard; 16 or more musical selections are given at the Belvedere Café for the small sum above named. Good skating in winter. Mean temperature 28° (January) to 66° (July). Lat. 51° 3′ N., long., 13° 44′ E.

The *Zwinger*, founded by Aug. On the north side is the *Museum*, built 1854, by Semper, with sculptures by Rietschel; which includes Paintings, 350,000 Engravings (a rich collection — besides Drawings) and numerous Casts of the best statuary. Among the *Paintings* (2,400) which are in 13 Halls, and many side Cabinets, are Raphael's "Madonna di San Sisto," Titian's "Tribute Money," Correggio's "Notte" (Adoration of Shepherds), and 50 by Canaletto; with many pastel portraits and miniatures. The Museum Johanneum contains the Historical Museum and the Porcelain collection. *Japanese Palace of* Aug. PRUSSIA.

PRUSSIA—formerly a duchy, now an extensive kingdom of the first rank and head of the German Empire—was formed on the ancient electoral possessions, as a nucleus, by means of successive territorial acquisitions made at the expense of her neighbours after many costly wars, particularly in Poland, Westphalia, and the Rhine. It had for its original inhabitants the Slavi, or Sarmatæ, on the E. and N.E.,—the Vandals on the shores of the Baltic, to the N. of Pomerania—and the Suevi (who give name to Swabia), in the remainder of the kingdom. Her part in the campaigns of the earlier portion of this century is well known, especially in the campaigns of 1814 and 1815. At the Congress of Vienna (1814), Prussia had secured to her the restitution of the provinces formerly wrested from her, excepting part of Poland, united to the Duchy of Warsaw; and for this small sacrifice she was amply indemnified by the concession of such territories in Saxony and the Lower Rhine, as were deemed consistent with the stability and security of the balance of power in Europe. And thus we behold Prussia, after a series of unparalleled changes in another direction, again taking her station among the first sovereign states of Europe, as firm and stable as in the days of Frederick the Great—and with a territory and population far exceeding any thing he could boast of. Her political supremacy as head of the German nation, under the leadership of Bismarck, was furthered by the victory of Sadowa or Königgratz, 3rd July, 1866, against Austria; confirmed by the astonishing events of the war of 1870-1 against France (see p. 349); and consummated by the election of King William as German Emperor at Versailles, on 18th January, 1871.

William I., German Emperor and King of Prussia, was born 1797 (son of Frederic-William III.), married 1829 and has issue, Frederic-William, Prince Imperial and Royal, born 1831, and married, 1858, to Victoria, Princess Royal of England.

German Empire, as finally settled in May, 1871, comprises 26 States, in the order of precedence indicated by the *numbers* and divided into North and South Germany by the River Main, as follows:—**North German States.**—1, Kingdom of Prussia. 3, Kingdom of Saxony. 7, Grand Duchy of Mecklenburg-Schwerin. 8, Grand Duchy of Saxe-Weimar-Eisenach. 9, Grand Duchy of Mecklenburg-Strelitz. 10, Grand Duchy of Oldenburg. 11, Duchy of Brunswick and Luneburg. 12, Duchy of Saxe-Meiningen and Hildburghausen. 13, Saxe-Altenburg. 14, Duchy of Saxe Coburg and Gotha. 15, Duchy of Anhalt. 16, Principality of Schwarzburg-Rudolstadt. 17, Principality of Schwarzburg-Sonderhausen. 18, Principality of Waldeck and Pyrmont. 19, Principality of Reuss (Elder line). 20, Principality of Reuss (Younger line). 21, Principality of Schaumburg-Lippe. 22, Principality of Lippe-Detmold. 23, Free Town of Lübeck. 24, Free Town of Bremen. 25, Free Town of Hamburg. 26, Alsace-Lorraine, annexed to the Empire, 1871. **South German States.**—2, Kingdom of Bavaria. 4, Kingdom of Würtemberg. 5, Grand Duchy of Baden. 6, Grand Duchy of Hesse-Darmstadt. The Imperial Parliament consists of a Bundesrath of 58 delegates from the respective States, and a Reichstag of 382 members elected by ballot. IMPERIAL REVENUE (1880) 2·½ millions sterling, chiefly from Salt, Tobacco, Spirits, Customs, Post, and Telegraphs; Debt 12 millions. NAVY—70 steamers, 19 being iron-clads. ARMY—420,000 in peace; and nearly 1,300,000 in war; in 18 corps. RAILWAYS, 1878, about 19,650 miles. TELEGRAPHS, 37,260 miles.

Population.—Total of the German Empire (1876), 42¾ millions; of whom 30½ millions are in North Germany; 25¾ millions belong to Prussia. 1¼ million to Alsace-Lorraine; 25½ millions are Protestants, and 14⅝ millions Catholics. This is exclusive of 10 million Germans in the Austro-Hungarian Empire, now shut out from the new political Germany. Area 216,000 sq. miles.

The **Kingdom of Prussia** is situated in the northern part of Germany. It is bounded on the N. by the Baltic Sea, Denmark, and the Duchy of Mecklenburg; on the E. by Russia and Poland; on the S.E. by Austria; on the S. by Saxony and the Saxon Duchies; on the S.W. by Bavaria and part of France; and on the W. by France and the Netherlands. Previous to 1866, some parts of the kingdom were small detached portions, entirely insulated by the dominions of other powers. There was no communication between the eastern and western provinces, without passing through the States of other princes. It is now more consolidated; and is divided as follows:—Prussia, Posen, Brandenburg, Pomerania, Silesia, Saxony Westphalia. Pop. (1875), 25,742,662, and the area in square miles 137,000. Revenue (1879), 35½ millions sterling; Debt, about 55 millions. The Government is a Constitutional Monarchy since 1850. The State Religion called *Evangelical*, is a fusion of Lutheranism and Calvinism. Its surface is generally flat, except a part of the Harz Mountains, in the province of Saxony. The volcanic districts in it are the Lower Rhine, and the Riesengebirge, on the S.W. confines of Silesia, and some other mountains in Westphalia. Along the Baltic the winter is long. It is also severe in Silesia, contiguous to the Carpathian Mountains.

Commerce.—Exports consist principally of corn, wool, timber, Westphalian hams, zinc, flax, bristles, salted provisions, and other articles of raw produce; with linen and woollen cloth, silk wares, iron and hardware, jewellery, watches, and wooden clocks; Prussian blue, spirits, beer, &c. The Imports are sugar, coffee, and other coloured products; raw cotton, and cotton twist and stuffs, indigo and other dye-stuffs, &c. Of late years the steel manufacture of Prussia has risen to high importance, besides the manufacture of locomotives; and the cotton manufactures of Elberfeld are far ahead of France, and almost equalling those of England. The steel works of Krupp, at Essen in Westphalia, are of world-wide reputation. A Zollverein, or Customs Union, comprises the States

of the Empire and Luxemburg. The Imports and Exports from and to England (1878) are 29 and 23½ millions sterling.

Education.—In Prussia, the State imposes on all parents the strict obligation of sending their children to school, unless they can prove that they are giving them a competent education at home. Neglect of this duty exposes the parents or guardians to imprisonment or fine. German is spoken by all, except some Polish peasants in Posen.

Custom-House.—(*Zollhaus.*)—Baggage examined at the frontier places of Aix-la-Chapelle, Cologne, Emmerich, Eydtkühnen, Kaldenkirchen. The search is strict, but the officers are civil and alert.

Money.—See page 432, for New Imperial German System. Up to 1872 the Monetary System in North Germany (as above) was as follows: 12 pfennigs=1 Silber groschen=1d. 1-5th; 30 Silber groschen=1 Thaler=3s. In South Germany (as above) the system was as follows:—1 kreuzer=¼d.; 60 kreuzers=1 florin=1s. 8d. In North Germany the Old Bank Notes were 1, 5, 10, 25, 50, and 100 Thalers; and for 1, 2, 5, 10, 25, 50, and 100 florins in South Germany. The New Imperial Bank Notes for the whole of Germany are for 100, 200, 500, and 1000 Reichsmarks, or a multiple of 1000 Reichsmarks. Sovereigns usually pass for 20 m. at the hotels; but they will sometimes give 20 m. 20 pf. In London, the changers give 20 m. 30 pf.

Railways.—Admirably managed; the fares are low; the carriages elegant and convenient; and the train service is excellent. The 1st class carriages are scarcely ever used; 2nd class throughout Prussia being fully equal to the best 1st class carriages in England. Non-smokers and ladies will find reserved compartments. The fares for the four Classes, generally speaking, double their rates from the lowest to the highest.

Post Diligences.—(*Eilwagen.*)—These are Mail Coaches, conducted by government officials. All the seats are numbered. Rate of travelling 6 miles per hour; 30 lbs. of luggage may be taken free of charge, and 20 lbs. more if paid for. Every package must have name of owner, and place to which he is going. No outside passengers. Throughout the whole German Empire (Wurtemberg and Bavaria excepted, where the rate is less by about two-fifths), the Fare by Diligence and Post-coaches is 10 pf. per Kilometer, or 1½d. per English mile.

Measure.—German Mile, 8,096 yards, or 4½ miles English but railway distances in Germany and Austria are now measured by the Kilometer of 1094 yards—6-10ths of an English mile.

Electric Telegraph.—Telegram to U Kingdom, 4d. a word.

It has been greatly improved and embellished with good streets, and public buildings; besides a circle of open promenades on the site of the former walls, with new spreading suburbs beyond, extending towards the Friedberg and Sachsenhausen hills. One relic of the gates is the picturesque Eschenheimer Tower, built 1346-50; most of the others are modern. Some old houses are seen in the Zeil, and on the Quay, &c. Four or five Bridges cross the Main (here 200 yds. broad), inclusive of a suspension bridge and a railway viaduct. The *Old Bridge*, built 1342, has a modern statue of Charles the Great (Charlemagne), and leads to Sachsenhausen and the House of the Teutonic Knights. The *Kursaal*, the great attraction, contains splendid banquet and ball-rooms, and reading rooms all filled with visitors, and forming a *tout ensemble* not exceeded in Germany.

On each side of the Kursaal are colonnades of handsome shops, serving as a promenade in wet weather, and a bazaar during the whole season. Behind is a beautiful garden, where the band entertains visitors, while they sip their coffee, or indulge in a cigar. There are numerous *Springs* (known to the Romans as *Aquæ Mattiaci*) all over the town; the principal one, the Kochbrunen boiling spring (temp. 156°), is frequented by the water-drinkers between 5 and 6 o'clock in the morning.

The great square, containing the Assembly room, is very handsome. Here are the Royal Palace; Palais Pauline, on Adolphsberg, in the Moorish style; Museum and Library; Theatre with bust of Schiller; Protestant Church R. C. Church, Synagogue, and a Greek Church, with a cross 183 ft. high, and statue of the late Duchess of Nassau. Military Hosp.; and Waterloo Obelisk, in Louisen platz.

The beautiful ENVIRONS afford excursions to points which command the finest views of the Rhine, and the valley of the Rheingau.

Wittenberg.—*Stat.*—Pop. 13,100.—INNS:—GOLDNER ADLER (Eagle); ZUR GOLDNEN WEINTRAUBE (Bunch of Grapes).

Refreshment Rooms at Station.

A fortified town in Prussian Saxony, on the Elbe, 39 m. from Berlin (not to be confounded with Wittenberge, on the Hamburg rail). In the *Schlosskirche*, which contains the tombs of Luther, Melanchthon, Frederick the Wise, and John the Steadfast, Luther's 95 Theses against the doctrine of Indulgences were posted up on the 31st October, 1517, being the commencement of the Reformation. This church was much damaged in the siege of 1814. On the market place stands the great bronze *Statue of Luther*, by Schadow, with the rhyme,—

"Ist's Gottes werk so wird's bestehen;
"Ist's menschenwerk, wird's untergehen."
(If it be God's work it will last;
If only man's, 't will soon be past).

Blake's statue of Melanchthon stands near it. An Oak tree protected by a railing marks the spot where, on the 10th December, 1520, Luther burned the Papal bulls. Numerous objects are carefully preserved in this place connected with the memory not only of Luther, but of his friends Melanchthon and the painter Cranach. Melanchthon's house is here. The ancient and renowned University of Wittenberg was in 1817 removed, and united with that of Halle. Hamlet says, "And what make you from Wittenberg, Horatio?"

CONVEYANCES.—Railway to Cothen, Halle, Berlin, and Leipsic, see pp. 152, 176, 179, 187.

AUSTRIA-HUNGARY.

(Austria, from the German *Oesterreich*, the East Kingdom.)

A widely-extended country in Central Europe, watered by the Danube, styled the **Austria-Hungarian Empire** since Hungary was allowed self-government, 1867; lying between lat. 42° and 51° N., and long. 8° and 26½° E. Bounded by Prussia and Saxony on the North; Turkey, the Adriatic, and Italy on the South; Turkey and Russia on the East; Switzerland and Italy on the West. Politically divided into two parts—the Cis-Leithan and Trans-Leithan Provinces—by the small river Leitha, or Leythe, which runs along the border (below Vienna). The **Cis-Leithan Division**, with Vienna for its capital, comprises Upper and Lower Austria Proper, Tyrol and Vorarlberg, Salzburg, Styria, Carinthia, Carniola, Trieste and Istria, Dalmatia, the Bukovina, Bohemia, Moravia, Silesia and Galicia. The **Trans-Leithan Division** (capital Buda Pest), comprises the Crown lands of Hungary, Transylvania, Croatia, Sclavonia, and the city of Fiume.

Area.—250,000 English square miles; one-half to three-fourths being hilly. **Population** (1876) 37¼ millions, of mixed races; of which 21½ millions were Cis-Leithan, 16½ Trans-Leithan; 9 millions were German-speaking, 16 Sclavonian, 5½ Hungarian or Magyar, 3½ Roumanian; 24 millions were Roman Catholics, 7 Greek Church, 3½ Protestant, 1½ Jews. Vienna has a population of 1,027,770; Buda-Pest, 270,480; Prague, 189,930; Lemberg, 87,100; but the annexation of Bosnia and Herzegovina in 1879, has added 1½ million of population, and 24,300 square miles to the Empire.

Reigning Sovereign.—Francis Joseph I., born 1830, succeeded his uncle in the revolutionary year 1848, and married 1854. His son Archduke Rudolph, born 1858, is heir-apparent. His ancestors of the Habsburg line were Emperors of Germany, from Maximilian I., 1493, till Francis II., in 1804, renounced the title and became Francis I. Emperor of Austria; remaining however the nominal heads of Germany down to the battle of Sadowa, 1866; since which Prussia has assumed the leadership, to the entire exclusion of Austria from Germany, as now constituted.

The *Cis-Leithan* Legislature consists of a Chamber of Lords and a Chamber of Members elected by the people; the *Trans-Leithan*, of a Table of Magnates and a Table of Deputies similarly returned; both Ministries being directed by the supreme government of the Emperor-King, presided over by his Chancellor at Vienna.

Revenue.—That of Austria (1879) about 40 millions with a Debt of 330 millions. That of Hungary, nearly 22 millions; Debt 55 millions. There are three distinct Budgets, a Cis-Leithan, a Trans-Leithan, and a common Budget: towards the latter the Cis-Leithan (Austrian) contribution is 7-10ths, and the Trans-Leithan (Hungarian) 3-10ths. **Army.**—Nearly 800,000; or 1 million on the war establishment. Service is compulsory. There are 25 fortresses. **Navy.**—50 vessels (11 being ironclads) of 106,000 tons and 320 guns, with 10,000 seamen, stationed at Pola, in the Adriatic.

Mountains and Passes.—Some of the finest are in the western part of the Empire, in Tyrol, &c. The Ortler Spitze in the Rhetic Alps, near the Engadine, is 12,815 feet above sea, with glaciers down to 8000 feet, and not far from the Stelvio Pass, on the borders of Italy and Switzerland, which has a carriage road across it from Glurns to Bormio, 9240 feet above sea, the highest road in Europe. Gross Glockner, above the Pinzgau, 12,465 feet high, and Gross Golling, 9383 feet high, are in the Noric Alps. The three-headed Terglou, 9370 feet high, in the Julian Alps, is near Warzen, on the road from Villach to Laibach. Brenner Pass, between Innsbruck and Botzen, on the German route to Brindisi, 4600 feet high, traversed by a rail with 23 tunnels, 100 feet below the road; the peak above being 6800 feet. Botzen is a starting point for the Dolomite region. The Dinaric Alps, on the Dalmatian coast, are 7000 feet high. Other Passes in Tyrol, Styria, &c., are the Katschberg, 5092 feet high, from Untertauern to Gmund, near the Gross Glockner; the Loibl, or Leobel, 4440 feet, in the Carnic Alps, from Klagenfurt to Villach; the Prebühl, 4015 feet high, over the Hochschwab; the Predil, 3820 feet high, from Villach to Görz; and the Semmering, a fine winding pass, with thirty tunnels and viaducts, 2890 feet high at the rail (the mountain being 4420 feet), between Gloggnitz and Mürzzuschlag, on the line from Vienna to Trieste. In the N. and E. provinces are the Böhmerwald, the Erz (or Metal), the Riesen (Giant), or Sudeten mountains, in a continuous chain, 5330 feet high, at the Schneekoppe, in the Riesen section. These are connected with the Carpathian or Krapack Mountains, which are 9530 feet at Mount Bucsecs, or Butschetje, Transylvania, and 8700 feet at M. Lomnitz, in the Tatra group, and embrace the great plain of Hungary in a semicircle.

Rivers.—Next to the magnificent Danube are the Theiss, Marosch or Maros, Drau or Drave, Sau or Save, Adige in Tyrol; Moldau, a feeder of the Elbe, in Bohemia; the upper part of the Dniester, in Galicia; and the Waag or Hungarian Rhine. **Baths.**—Baden (near Vienna), Carlsbad, Franzensbad, Gastein, Ischl, Marienbad, Teplitz, Buda-Pest, and Mehadia.

Products.—The country especially Hungary, is rich in grain, sheep, cattle, and fine timber, over one-third of the whole surface. It yields iron, copper, lead, silver, and other metals; coal, rice, potatoes, beet-root, wine, silk, and wool; with salt and tobacco, which are government monopolies. The eagle, wild boar, deer, bear, wolf and heron are found. Hungarian **Wines** include Red from Buda, Karlowitz, &c., and White from Bösing, &c., with Tokay, a liqueur.

Commerce.—Value of Exports and Imports (1877), 102½ millions sterling; of which only 2½ is with England. At Trieste, the chief port. 16,800 vessels of two and a half million tons, cleared in and out in 1878. Fiume, further down the Adriatic, is the chief port of Hungary (Croatia).

Routes.—**London to Vienna and Trieste,** see Through Routes, p. 7. See pages 205 and 253 for the Innsbruck and *Brenner Route*. **For Routes through the Tyrol,** see pp. 11 and 484. **London to Vienna,** via Munich, Salzburg, Ischl, Gmunden; and Linz, a beautiful Route, taking in the *Salzkammergut Tour*.—For this, leaving the main line at Lambach, proceed by branch to Gmunden by steamer on the Traunsee to Ebensee; thence to Ischl, Hallstadt, &c. For **Vienna, through the North of Europe and Berlin,** the Harwich, Grimsby, and Hull boats to Rotterdam, Antwerp, or Hamburg, may be taken. See Advertisments. **Baggage** is examined at the frontier places of Aia, Bodenbach, Cormons, Eger, Görz or Goritz, Haist in, Nabresina, Oderberg, Salzburg, Teschen.

Railways—About 11,360 mls. (1878); a great extension having taken place of late years. Even the *Alpine districts* and the provinces of Salzburg, Styria, and Tyrol are well provided for; and the tourist in search of the picturesque will find either on or within a few miles of the iron road, some of the grandest scenery in Austria. The lines over the Brenner, from Salzburg or Hallein; from Vienna by the Semmering Pass to Trieste; from Brixen *via* Villach to Bruck, Marburg and Laibach; from

Karlstadt to St. Peter; from St. Michael to St Valentin; and the route from Gmunden to Ebens (by steamer), are surpassed by none for magnificence of scenery. **Telegraph**, 30,000 mls. Telegram to U. Kingdom—from Austria 4½d. per word; from Hungary 5d.

The 2nd class carriages in Austria are like those of Germany, superior to those in England, fare for the 4 classes per English mile being 1.8d.; 1.35d.; 0.9d.; 0.45d. On many of the newly opened lines and by the slow trains on some of the old lines, the fares are very much less. There is a government tax of 2 per cent on all railway tickets, but this tax can never exceed 15 kreuzers (3d. sterling).

Postage.—To any part of Austria or Germany, 5 kreuzers; to U. Kingdom 10 krs. per ½ oz. Post Cards to U. Kingdom 5 krs. Money Orders, see page xlvii.

Hotels.—Rather inferior to, and more expensive than those of Germany. A table d'hôte is almost unknown, and at Vienna meals are generally paid for at the time, and not included in the Bill.

Passports.—See pages xlix to li

Money.—100 new kreuzers = 1 new florin = 1s. 11½d. Paper is the chief medium of payment. Average value of paper florin, 1s. 10d. sterling, or 11 florins to the £1 sterling. Gold Coins: 8 and 4 florins = respectively 20 and 10 fr., or 15s. 10d. and 7s. 11d. sterling. Silver Coins: 2, 1, ½ florin = respectively 3s. 11½d., 1s. 11½d., and 5½d. sterling; also, silver pieces of 20 and 10 kreuzers. Copper Coins: 1 and 4 kreuzers = respectively 4-5d. and 2-5d. sterling. Bank Notes: 1, 5, 10, 100 and 1000 florins. Bank notes pass current in all the Austrian dominions, and are very convenient.—[See *The Merchant's Handbook.* By W. A. Browne, LL.D. London: Stanford.]

Navigation of the Danube.—The Steamers of the Imperial Austrian Danube Steam Navigation Company, descend the Danube, from Donauwerth to Regensburg in one day; from Passau to Linz, in four hours. From Linz to Vienna, in seven hours. From Vienna to Galatz and Constantinople, in about five days. That part between Galatz and Constantinople is done by the Austrian Lloyd boats from Trieste. The ascent takes much longer time, and ought not to be attempted. The Steamers are good. The **River Danube** (German *Donau*; ancient *Danubius* and *Ister*), the largest river of Central Europe, drains parts of Germany, the Austro-Hungarian Empire, Turkey and Roumania. It rises above Donaueschingen in two heads, near Furlwangen and Villingen, among the Suabian Hills of the Black Forest, 24 miles from the banks of the Rhine, 2900 feet above the Black Sea, and 1800 miles from its middle mouth at Sulina. The Inn, another head, rises at the Bernina Pass. *Scenery*—The best parts above Vienna, are the defiles at Weltenberg near Regensburg; at Passau where the Inn joins; the bends called Strudel and Wirbel, near the Hausstein; Mölk Convent and Aggstein Castle; and Dürrenstein Castle, or Tyrnstein (belonging to Prince Stahremberg), where Richard Cœur de Lion was confined. Above Passau are Donaustauf and the Walhalla; and above Donauwerth is Blenheim. Tuttlingen to Friedlingen is compared to the lower Wye. Below Vienna, the scenery is for the most part flat and uninteresting; except about Komorn, where the Waag or Hungarian Rhine comes in; at Buda-Pest, the capital of Hungary; in the mouth of the Drave, at Peterwardein; and the defiles and rapids about Moldova, Kazan, the Iron Gate, and Trajan's Bridge, between Basiasch and Widdin, under the Little Carpathians. Direct Railway communication from the west extends to the Black Sea. Ice is seen from November to May. The mouth in the Black Sea is kept clear by a mixed Commission.

They are named after Dolomieu, the French geologist, and consist of soft, yellowish, slaty limestone, without a tree, rising into fantastic peaks and spires, and threaded by narrow, deep cracks or passes. Vienna (the Emperor's city, "Kaiserstadt" as it is called in Germany,) lies on the right bank of the Danube (Donau). The canal of the Danube divides the city from the suburb Leopoldstadt. The little river Wien, from which the city receives its name, separates it from the suburbs Landstrasse, Wieden, &c. It contains 10,000 houses; and its principal trade consists in gold, silver, jewellery, and silk manufactures, pianofortes and furniture. The best points of view are, the steeple of St. Stephen's, the Spinnerinn am Kreuz (female spinner at the cross,) the terrace in front of the Upper Belvedere, the Turk's Bulwark, the Gloriette at Schönbrunn, the top of Leopold and Kahlen hills, the Krapfenwaldchen, the Himmel, and Gallitzinberg.

The city has been greatly altered and improved within the last few years, especially by the erection of new hotels, monuments, fine houses, public buildings, and gardens, in the Ring, on the site of the Boulevards separating the old town from the environs. The gates are removed. It is well lighted, cheerful and healthy.

Objects of Attraction.—CHURCHES.—The *Cathedral* of St. Stephen's, built in 1115, now under restoration. Take notice of the spire, 453 feet high, the giant gate, the carved pulpit, and the statue of Oechsel, the builder. Entrance to the spire from a small house, No. 873, Stephen's platz. It was begun in 1359 and completed in 1433. The largest bell is cast out of 180 Turkish cannon, and weighs 357 cwt. In the interior, is the chapel of the cross (Kreuzkapelle) in which lies the celebrated Prince Eugene. Church of the Capuchins in the New-market, with the vault of the royal family, the sarcophagus of Emperor Frederick III., also the sarcophagus of young Napoleon, Duke of Reichstadt, and the tomb of Emperor Max of Mexico. Church of St. Augustin, with a noble marble Monument to the memory of the Duchess of Christiana, of Sax-Teschen, a most beautiful work by Canova. There is to be seen here likewise, the grave-chapel of the Emperor Leopold II., of the distinguished General Laudon, and of Professor van Swieten; in the Lorette Chapel, the hearts of the members of the Emperor's family are preserved in silver urns. St. Michael's Church, with the burial place of Metastasio. To Schönbrunn, omnibuses every half-hour, from Am Peter, on the Mehlmarkt, and on St. Stephen's Platz, or by tramway (Pferdebahn) from Praterstern to the Schönbrunn bridge. *Schönbrunn*, the summer residence of the Emperor of Austria, was begun under the superintendence of Fisher, in the reign of the Emperor Mathias, and completed in the reign of Maria Theresa. The beautiful spring, from which the castle derives its name; the Gloriette, with a view of Vienna, the flower garden with the palm-house, and a menagerie, are worthy of attention. The *Hetzendorf*, or Emperor's summer palace, is behind Schönbrunn. At Mödling are the old Knight-Templar church of S. Othmar, the castle and the park of Prince Liechtenstein, and ruins of the old family castle of Babenberg. Another road on the Vienna Wald leads through *Dornbach*, where Prince Schwarzenberg has a park. Thence to the Upper Wald, Hainbach, Steinbach, and Mauerbach, where refreshment can be had; through a lovely valley, to the Passauer Hütten; and in half an hour to the Tulbinger Kogel, for a beautiful prospect.

The *Kahlenberg*, or Josephsberg, (Mons Citius), above 1100 feet high on the N.W. of the city, is reached by way of *Döbling*, near the observatory. It stands near the Danube, and has a view, taking in the Alps on one side, and the Carpathians on the other; it is accessible by a wire-rope rail from Kahlenbergerdörfer Station, on the Francis-Josef line, or by a cog-wheel rail (on the Rigi plan) from Nussdorf Station. Near this is the *Leopoldsberg*, with an old castle. me for Travelling.—The latter part of June, July, August, September, and October best months for a tour; but even May is a delightful month.

ints.—Cold water, &c., should not be taken in large quantities by tourists when heated, and larly when much fatigued. No traveller should attempt to cross a *glacier* without a guide, ring at least rope tied round his waist; in all cases the guide should take the lead. A strong ck is indispensable upon a mountain journey. Take as little luggage as possible, but do not

omit a good water-proof coat or a plaid, and a pair of strong shoes to walk in. Take paper, pens, ink, and soap, as they are articles difficult to be met with.

A small phial of glycerine is useful for rubbing the face and hands when sunburnt, or for the feet when blistered. Rowland's Kalydor is also good. Homœopathic Tincture of Arnica is a valuable remedy for a sprain or bruise. Cold tea and chocolate cakes are useful to the traveller. For sore feet, rub in a little brandy mixed with a few drops of grease; or put a bit of greased paper next the skin. The following additional hints are derived from Dr. Allbutt's valuable paper on the "Health and Training of Mountaineers," in the *Alpine Journal*, for August, 1876:- Growing lads and women should not attempt too much at a time. Small eaters must be content with fewer excursions than others. The most useful wrap is a waterproof Scotch shawl. As to knapsacks, it is better to pay 5s. to another man than to load yourself with the burden. The best stick is a short ice axe. Honey (carried in a hollowed loaf), chocolate, raisins, milk, are all nourishing. Do not, on any account, overload the stomach. Alcoholic drinks are poison to a climber. A good wash with soap and water, is always refreshing. A few drops of Ammonia, in a glass of water, makes a good lotion. Cold cream is better than glycerine. For a white frost-bite, rub first with snow, then cold water. For sickness and diarrhœa, take three or four times a day, a mixture of carbonate of soda, 10 grains, and of syrup of ginger and tincture of rhubarb, each a teaspoonful. A simple antidote is half a wine glass of good cognac, repeated if necessary. For constipation, take two or three grains of rhubarb, at meals. Rest is best for sprains and bruises; Arnica is a "ticklish remedy." If caught in a snow storm, build a snow hut, leaving a hole for breathing; it will be found sufficiently warm. Sucking a lemon now and then is the best thing when ascending a mountain.

Luggage.—All luggage is charged for: charge by weight; about 5 c. per 220 lbs. per kilometre (⅝ m.) Heavy articles should be sent, if time be no object, by "*Train commerce*." Baggage is examined at the frontier places of Bâle, Lugano, Schaffhausen, Splugen.

Conveyances.—In Canton Berne all prices of conveyances, &c., are regulated by tariff, which may always be demanded; elsewhere more precaution is required. Tariff placed in every hotel. Diligences generally belonging to Government and carrying the mail, traverse all the chief roads where the railway does not run. They have room for 12; average day's journey, 10 to 12 hrs. The fare is, however, high; and three or four travelling together will find it more convenient to hire a private conveyance (*voiture, vettura*); charge with 1 horse (2 persons) 12 francs a day; 2 horses (5 persons) 20 francs, besides 1 franc per horse to driver; return fare must also be paid. The traveller should ascertain whether a return carriage may not be in the town before hiring one belonging to the place; but in the height of the season return carriages are charged higher. Horse or mule, 6 fr. and half-pay for return journey. Muleteers, 3 fr. a day; same for the return. Steamers navigate all the chief lakes. The *Swiss Federal Post* run carriages (2, 3, or 4 horses) at a special tariff—From Bellinzona to Lugano; Brieg to Andermatt (over the Furka); Coire to Andermatt (by the Oberalp), to Colico (by the Splugen), to Bellenz (by the Bernardin), to Davos-Dorfli (via Lenz or via Schyn); Coire to Samaden (via Schyn and the Julier, or via Lenz and the Julier, or via Schyn and the Albula, or via Lenz and the Albula); Davos Platz to Schuls (by the Fluela); Fluela to Biasca (by the Gothard); Landquart to Davos Platz (by the Prättigau); Samaden to Cläven (by the Maloja); to Puschlav (by the Bernina); and to Schuls; Loueche to Arona (by the Simplon); and Zernetz to Münster (by the Ofen).

Guides are absolutely necessary in mountain excursion, at other times than the months named for a tour; since the paths are then liable to be obliterated by snow. Their almost invariable honesty and good temper render them on all occasions useful. Travellers should bargain *beforehand* with guides, for such excursions; the hiring should be made through the landlord. Pay, 6 fr. a-day and half-pay for the return journey. They will carry 25 lbs. luggage.

Railways.—About 1550 miles were open in 1877. The carriages are excellent; with the exception of those in the three French Cantons, on the American principle. First class carriages are fitted up with tables, looking-glasses, foot-stools and other conveniences; 2nd class are roomy and enable the traveller to view the country. Geneva time is 20 minutes before Frenchtime. Return Tickets at a reduction of 25 per cent. Children 3 to 10, half price. Short lines from Vitznau, on Lake Lucerne, and Arth on Lake Zug, to the summit of the Rigi (Rigi Kulm.) A line for Rialp in progress from Altorf, through the St. Gothard Tunnel.

In Switzerland Orders up to 500fr. (£20), at a small commission, may be got in the form of Coupons, to be used as required. The Coupons may be written on. There were 799 Offices in 1877.

Cantons.—Twenty-two; three being divided into two sections each. Bern, Valais, Grisons, are by far the largest; Valais, Geneva, Vaud, Neuchatel, Bern, Bâle, are on the French border; Bâle, Aarau, Zurich. Schaffhausen, Thurgau, on the German borders of Baden, Wurtemberg, and Bavaria. St. Gall, and Grisons, on the borders of Austrian Tyrol; Valais, Ticino (or Tessin), and Grisons, on the Italian border.

The Provinces or Cantons now constituting the Federation were formerly held by the neighbouring Sovereigns of Austria, Germany, Burgundy, &c. In 1307, three Forest Cantons, under Tell and others, rose against Austria, and after defeating her at Morgarten, 1315, were joined by 10 other Cantons. They defeated Charles the Bold, 1476–7, and the Duke of Savoy, 1602; and were finally declared independent by the Treaty of Westphalia, 1648. In 1815, the Confederation was revised, and the Cantons increased to their present number.

Population (1878) 2,792,260, estimated. Of these (in 1870) 1,566,347 were Protestants, mostly in the Cantons of Zürich, Vaud, Schaffhausen, Glaris, Bâle, Appenzell, and Thurgau; 1,084,369 Catholics, mostly in the remaining Cantons; and 94 per cent. were Swiss-born. As respects **Language**, 1,843,000 were German-speaking in 14 Cantons on the North and North-East; 640,000 in the French-speaking Cantons on the West (viz Bern, Valais, Fribourg, Neuchatel, Geneva, Vaud); 144,000 Italian-speaking (in Ticino) south of the Alps; 42,000 Romansch-speaking in Grisons, next to Tyrol. The Romansch is a curious remnant of provincial Latin; a newspaper in this dialect is published at Disentis. Some of the most populous Towns (1870) were—Geneva, 68,165; Zürich, 56,695; Bâle, 44,834; Bern, 36,000; Lausanne, 26,520.

A Federal Council or Executive, of 7 members, is nominated by the Assembly for three years, under a President and Vice-President, elected annually, seated at Bern, where the Foreign Ministers reside; a Federal Tribunal, or Judicial body, is nominated for three years.—**Army** (1879) 215,000; of whom 119,400 were regulars, from 20 to 32 years of age; the remainder consisting of the Landwehr, from 33 to 44 years. There were 178,000 infantry, 24,000 artillery, 5,300 cavalry. A Federal Polytechnic School at Bern.—**Navy**—represented by 86 mercantile steamers, of 8,500 horse-power, on the lakes.—**Universities.**—Four, at Bern, Bâle, Zurich, and Geneva; and two Academies at Lausanne and Neuchâtel. A Tir Federal, or Swiss "Wimbledon," is held every two years. Wrestling matches or Schwingfeste, are also held at Meyringen, &c.

Commerce.—Among Swiss productions are silk, lace, linen and cotton, embroidered curtains, watches, (1,600,000 in 1876), clocks, jewellery, cheese, wooden toys, charcoal, preserved milk, fruits, kirschwasser, and absinthe (from wormwood). The Federal Revenue is about 1½ million sterling. Cantonal Expenditure, about 2 millions.

In French Savoy, in the valley of the Arve, under Mont Blanc, 3,440 ft. above sea, 22 m. from Martigny stat., and 50 m. from Geneva. This may be reached from England in 34 hrs. of railway travelling, for £6. Thence by diligence, in the season, 21 to 25 fr. From Martigny by mule, chaise à porteur, or the new carriage road. Chamouni is almost a new place since the fire of 1855; and has a museum, baths, and a spire church, where a Priory was founded in the 11th century. **Mont Blanc**, its great attraction, is 15,780 ft. above sea. The ascent, now an annual thing, was first made by Dr. Piccard, 7 Aug., 1786. One resting-place, Grands Mulets, is 10,010 ft. high. In 1870, eight persons lost their lives in the snow. In 1855, Mr. Morshead ascended alone, in one day of 16 hours. A Guide's wife went up in 1838; the first French woman in 1840; the first English woman in 1854. Dr. Tyndall spent 20 hours on the top, 1859.

The *Montanvert*, ascended on mules, and commanding a view of the Mer de Glace, should be the first excursion. It is an elevated pasture on the summit of a peak under the Aiguilles de Charmoz, and 2565 ft. above the valley. From this are seen the heights of the Brevent and of the Aiguilles Rouges. At the summit, beds and refreshments may be had. The *Glacier des Bossons*, which may be seen the same day, at the other end of the valley, is remarkable for the purity of its ice, and for the picturesque formation of its ice needles and obelisks. The *Brevent*, on the opposite side of the valley, 8,330 feet above sea, affords a magnificent view of the whole range of Mont Blanc with its numerous snow peaks and glaciers. The *Flégère*, on the same side, commands the same view at a less elevation, and may be accomplished in half a day. An active mountaineer would be well repaid by a day's excursion across the Mer de Glace to the *Jardin*, 9,270 feet above the sea—a small portion of green earth, covered with flowers in full bloom, in a region of snow and ice, commanding a view of the recesses of this wonderful range. From Chamouny to Martigny, by the passes of Tête Noire or Col de Balme, eight to nine hours are required; the road *viâ* the former is practicable for carriages. To the Jardin is a fatiguing excursion for ladies. *Tête Noire* is one of the most picturesque passes in Switzerland. Excursions to *Col du Géant* (11,080 ft.), and *Col de Fordas* or Trient (5020 ft.)

Eng. Ch. Service held in the English Church at 11 a.m. and 3 p.m.; Chaplain supplied by the Colonial and Continental Church Society.

Baths of St. Gervais, in a beautiful valley about 13 miles from Chamouny, 5½ hours from Geneva; where excellent accommodation may be had at *pension*. Delightful walks for the convalescent. In the neighbourhood are the *Aiguille des Forcas* (8955 feet above sea); Pavilion Belle Vue, commanding the valley of Chamouny; Mount Joli (8760 feet); and Col du Bonhomme. Church Service (C. C. C. Soc.) at H. Monte Joli, in summer. Mont Blanc can be ascended from St. Gervais (first time, without guides, by Mr. Hudson's party in 1854) as well as from Courmayeur.

Chateau d'Oex (*Germ.* **Oesch**). Pop. 600. Hotels: Berthoud; Ours; several Pensions.

A quiet pastoral spot in a pure air, 3,260 feet above sea, in Canton Vaud, in the Upper Saane, 7 m. from Gessenay, on the diligence road to Aigle. Eng. Ch. Service (C. C. C. Soc.) at Swiss Church. Excursions to Col de Pillon, M. Moléson, &c.

Chaumont.—Hotel et Pension Chaumont. Beautiful situation. Magnificent views. A fine point of view, 2 hours from Neuchâtel (which see.) Eng. Ch. Service in the season (C. C. C. Soc.)

Chaux-de-Fonds.—*Stat.*— Pop. 19,938.—Hotels:—Fleur de Lys; Balance; Lion d'Or.

A thriving town for watch and clock making. (Canton Neuchâtel) 9 m. from Neuchâtel, in a gorge of the Jurau, 3129 ft. above sea, near the Doubs and the French border. About 120,000 watches a year are made here by the usual division of labour, as at Clerkenwell. The trade was begun 1679. Watch chains are made at Chaux de Milieu, 9 m. distant. Lace is made by the women. Here are an oval church, theatres, a club, casino, gas works, &c. About 4 m. west of it, with houses nearly all the way, is **Locle** (*Stat.*; pop. 10,316; Hotels, Trois Rois, Jura), another seat of the watch and lace trade, on the river Bied; which runs through a tunnel and over a fall of 160 ft. Excursion (3 m.) to the Roche Fendue (a cutting), the Roches Miti, and *Saut de Doubs* (there and back, 6 fr. for 4), a fine fall of that river, in a picturesque spot. Railways, see pp. 289, 242, 246.

Chexbres (Vaud)—*Stat.* for **Vevey**, (p. 245) to which there is an Omnibus (3 m., 1 fr.), with a fine view of the Lake of Geneva. There is another from Hotel du Signal, ¼ m. from the station; Eng. Ch. Service is supplied (C. C. C. Soc.)

Clarens (Vaud).—See Montreux.

Coire—(*Germ.* **Chur.**)—*Stat.*—Pop. 7,400.
H. Cathedrale; Lukmanier; Croix-Blanche.

Coire, capital of the Grisons (i. e. Grey Coats), 2½ m. from Zürich, the Roman *Curia Rhætorum*, called *Quera* in modern Romansch; a picturesque old place, 2000 feet above sea, on the Plessur, about 2 m. from the Rhine, and on the great road to Italy. Protestant Churches and a High School here. The very ancient R. A spacious Café and Restaurant are attached to the Casino-Theatre, Avenue du Théâtre.

Houses and apartments, furnished and unfurnished, are numerous; but for a short stay it is better to make arrangements with the proprietors of Hotels and Pensions. Unfurnished Apartments (*i.e.*, a flat) in a good situation, are £50 to £100 a year; Furnished ditto, £60 to £130. Unfurnished Houses, £80 to £150; Furnished ditto, £80 to £200.

Capital of Canton Vaud, 61 m. from Berne, an irregular picturesque town, placed in the centre of the Jorat Hills, 1½ m. distant from the northern shore of the Lake of Geneva, where there is a small port or landing-place, called Ouchy, about 30 m. from Geneva. It stands 1600 feet above the sea, on three hills, and the intervening valleys. A causeway, and Grand Pont, built 1844 leads to the Place de St. François, the chief seat of resort in Lausanne. It hardly possesses one good footpath, the trottoirs being formed of rough stones like the carriage ways In the Place de la Riponne, near the corn-market, stands the Musée Arland, a Picture Gallery, containing an interesting collection of old and modern masters. Near the Corn market is a pretty Methodist Church; and behind is the Roman Catholic Church.

A flight of steps leads to the Prot. Cathedral of Notre Dame, a Gothic pile, 350ft. by 150ft. with a spire of 200ft., founded about the year 1,000, but mostly built about 1275. It has an imposing interior, fine porch and handsome Byzantine capitals and apsed chapels; with tombs of Amadeus VIII. (elected Pope as Felix V, but resigned 1449), and Mrs. Stratford Canning. From its terrace a very fine view may be had of the City and Lake, and the ranges of the Alps and the Jura. Near the Cathedral are the Government House and Law Court, in the former episcopal Château & Evêché. The Canton Museum is contiguous to the Academy, and its valuable Library; access on producing proper testimonials. The Masonic Temple is in this part of the City. Lausanne is rich in charitable and benevolent institutions; one is the Blind Asylum near the Place de Chaudron, which contains a variety of articles made by the blind, and on sale. The Penitentiary dates from 1828 Mean temp. 30° (Jan.) to 64° (July).

ENVIRONS—at *Pully* on the Vevey road is a splendid prospect from the ancient church. On the other side of Lausanne is Prilly, with its celebrated Lime Tree, said to be a 1000 years old. It is more than 14 yards round the trunk. Its immense boughs are covered with mistletoe. Near the church is the CAFE DE MONT BLANC, so called because of the view. The old church of *St. Sulpice* (Byzantine) merits the notice of the Archæologist.

Another attraction in the environs, is the **Signal** (Le Signal), 2 m. distant. It is on the summit of a slight elevation, and commands a panorama of great extent. SERVICE (C. C. C. Soc.) The Echelles or ladders up the face of a precipice, are very remarkable. The **Pass of the Gemmi** is in many respects the most wonderful in Switzerland, the road winding down a precipitous rock, and often projecting over the path immediately below. It is 7,555 ft. above sea.

A new Carriage Road, constructed in 1846, leads from **Leuk** to the Baths, and is wonderfully romantic. Horses may trot the whole distance. Horse road from the Baths to Sierre Station, 12 m.

From the summit of the vast precipices of the Gemmi, a path practicable for mules and chaises-à-porteur conducts the traveller through a wild and desolate region for several miles northward, and, after descending through a forest, overlooking the wild valley called the Gastern Thal, the hamlet of Kandersteg (3835 ft. above sea) is reached. At **Kandersteg** are Hotel Victoria, H. Gemmi, where Church Service (S. P. G.) is held on Sunday; and H. Bär (Bear), near er the pass. It stands at the west end of the lake, on the Reuss, which divides it into two parts, at the foot of Mount Pilate, in view of the Rigi. Its most remarkable objects are the old town Walls and towers; the two covered *Bridges* over the Reuss, decorated with historic and legendary paintings (that near Hotel des Balances has the Dance of Death on it); and the wounded colossal *Lion*, (from a model by Thorwaldson,) in memory of the Swiss guards, at Paris, in 1792. It is near the Collegiate Church.

The Kapellbrücke is decorated with 154 paintings, representing scenes from the lives of St. Leodegar, or St. Leger, and St. Maurice (the patron saints of the town), and events recorded in Swiss history. For the **Bernese Oberland**, via the Brunig Pass, take steamer to Stansstad; thence by dil. through the vale of Sarnen to Lungern, at the foot of the Brünig (22 m. from Stansstad); thence the dil. goes on to *Briens*. HOTEL DE LA TOUR—Old established, newly refurnished; kept by T. Lugon. Four languages spoken. GRANDE MAISON POSTE; CLERC.

ENGLISH CHURCH SERVICE, (S.P.G.) at the Hotel Clerc, twice every Sunday.

A small town in Canton Valais, 24 miles from Villeneuve, on the Simplon road, and a bend of the Rhône, where the Dranse joins, 1,570 ft. above the sea; at the foot of the passes of the Tête Noire and the Col de Balme, leading to Chamouni, and also near the foot of the Great St. Bernard, (8 h). It is the mother Convent which supplies the dozen monks who take their turn of duty at the Pass.

Of the three ways to Chamouni (8 h), one is by the Gorge opposite the new Hotel at Vernayaz. It leads to **Col de Trient** or Forclaz. At Châtelard the paths from **Tête Noire** (5 h.) and **Col de Balme** (6 h.) join, and a sudden splendid view of Mont Blanc opens. A carriage road to Chamouni, via the Tête Noire, has been made by the Martigny coachers; carriage for 4 persons and 2 horses, 80 fr. besides pour-boire. Jos. Pilide is a good cochor and guide. Two hotels are passed.

Martigny to Aosta, by the Great St. Bernard, 47 m., or 12 hours walking:—via. carriage road ending at St. Pierre 19 m.; path to top of Pass 9 m.; down to the carriage road at St. Rémy 4 m.; to Aosta 15 m. Another way (fit only for a mountaineer) leading up the Dranse, is 51 or 52 m. long; past the Pigno del'Arolla (12470 ft. high); Chermontane; Grand Combin, a peak 14615 ft. high; Valpellina, and Aosta.

The **Great St. Bernard**, the Roman *Mons Jovis*, in the Pennine Alps, takes its modern name from Bernard de Menthon, who, in 963, founded or rebuilt a monastery on the Pass, near a Pagan temple, 8,130 ft. above sea, the neighbouring mountains being 3,000 ft. higher. Tourists ought to leave in the Convent box at least as much money as they would pay at an hotel, as poor travellers are lodged and fed gratuitously summer and winter. The piano was given by the Prince of Wales at his visit. The bodies of those who have died on the mountains are to be seen in the Morgue in a state free from decomposition. The Pass was one of the high routes for pilgrims to Rome; and was traversed by the Romans, by Charlemagne, Fred. Barbarossa, etc., and in the year 1800 by Napoleon I. before the battle of Marengo. His monument to Gen. Desaix, is in the Chapel.

Meiringen.—Pop. 2,750.—HOTELS:

HOTEL DU SAUVAGE AT DE LA COURONNE, opposite opposite the cascades of Reichenbach and Aarbach; moderate charges and excellent accommodation.

HOTEL AND PENSION REICHENBACH.

ENGLISH CHURCH SERVICE, with early and mid-day celebration of Holy Communion every Sunday during the season, at the Gothic Church, opened 1868, in the gardens of the Hotel du Sauvage, on a site given by the proprietor. The Chaplaincy is one of the oldest (1825) in Switzerland; licensed Chaplain, Rev. T. W. Bull, M.A.

Meiringen, amidst splendid scenery, ranks as most other places as head-quarters from which to make excursions into the Oberland. It stands on the river Aare, among wooded slopes, and foaming waterfalls, overtopped by glaciers and fields of ice and snow; and is the chief place of the Hasli valley, in a spot, remarkable for the purity and freshness of the air. A carriage road leads from it to Brienz (8 miles) along the beautiful vale of Meiringen, where there is communication with Interlaken by steamer; and a fine diligence road leads over the Brunig to Lucerne. Here also the passes of Joch, Suston, Grimsel, and Scheidleck or Scheidegg meet. Nearly 100 of its picturesque wooden houses were burnt Feb 10. 1879. It has a Town Hall, prison, and an old Castle of the Counts von Hasli. Near it, is the double fall of the "dreaded *Alpbach*," pouring down upon an enormous bank of moraine, heaped higher than the neighbouring Church spire. In early morning it frequently displays a perfectly circular rainbow. On the opposite side of the valley descend the magnificent Falls of the *Reichenbach*; the upper of which is 600 ft. in height. Its thunder can be heard at all times.

Meiringen possesses a resident President and Council, but no public buildings of importance. The plain Church, beneath the Hasliberg, has on the wall a line drawn 17 ft. from the floor, with an inscription stating that in the great inundation of the Alpbach torrent on July 9, 1762, the Church was filled with moraine and mud to that height. Adjoining it is a smaller building dated 1486. The watch tower of the former Counts contains 3 bells of the fourteenth century. It is a chief centre of the wood carving trade; carriage may be bought here on very reasonable terms; the best at J. Baud's, opposite Hotel du Sauvage. The most noted Schwingfest or wrestling match between the different Cantons is held at Meiringen annually, on the first Monday in August. Beautiful walks as well as peaks for climbers abound. GUIDES.—Melchior and Jacob Anderegg, Meichior and Jacob Klatter, John von Bergen, John Tannler, Caspar Koor, etc.

EXCURSIONS.—(A) To Grindelwald, over the Scheidleck, in 7 to 8 hours, passing the Glacier of Rosenlaui. A good inn at Rosenlaui, convenient for the ascent of the Wellhorn. (B) Ascent of the Hohenstollen, in 4 to 5 hours; by a good bath

path to within an hour of the summit. The panorama is thought to surpass that from the Faulhorn. (c) By the Joch pass to **Engelberg**, (see that name) in 10 hours, halting at the Engstlen Alp, with splendid views of the Titlis, Finster-Aarhorn, etc. The distance from here or from Engelberg to the *Titlis* (10,600 ft. high) is about the same. Guides may be had at either point. At Engelberg are the KURHAUS ET HOTEL SONNENBERG; an old Abbey Church; and HOTEL ET PENSION DU TITLIS (Church Service, S. P. G.) an excellent centre for the grand scenery of **Mont Titlis**, etc. (D) By the Susten Pass to Wasen, and thence to the St. Gothard, passing the Stein Glacier. Good, homely Hotel at Stein. (E) To the Hospice of the **Grimsel**, in about 8 hours, by the splendid *Falls* of the Aare at Handeck; where is a buffet for refreshments. Inn at the Grimsel, clean and comfortable. The source of the Rhône and the Furca Pass, are 2 hours farther. (F) The Lake of Lucerne may be reached in one day, over the **Pass of the Brunig**, by taking a carriage to Lungern, to meet the diligence from Brienz. It traverses the lovely pastoral vale of Sarnen, past its lake to Stanstad or Beckenried, on the Lake of Lucerne. A rail is projected by this route.

CONVEYANCES.—Omnibuses to Briens meet the steamer to Interlaken; see p. 240-1.

GRAND HOTEL DU LAC.

Neuchâtel is a small canton among the ridges of the Jura, between the *Lake* to which it gives name and the borders of France; composed of six or seven valleys, such as are Val du Travers, de Sagne, and Val de Rur. It joined the Confederation only in 1857. Neuchâtel, the capital, 17 m. from Bienne on the N. side of the Lake, is a well-built and thriving town on the slope of a hill, at the mouth of the Seyon; containing the Château, the ancient residence of the princes of Neuchatel; the newly-restored Gothic Cathedral, erected in 1161, adjoining the Château; a College

at which Agassiz was professor; a Museum of Paintings, by Swiss Artists, Calame, Roberts, etc., at Palais Rougemont, and a statue of D. Pury, founder of the town Hospital. Watch making is a great business. Mean temp. 34° Jan. to 67° July.

The environs are well worth visiting, especially **Chaumont** on the top of the Jura, 2 hours. Here is to be had the finest *general view* of the whole chain of the Alps in Switzerland; the prominent feature in the landscape being the Lakes of Neuchatel, Morat, and Bienne, and the snowy masses of the Bernese Oberland. Mont Blanc, 80 miles distant, seems but a few miles off. Excursion to Valengin, and the magnificent orge of the Seyon; distance 3 to 4 miles.

The *Lake of Neuchâtel* is surrounded with remains of the ancient lake habitations of the Age of Stone and Bronze. It is 23 miles by 2 to 5 miles in extent, and 424 feet deep. Concise, a station on the Rail to Yverdun is the most important locality: St. Aubin is also interesting.

ITALY.

For description of the ALPINE PASSES and the LAKES, see SPECIAL EDITION

Books.—See BRADSHAW'S *Illustrated Handbook to North and South Italy*—including a Special Guide to Rome and its Environs, Sicily and Sardinia—forming a complete Guide to the whole country, with Maps and Plans, &c. Price, 7s. 6d. See also, J. Ball's three *Guides to the Eastern, Central, and Western Alps.*

Italy consists of two distinct portions—the continental and the insular. The latter includes the two large islands of Sicily, and Sardinia, with the smaller ones of Elba, Capri, Gozo, Lipari Islands, etc. See the "Islands" section. The continental portion forms a long narrow peninsula, extending from N. W. to S.E., the greatest length of which measures about 695 or 700 miles from the sources of the river Tosa to Cape Cimiti in Calabria, or Cape Lucca in Otranto. The breadth is various, its northern measurement being 360 miles; it is about 275 miles from Mount Genèvre to the mouth of the Po, through the middle of Lombardy; 156 miles from Piombino to Ancona; and only 20 miles in some parts of Calabria. The superficial Area, including the islands, is 122,167 English square miles. The northern border of Italy is formed by the stupendous range of the Alps, extending in a long curve line from the shores of the Mediterranean Sea, near Genoa, to the head of the Adriatic. The Alps are connected with the Apennines, a lower but still important range, which stretches in an uninterrupted line, parallel to the shores of the Gulf of Genoa, and then through the peninsular part of Italy to the Strait of Messina, dividing the country into two narrow sections of lowland, which run along from the mountains to the adjacent seas. The great Plain of Lombardy, between the Alps and the Apennines in Northern Italy, traversed by the Po, is about 250 miles from east to west; its average breadth being 50 miles.

Principal Mountains.—M. Blanc (on the borders of French Savoy), 15,760 ft. above sea; M. Rosa (on the Swiss border), 15,218 ft.; M. Viso (in the W. Alps), 12,640 ft.; Grand Paradis (in the Graian Alps), 13,300 ft.; M. Corno (or Gran Sasso), in the Central Apennines, 9,580 ft. **Passes.**—M. Vesuvius (at Naples), 4,000 ft.; Stromboli (in the Lipari group), 2,650 ft. **Lakes.**—Maggiore, Orta, Lugano, Como, Garda, and smaller ones, all under the Alps, and noted for beautiful scenery. **Rivers.**—The largest are the Po, with a course of 160 leagues; Tiber, 30 leagues; and Arno, 25 leagues.

Population (1871) 26,208,689; (1878) 26,210,000, estimated; in 16 Territories & 69 Provinces. In 1871 there were 66,661 Protestants, and 35 346 Jews. Estimated pop. of largest towns (1878)—Rome, 283,870; Naples, 441,000; Milan, 261,300; Palermo, 232,000; Turin, 214,200. **Reigning Sovereign.**—The States of the Church having been annexed 9th Oct., 1870, Victor Emmanuel became King of United Italy; with Rome for its capital. He had succeeded his father, Charles Albert, 1849, and taken the title of King of Italy 1861. He died 9th Jan., 1878; and was succeeded by his son Umberto, or Humbert, as Humbert I. Humbert was born 1844; and his eldest son, now Prince Royal, was born 1869. The king's brother, Amadeo, was King of Spain, 1870-3. **Senate**—numbers 270 members; Chamber of Deputies, 508. **Army** (1879) 696,000 permanent, in 10 districts; war footing 1,376,000. **Navy** (1878)—73 vessels (20 being iron-clads) of 480 guns. **Commerce**—chiefly with Switzerland, France, and Austria; employing 38,910 ships, (132 being steamers), of 1,062,000 tons, with 209,000 sailors. Exports and imports to and from England (1877), 3½ millions sterling, and 6½ millions, respectively. **Public Revenue** (1879), 67½ millions. **Debt** 400 millions.

London to Italy through France.—Travellers visiting Italy for the first time, may proceed, by rail and steam, all the way from London to Florence, viz.,—London to Dover or Folkestone, rail; Folkestone to Boulogne, steamboat; Boulogne to Paris, Chalons, Lyons, Avignon, and Marseilles, by rail; from Marseilles, steamboat to Leghorn, and rail to Florence. Those preferring a land journey to Italy, instead of taking the boat at Marseilles, should proceed thence to Toulon, Frejus, Antibes, Nice, and along the coast of the Mediterranean to Genoa and Lucca; passing over the two finest roads in Italy—the Riviera di Ponente or Cornice Pass, from Nice to Genoa; and the Riviera di Levante, from Genoa to Lucca, both now traversed by rail. Railway communication also through Switzerland to Brieg or Chur; thence by diligence across the St. Gothard or Spluegen, pass to the lake of Como, and the soft Italian scenery on the southern slope of the Alps; this is replete with interest to the tourist: avoid the middle and south of Italy in summer. When travelling long distances at night, second class carriages are usually not so full as first class. "Always try and see a beautiful piece of scenery *by night* as well as by day."—T. R. U. Do not drink tea, or live in English fashion. Avoid buying things in shops, unless the prices are marked. As a rule, English people are charged more.

Brindisi Route.—There are two ways; 1st, through France, *viâ* Mont Cenis Tunnel; 2nd, through Germany, *viâ* the Brenner Pass.—The **French and Mont Cenis Route** follows the Lyons rail to Dijon, Chalons-sur-Saône, Mâcon, Amberieu, Culoz, Chambéry, St. Michel, to Modane (17 hrs. from Paris); Then through the Great Tunnel, *viâ* Upper Italian rail, to Turin (24 hours from Paris), Alessandria, Parma, and Bologna, in 7 hours.—The **German and Brenner Route** passes Brus-

sels, Cologne, Mayence (or Mainz), Aschaffenburg, Munich, Innsbrück, the Brenner, Verona, Padua, to Bologna, as above. Thence, by South Italian rail, to Brindisi. A traveller leaving London on Thursday, 8.45 p.m., reaches Brindisi on Monday, 4 a.m.

Money.—100 centesimi = 1 lira = 9½d. English. The Money in circulation (now 1876) consists almost entirely of Bank Notes and Copper Coins.—The Bank Notes are for 1000, 500, 250, 100, 50, 10, 5, 2, and in paper money £1 Sterling is worth 27 lire and a few centesimi or above 8 per cent. of a premium on gold and silver. GOLD COINS—100, 80, 50, 20, 10, and 5 lire. SILVER COINS—5, 2, and 1 lira, and 50 and 20 centime pieces. COPPER COINS - 1, 2, 5, and 10 centimes. (See *Moneys, Weights, and Measures of all Nations*, by W. A. BROWNE, LL.D., London, Stanford.) Travellers should always pay in paper; should not take the old paper notes of 1 lira and 2 lire; nor take any paper money out of the country. Gold or silver is only found at some of the larger Stations. The English sovereign will yield 27 l. 20 c. to 90 c., according to the exchange. The local 1 lira notes of the leading provincial Banks are current in most parts of Italy.

Railways.—The fares vary; those on the Great Southern Railway, (Ferrovia Meridionale), being the lowest, viz:—1½d.; 1d; ¾d.; 3–10d. per English mile for the four classes. Return Tickets and Circular Tickets, at a reduction of 25 to 35 per cent. Children from 3 to 7, half fare. The 2nd class are generally comfortable and well cushioned; but English travellers are not recommended to travel 3rd class: 2nd class is the cheapest in proportion. There is a government tax on some lines. No free allowance of luggage; 20 per cent extra charge for Express trains on most lines. Italian paper is a legal tender throughout the country for any amount. When travellers take a through ticket into another country, paper is accepted for the proportion of fare to the frontier. The Railway is called "Strada Ferrata," or "Ferrovia"; a sleeping carriage, "vettura salone a letti." Steamers are called "Piroscafi." In 1877, there were 5,000 miles of **Railways** open; and 14,870 miles of **Telegraphs**. Telegram to U. Kingdom, 3d. a word. **Baggage** is examined on the frontier places of Camerlata, Como, Domo d'Ossola, Turin, Udine.

Luggage—May now be forwarded from city to city, without difficulty, by Railway. It must be declared as Passenger's Luggage, "*Effetti di Viaggiatori.*" deliver it, and have a receipt.—Prepay and address it to some Hotel; this ensures a bed on arrival; or, write to the Hotel-keeper to receive it. Valuable property should not be left in the baggage.

Hotels.—In Italy, it is well to bargain before-hand for chamber, &c., unless the hotel be of known respectability; and, to ask the price of table d'hôte. This is especially necessary in small towns and road-side inns. Where there is no table d'hôte, ask for a dinner for 3 lire, including wine, (*Vino ordinario.*) The best Hotels are very comfortable, and English tastes are consulted. A knowledge of the French language is useful in Italy. (See *Vocabulary* in Special Edition.) It is customary in this country to breakfast or take tea and coffee at a caffè: the saving is great, and, except in the case of families it is often a great convenience. "As a rule the Traveller will find English Boarding Houses in Italy very uncomfortable and straight-laced quarters."—R.A.C.

Servants are now charged for in the bills throughout Italy, 1 franc. The Waiter is called "Cameriére." At a Caffè, "Bottega" (shop) is called out. **Wines.**—"In North Italy, try Val di Policella, Gattinara, Barolo, Brollo—but Gattinara does not suit English tastes generally." At Rome "Velletri" is a good ordinary Wine.—E. S. C.

Postage to U. Kingdom, 25 centi. *under* the ½ oz. Cards, 10 c. Newspapers, 5 centi. Money Orders, see p. xivii.

Passports.—Foreign Office Passports now require *no visa* for any portion of the Kingdom of Italy. Nevertheless the Passport itself is indispensable to the Traveller, to prove his identity and nationality; it saves time, and often obtains admission to public buildings; and he is strongly advised always to carry it about with him. See Introduction, p. li.

Churches.—Italy is famous for the number and magnificence of its Churches, and many of the small provincial towns possess monuments of the highest architectural interest. What renders them so extremely interesting is the costliness of their internal decorations—the silver, gilding, rich marbles, precious stones, paintings, mosaics, and sculpture, with which they are profusely adorned. Travellers should not be deterred from entering by the outside appearance; since the exteriors of some of the most magnificent edifices are shapeless masses of brick or rubble. The prevailing church and domestic Architecture of Italy is classical; the pure Gothic of France and England being almost unknown. Venice and a few of the larger towns in the north of Italy, however, have produced a style known as Venetian or Italian Gothic. For the Schools of Art, with Lists of the Popes, etc., see BRADSHAW'S *Hand Book to Italy.*

NOTE—The churches are generally closed from 12 to 3 or 4; Travellers will do well to rise early and visit the public buildings of a town before noon. Some are only open in the morning. Fee (since Oct. 1875) to all Public Galleries, Museums, &c., 1 lira.

Along the road cactus and aloes are seen with bunches in flower 6 or 7 feet high. At **Cogoleto**, a village near Voltri, they show a house in which, tradition says, Columbus was born, about 1436-42. Near Zinolea you cross the Tragenda torrent, leave Vado on the ridge of a mountain, pass through Porto di Vado, and Spotorno, and reach **Noli** (Hotel de la Post), the *Nolum* of the Romans; pop. 2000

Further on is **Albenga** (pop. 4189), also a former republic, in a broader valley, with a tropical climate (Albergo Reale) 377 ft. above sea. Gothic cathedral and Roman bath. At Borghetto S. Spirito, is a curious grotto. For **Alassio**, see p 511.

tained. Galileo's Villa is at some little distance near the hill of Arcetri. In general, the streets are narrow; but the palaces are noble. The river Quays are called Lung' Arno (*i. e.* on or along the Arno); that on the right bank extends to the Cascine (Dairy) Gardens which are 2 m. long. There are 9 Gates; 2 Markets; 7 Bridges (2 suspens on); and 23 Squares or *Piazzas*, including the Piaz. of the Signoria, with its statues, Piaz. del Duomo, Piaz. Santa Croce, with the Dante Memorial (1865, the 600th year of his birth), Piaz. dell' Annunziata, the Piaz. Vecchia and its statues, Piaz. Santa Maria Novella, Piaz. San Spirito, and Piaz. of M. Angelo, which has a copy of his David.

The Gothic *Duomo* or Cathedral of Sta. Maria del Fiore, was begun 1298 by Arnoldo di Lapo; and finished 1470—Giotto and Brunelleschi being among the architects employed. The walls are cased with marble. It is 500 ft. long; with a nave 128 ft. wide, and transept 310 ft. long. The 8 sided *Cupola* (copied by M. Angelo at St. Peter's) over the Choir is 140 ft. in diameter, and 380 ft. high to the cross. A new front is in progress. It has several chapels; statues and bas reliefs by Donatello, D. Ghirlandajo, N. Aretino, G. Pisano, etc.; portraits or busts of Dante, Giotto, Di Lapo; and a fresco of Sir John Hawkwood, an Essex man.

The small coloured windows, make the interior look sombre and gloomy. The pointed arches are not truly Gothic. The pavement is tesselated with red, blue, and white marble. Stained glass, by a Florentine artist, Gambasi, in 1434. Near the principal gate is the 4 story *Campanile* or Belfry, 42 ft. square, 269 ft. high, begun by Giotto, 1334; and adorned with bas-reliefs and statues of patriarchs, prophets, evangelists, sibyls, by Donatello, A. Pisano, and others. Opposite this is the 8-sided *Baptistery* (S. Giovanni Battista), the bronze gates of which by Ghiberti and A. Pisano, were called by M. Angelo, the Gates of Paradise.

At the Church of Or' San Michele is a white marble tabernacle, constructed to hold the miracle-working picture by Orgagna, and surmounted by the statue of St. Michael. The dark solemn church of *Santa Croce*, near the Bargello, contains monuments of Dante (modern), M. Angelo, Galileo, Machiavelli, Alfieri, and Manin. Other churches worth notice are—Santa Maria Novella (called by M Angelo his "Bride")—having a Madonna by Cimabue; San Lorenzo, which contains the Medici Chapel, covered with rich marbles, also the Laurentian Library, designed by M. Angelo, and M. Angelo's Sacristy, with the tombs of the Medici, and the celebrated Statues of Day and Night; the church of San Marco—works by Fra' Angelico and relics of Savonarola; the Annunziata, a fine church with frescoes; Il Carmine; and S. Spirito, on the s. side of the river.

Among the *Palaces* are the Palazzo Vecchio, or Town Hall; and the Riccardi Palace belonging to the city, with a library of 23,000 vols., and 3,000 MSS. Casa Buonarotti, the house of M. Angelo, in Via Ghibellina, bequeathed to the city contains several relics, letters to 1563, and a Bust placed here at the festival of 1875.

The two Galleries contain perhaps the richest and most celebrated collection of statues and pictures in the world, including the Venus de'Medici, and works of Raphael; whose portrait by himself is in the Hall of Portraits. For a Summary, see Route 6, Special Edit. On the 1st floor of the Uffizi is the *National Library*, founded by A. Magliabecchi; containing 150,000 vols. and 12,000 MSS., including one of Tasso, with several of Machiavelli and Galileo. The Archives (150,000) are here. The Laurentian Library contains 9,000 MSS., including the Pandects, and MSS. of Virgil, Tacitus, Plutarch, the Decamerone, and several by Dante. The Marucelli contains 45,000 vols. National Museum, in the old Podestà or *Bargello*. Museum of Natural Hist., near the Pitti Palace. Etruscan Museum at S. Onofrio's. At the Academy of Fine Arts (Belle Arti) in Piaz. di S. Marco, are some early masters, as Cimabue, Giotto, F. Lippi, etc., with cartoons, statues (including M. Angelo's *David*); and the factory for Mosaics.

Genoa, called "La Superba," or the Proud, at the middle of the Riviera, in Piedmont; a chief port of Italy 104 m. from Turin or Milan; and, like Bath, is very up and down. Marble is used everywhere. Its numerous Villas covering the hills about it, are seen to the bestest advantage when coming into the harbour, which is made by two solid Moles or piers. View from the Lighthouse, 865 steps or 412 feet high (lat. 44° 24′ E., long. 8° 55′ E). The three principal streets, Balbi, Nuova, and Nuovissima, are bordered by a noble succession of old palaces. Its shops are now better lighted. Among the *Palaces*, all more or less noticeable for their architecture or paintings, especially portraits, are Palazzo del Municipio (formerly Doria Tursi), in Strada Nuova, sometime the residence of Queen Adelaide, and the Jesuit College; Palazzo Spinola; Palazzo Pallavicini, or Palazzo; "Strip my neighbour," Rosso (or Brignole-Sale), the gift of the Galliera family to the city, with a Library and Picture Gallery, in 6 rooms (works by Guercino, Van Dyck, &c.); Ducale, now the Prefettura; Bianco or Ferrari; Marcello-Durazzo; Doria, Serra and, Balbi; with the large Palaz. Reale (a royal seat since 1815), finely gilt, with a red and blue mosaic throne-room, and some paintings.

The *Cathedral* of St. Lorenzo is a noble pile of the eleventh century, restored several times, but especially in 1550, by Galeasso Alessi. The columns of its portals were taken from Almeria, at the capture of that city. Notice the curious pilasters on the north door, and the striped marble of the interior. The richest portion is the chapel of St. John Baptist, into which no female was formerly permitted to enter, except on one day of the year. Notice the treasures in the Sacristy, including the Sacro Catino, a sham relic of glass.

The *Churches* best worth visiting, after the Cathedral, are the Annunziata; San Ambrogio, with a celebrated Assumption by Guido Reni; Filippo-Neri; San Siro, with gilt statues of angels; S. Matteo; Santa Maria di Carignano (1552), by Galeasso Alessi—a perfect piece of architecture, with remarkable paintings, by Procaccini. From the summit there is a good view of the town, and its picturesque port. Notice also the Old Exchange; Compera, or Bank of St. George, now the Custom House, with statues of city worthies; University; the Academy of Fine Arts, with its Library, and paintings and inscriptions. It is situated in the Piazza Carlo Felice, close to that great theatre. Other *Theatres* are the Paganini, Apollo, Andrea Doria, Nazionale, Politeama. See the pupazzi, or marionettes. The Public Gardens at Acqua Sola, near Villa Negro, deserve a visit. Monument of Columbus at the station, near the Doria Palace. The city is strongly fortified and protected by 40 bastions. The beautiful Cemetery (Campo Santo), ½ m. out, has noble cloisters, rich in sculptured tombs, and statues. Villas Doria and Pallavicini, at Pegli.

Genoa manufactures excellent filagree silver. The climate except one time of the year, is trying for invalids. Mean temp. 47° (Jan.) to 76° (July).

It was sacked by Attila A.D. 452; half ruined by Fred. I., 1162; and restored in 1167 by the combined forces of Cremona, Brescia, Bergamo, Mantua and Verona. In 1535 it came to Charles V., who fixed the succession of the Duchy in his nephew. The Treaty of Utrecht, in 1713, handed it over to Austria. In 1859 it was returned to the kingdom of Italy. It is 480 ft. by 180 ft., with nave 158 ft. high on 52 piers, and has a roof 214 ft. across, a tower 300 ft. high, and 136 spires or pinnacles. Lat. of light-house 40° 50 N., long. 14° 16 E. Mean temp. 47° (Jan.) to 76° (July). It has 2vo principal entrances; that by the Ponta della Maddalena, near the Bay, is the most striking. Most of the houses are lofty, and the streets narrow; there are however several open spaces or squares; as, Piazza del Municipo; Piazza del Plebiscito, in front of the Royal Palace; Piazza Dante, in Via Roma (former Strada Toledo); Piazza Cavour, near the Museum; and Piazza dei Martiri (with its Victory monument); many of them being planted with palms, &c. New villas are springing up in Corso Vit. Emanuele, Corso Garibaldi, and other parts; as well as at Mergellina, a new bathing place beyond the Chiaja. The sewerage is improving, but the supply of good water is deficient. Trade is increasing.

Churches.—Of its 260 *Churches*, those best worth a visit are the Gesu Nuovo, in the style of St. Peter's at Rome; the San Severo a private chapel, (good statues of Christ, of Modesty, and Christ on the Cross); San Francesco de Paolo; the Cathedral; the San Martino, (extremely rich in paintings and precious marbles); the Santa Chiara or Second Cathedral, one of the finest in Naples; St. Domenico Maggiore, containing the tomb of the Anjouin and Aragonese monarchs, and many precious objects of art. Also, San Severino e Soggio; La Incoronata, remarkable for the fresco of Giotto; San Filippo Neri; San Lorenzo Maggiore; St. Maria del Carmine; all of them adorned with pictures, &c., of the first masters.

The Royal Palaces of Naples, Caserta, Capo di Monte, &c., may be viewed gratis by special permission. The *Museo Nazionale* (formerly Borbonico) possesses, besides a picture gallery, mosaics, gold and silver ornaments, vases, &c., discovered at Pompeii and Herculaneum. Indeed this Museum is in some points unique, especially in its treasures of ancient art. The building is divided into Fourteen departments. Open every day (except Mond.) 10 to 3, for 1fr.; Sund. and Thurs., free. Royal Library contains 250,000 vols. besides more than 1700 papyri, found in Herculaneum. For Summary, see *Special Edition*.

The Albergo del Poveri is a refuge for paupers and orphans. Monte de Misericordia, founded by Charles III, gives relief to 5000 poor, and pays the debts of deserving individuals.

Environs.—Within a few miles are *Virgil's Tomb*, at the end of the Chiaja; the grotto of Posilipo; the ruins of Pozzuoli; Lake Avernus, Baiæ and Misenum; the islands of Ischia, Procida, and Capri; the coast of Castellammare and Sorrento; Vesuvius, and the fields of lava; the streets of **Pompeii** (p. 525), and the excavations of Herculaneum. See Special Edition. **Pozzuoli** is a warm, dry spot near the Temple of Serapis, with a sandy soil, sheltered by hills, in view of Baiæ and Posilipo. **Hotel**—Grand Bretagne (Mrs. Dawes). Good Capri and Falerno Wine.

Ascent of Vesuvius—about 8 hours here and back from Naples; or 2½ hrs. from Prof. Palmieri's observatory (2080 ft. high), it is advisable to take refreshments. The cheapest way is to take tram to Portici, and thence on horseback, via Resina, to a little past the Hermitage and Observatory. If you want a Guide engage one from your Hotel. Or, a Guide may be got at the Resina office; fixed tariff 6 fr.; horse 5 fr.; donkey 4 fr. Have nothing to do with the troublesome gang who offer to pull you up the mountain. A hauler 3 frs.; chair 20 fr.; but neither horse, chair, or hauler is required; the help of a gentleman of the party is enough. A suck of lemon will be found more refreshing than the Lacryma Christi wine sold at the Hermitage. Punta del Nasone, on Monte Somma, is 3747 ft. above sea; but the highest point, Punta del Palo, is 3389 ft. A wire-rope Railway is now open.

A grand eruption broke out on 25th April, 1872, in the Atrio de Cavallo, near the Observatory; the lava pouring from four new mouths down to Torre del Greco, Camaldoli, Resina, &c. Columns of dense white smoke like fleeces of wool ascended to a height of 5000 ft., attended by earthquake shocks, and a deafening roar, "like millions of claps of thunder"; while clouds of ashes, dust, and stones were carried 10 or 20 miles.

The ruins of **Paestum** may be visited in a day. Take an evening train to Salerno, start early the next morning, and return to Naples in evening. The three magnificent Temples of Neptune, Vesta or Ceres, and Basilica, are in a fine state of preservation; and supposed to be 2500 years old. Another excursion is by rail to **Castellammare** (1 hour) and thence to **Sorrento**, by carriage along the side of the Bay (1½h); one of the most beautiful rides in Italy.

Festivals.—The 8th of September (the Nativity of the Virgin) is the greatest festival in the year. Another great feast is that of St. Januarius the martyr, whose blood is said to liquify on that occasion, 19th Sept., as well as on the first Saturday of May and December 16th. The body of the saint is in the crypt of the cathedral of San Gennaro. Festival of the Constitution, first Sunday in June.

ROME, the capital of the Kingdom of Italy, the city of the Popes, and once of the Cæsars, is situate on the Tiber, partly on a plain, and partly on low hills with their intersecting valleys, about sixteen miles from the mouth of the river. The Tiber divides the city into two unequal parts. The smaller on the right bank is called the Leonine city, and Trastevere. Walls of 15 miles in circuit surround the entire city. The modern city is built upon the Campus Martius of the ancient Romans, lying along the banks of the Tiber, to the north of the **Seven Hills** which formed the site of ancient Rome. Four of these hills, are now almost entirely deserted, or covered by gardens, vineyards, broken buildings, or ruins.

Rome is entered on the high road from Florence by the Porta del Popolo, built by Vignola, from designs by Michael Angelo, in 1561; and opening upon Piazza del Popolo, at the foot of Monte Pincio. At the centre stands the fine obelisk of Rameses I., the "oldest of old things" here.

Some of the streets are re-named; thus Via Porta Pia is V. de Venti di Settembre (when the Italian troops occupied Rome, 1870). The Senate House is at Palazzo Madama; House for the Deputies, in the former Police Office on Monte Citorio.

CHURCHES.—About 370 in number, seven of which are Basilicas; the principal ones are as follows:—St. Peter's, St. John Lateran, Santa Maria Maggiore, and Santa Croce in Gerusalemme, within the city; and St. Paolo, San Lorenzo, and San Sebastian, *extra muros*.

The largest, **St. Peter's**, stands on a slight acclivity, in the Leonine city, in the N.W. corner of Rome. It is built in the form of a Latin cross, the nave being in length 607 feet and the transept 444 feet. The east front is 396 feet wide and 160 feet high, whilst the pillars composing it are each 58 feet high and 8½ in diameter. Height of Dome, from the pavement to the cross, 448 feet. It contains 46 altars and 400 statues. In front there is a large piazza, on the site of Nero's Circus. It occupied a period of 176 years in building, and required 350 years to perfect it. It cost £10,000,000; covers eight English acres, and is kept in repair at a cost of £6,300 per annum. To take it all in, it must be visited again and again.

The Chapel of the Presentazione, has the tomb, of Maria Clementina Sobieski, wife of the Pretender, James III.; she died at Rome in 1745. Opposite to this is Canova's Stuart Monument, erected by George IV.

San Giovanni in Laterano, St. John Lateran, is the Pope's Metropolitan Church, he being its official minister. It is in this church, also, that the Popes are crowned. It contains the famous chapel of the Corsini, reckoned the finest in the world, and stated to have cost £400,000. The Lateran Palace and Museum should be visited.

The other Basilicas, particularly St. Mar's Maggiore and Saint Paolo, are equally interesting to the traveller, especially the latter, which is outside the Walls on the site of a former basilica, as old as Constantine, burnt about 30 years ago, except some valuable pictures. The new church, now replacing it, is a superb building. San Luigi de' Francesi, the splendid marble Jesuit church of the Gesù, with many others, deserve attention.

Among the sacred sights of Rome are the **Catacombs.** The best guide to these memor-

tals of the early Christians, is Cavaliere Rossi's *Roma Sotterranea*. Those of S. Agnese outside Porta Pia, are open Sundays, Tuesdays, & Thurs.

PALACES.—The **Quirinal**, or Palace of Monte Cavallo, on the Quirinal Hill, is the residence of the King of Italy, Humbert I.

The **Vatican** or seat of the Pope, Leo XIII, elected 1878, dates from the eighth century; having become dilapidated, it was rebuilt by Innocent III. in the twelfth century. It stands over the Vatican Hill, adjoining to St. Peter's; covers a large space; and is 1,151 English feet long, and 767 feet broad. It contains 4,422 chambers, and has eight grand staircases and two hundred smaller ones, and twenty courts. In it are the Proclementine and Chiaramonti Museums, both filled with master-pieces of painting and sculpture, including the *Transfiguration* of Raphael, the *Apollo Belvedere*, the Etruscan Museum, collected by Popes Gregory 16th and Pius 9th. Here also are Raphael's painted *Loggie* and *Stanze* (open to Students, 10 to 3); the *Sistine Chapel*, with M. Angelo's *Last Judgment*, built in 1473; and the Vatican Library, containing the richest collection of manuscripts in the world. The Pope's country seat is at *Castel Gandolfo*, near Albano.

The **Capitol** occupies the square of the Capitoline Hill, called the Piazza del Campidoglio, the site of the ancient Capitol; and contains the palaces of the Senators and Municipal Magistrates of Rome. The College della Sapienza, a university of Rome, founded by Innocent IV. in 1244, is one of the oldest in Europe. Notice, the Royal Lyceum, or Biblioteca Vit. Emm. (formerly Collegio Romano or Jesuits' College), with its extensive Library, and the College de Propaganda Fide. The subterranean church of St. Peter's should not be passed by; there are many tombs of Popes, Emperors, and Kings, including the Stuarts. Orders to be obtained of Cardinal Mertel, Pal. della Cancellaria. Notice, also, the *Scala Regia* and Grand Entrance to the Vatican, north of the Basilica. Visit the lakes of Albano and Nemi, and the ruins of Tusculum, in the environs. Mr. S. R. Forbes's excursion every Tuesday.

Antiquities (Pagan):—These are legion, and must be looked for in a Special Guide (see *Bradshaw's Italy*). We can only enumerate—the Colosseum Amphitheatre; the ruins in the Forum, including Temples of Vespasian, Concord, and Saturn; Arches of Constantine and Titus; Palace of the Cæsars, on the Palatine; the Pantheon (now a church dedicated to Sta. Maria ad Martyres), in which Raphael and Victor Emmanuel (1878) are buried; Baths of Caracalla and of Titus (both open daily, 1 fr.) and of Diocletian; the Circus Maximus; Castle of S. Angelo; Trajan's Column; the Cloaca Maxima; the Aqueducts; the Tombs of Cæcilia Metella, and of the Scipios. See Mr. J. H. Parker's *Archæology of Rome*, with about 800 photographs.

Lat. of Campanile 45° 26′ N., long 12° 20′ E. In the midst of the labyrinth of canals & streets there are several Piazzas (or campi), nearly all adorned with fine churches or palaces. The principal of these is the *Piazza di San Marco*, an oblong area 562 ft. by 232 ft., surrounded by elegant buildings, and containing the metropolitan *Church of San Marco*, a singular but brilliant combination of the Gothic and Oriental styles. It was made a cathedral as late as 1807, when the patriarchal seat was removed to it from San Pietro; but was founded as early as 828, by Doge Guistiniano Participazio, to receive the relics of St. Mark, from Alexandria. It has 4 bronze Horses of Nero's time, 500 marble pillars, numerous gilt and other Mosaics, from 11th cent., and rich altars (one said to rest on Solomon's Temple).

In the Piazza is the *Campanile*, 316 ft. high, and 42 ft. square, with a pyramidal top, to which the ascent is made by an inclined plane; also, the 3 cedar flag-staffs for Cyprus, Candia and the Morea. The Library of St. Mark is a nobly designed building, of two orders Doric and Ionic.

The Zecca or Mint adjoins the Library on the Molo. The *King's Palace* makes part of the Procuratie Nuove, and has paintings by Bonifazio, Tintoretto, etc., (1 fr.) The *Doge's Palace* (10 to 3, 1 fr.), or Palazzo Ducale, is situated on the eastern side of the Piazzetta, and was rebuilt 1354-5 by Doge Marino Faliero. It contains the Giant's Stairs, the Lion's Mouth in the Bussola Room, bas-reliefs, library of MSS. and coins, and pictures by Tintoretto and P. Veronese of events in Venice history. The first Doge or Duke was elected 697; the last was displaced and died 1797. The first palace built on the spot was in 820. Notice the Bridge of Sighs, the prisons, and other old buildings.

The following CHURCHES should be seen (6 to 12 free; later ½ f.)—S. Maria della Salute, by Palladio; SS. Giovanni e Paolo or "Zanipolo," a fine 13th century gothic; S. Wed., Fri., 10 to 1); Giovanelli, lately restored, with picture gallery. Ferro (an hotel), which is shown as "Desdemona's." Palazzo Moro, in Campo del Carmine, was the house of Christofero Moro, said to have been "Othello." Titian's house faces Murano.

The *Accademia* delle Belle Arte (10 to 3, 1 fr.), with its extensive gallery, is in the ancient Convent of della Carita. Museum of Antiquities at the old Patriarch's Seminary, near the Dogana (Custom House). Chief Theatre La Fenice; others are the Apollo and Rossini. The Arsenal and its relics (10 to 3), near the Port and Public Gardens. On Lido island, which marks the shore of the Adriatic, is the Armenian Convent of S. Lazzaro, where Byron stayed some time. The tide rises 2 to 3 ft. A steamer trip to Chioggia and back, gives a good notion of the Lagoon, and of its sea-walls.

A large city, 59 miles from Messina, at the foot of Mount Ætna, with wide straight streets, and a new Mole; founded by a colony from Chalcis, 750 years B.C. Its Greek amphitheatre is buried out of sight. It has suffered much from earthquakes, is almost built of lava, and has been nearly destroyed by Mont Etna several times, but especially in 1669 when 27,000 persons perished. The cholera carried off 7,000 in 1837. It contains a University, a Lyceum, a Public Library, the Biscari Museum; with 108 churches and convents. It is lighted with gas. The silk stuffs are excellent; yellow amber is found. A road runs close to the sea, near the rail; and high up are numerous towns, villages, and castles. The Benedictine Convent of S. Niccolo should be visited.

The town is a resort for invalids, as well as a good point of access for **Mount Ætna** or **Etna** (called by the natives *Mongibello*), the peak of which is 30 to 40 miles distant, 10,874 feet above sea level. It is 90 miles round at the base; where palm and sugar grow, while the top is covered with snow. You reach this after passing three principal regions, called Piemontana (at the bottom), Selvosa (middle, where the Great Chesnut grows), and Deserta (near the top). The ascent is usually made at night, in order to *see the sun rise*. For this, drive to **Nicolosi** (pop. 3120), 3 hours. INN here; but luncheon and wine had better be taken from Catania. Thence with a guide to Casa Inglese, 6 hours; near the Piano del Lago (a plateau, 9760 feet above sea), Val di Bove, and Torre del Filosofo. At the Monti Rossi are little craters (450 feet high) and beds of lava. Hence to the top in 1½ hr. The cone of cinders is practicable for ladies who can ride upon mules, and do not mind the piercing cold. As the sun rises, the vast moving shadow of the mountain is projected over the country behind. The view takes in all Sicily, the Lipari Islands, &c., with the neighbouring coasts of Italy.

SPAIN.—(*España*—Ancient *Hispania.*)

The Railway is called *Camino de Hierro*, or *Ferro-carrile.*

Books.—Bradshaw's Handbook to Spain and Portugal, by Dr. Charnock, F.R.G.S. &c. With Illustrations, Town Plans, &c., and Travelling Map for Spain and Portugal. Price 7s. 6d.

The interior of Spain being generally elevated is not so warm as might be expected from the latitude; and its temperature is more regulated by elevation than geographical position. It is the configuration of this country which accounts for the aridity of soil in the interior of the Castiles, the want of water, and that difference of temperature observable between Madrid and Naples. Of its large **Rivers** the Ebro runs to the East; the others, the Douro, Guadiana, and Guadalquivir, run West; their basins being divided by **Sierras** or chains of mountains, viz.:—The Asturian, on the N.W., in continuation of the Pyrenees, rising 8,790ft. above the sea, at Picos de Europa, near Potes; the Sierra Gredos, Guadarama, and Moncayo, 10,500ft. high; Sierra Guadalupe, 5115 ft. high; Sierra Morena, west of Cordova; and the Sierra Nevada (or snowy), in Andalusia 11,664ft. high, at Cerro Mualhacen, the highest in Spain. Pic Nethou, in the Pyrenees, is 11,170ft.

Government.—The Revolution that broke out, Sep., 1868, drove Queen Isabella from the throne, and changed the Government to a Republic, which, under the guidance of General Prim, lasted till December, 1870, when Victor Emmanuel's second son, Amadeo, Duke of Aosta, was chosen king, as Amadeus I. He abdicated on the 12th of February, 1873; and a Republic was again proclaimed; followed by civil war. Marshal Serrano became President, 1874. On 31st Dec., 1874, Alfonso, the son of Q. Isabella, was proclaimed King, as Alfonso XII. He was born 1857; and married in 1878 his cousin Mercedes, who died the same year. On 30 Nov. 1879, he married his present Queen, the Archduchess Maria Christina, born 1858. He received part of his education at the Military College, Sandhurst. The Cortes are composed of two legislative bodies—the Senate (not to exceed 180 members), and the Chamber of Deputies (one Deputy being elected for every 5000 inhabitants).

Population (1877) 16,628,400; besides 25 millions in the Colonies. There are 14 Territorial divisions, and 49 Provinces, including the Balearic and Canary Islands. **Expenditure.**—(187-) about 29½ millions sterling; against a Revenue of 29½ millions. **Debt** 515 millions, besides interest unpaid. **Army.**—About 100,000 men on a peace footing. **Navy**—123 Steamers (9 being ironclads), with 515 Guns, and 22,500 Seamen. About 3,850 miles of **Railway**, and 8,440 miles of **Telegraph**, were open (1877).—Telegram to U. Kingdom, 6d. a word.

Commerce.—Exports and Imports to and from England (1877) 10¾ millions and 4¼ millions respectively. Sherry is exported from the Trocadero and Port St. Mary, opposite Cadiz; and a Liquor wine from Tarragona. The wealth of its corn, and wine, and oil, favoured by a sunny climate has scarcely any limit. Two-thirds of the commerce are carried on with France and England. *Baggage* is examined at the seaports, and the frontier places of Irun, Figueras, and Badajez.

Tours.—The tourist may enter Spain—1, by P. & O. Steamers from Southampton to Gibraltar; 2, by rail and water, *viâ* Paris, Marseilles and Barcelona—frequent and good Steamers; 3, by Paris, Bordeaux, Bayonne, Irun, Vitoria, and Burgos—this is the favourite route; 4, *viâ* Paris, Toulouse, Narbonne, Perpignan, over the frontier at Cerbere to Figueras and Barcelona. *Leather* portmanteaux resist rough usage better than *wooden* trunks.

Postage.—To U. Kingdom, 2½d. for ½ oz., Cards 1d. Mails twice-a-day, *via* France. Money Orders (only for Gibraltar) see p. xlvii. In Spain, post your letters at the Hotel office.

Churches.—Most closed at mid-day. A fee (silver) will always open a church at any hour, but then the sacristan must be found; and from 12 to 3 he generally enjoys his siesta.

Money.—Since 31st Dec., 1870, the monetary system of Spain and her Colonies has been as follows:—100 Centimos = 1 Peseta, = 9½d. = a franc nearly. Gold Coins.—100, 50, 25, 20, 10, and 5 Pesetas. Silver Coins.—1, 2, 5 Pesetas, and 20 and 25 Centimos. Bronze Coins.—1, 2, 5, 10 Centimos. 100 Pesetas = £4 0s. 10d.; 10 Pesetas 7s. 11d.; and the other coins in proportion. A 25 Peseta gold piece is nearly equal to a sovereign. [From "*The Merchant's Handbook.*"—By W. A. Brown, LL.D. London: Stanford.] Money was formerly reckoned in reals = 2½d., and dollars or duros of 20 reals. A peseta = 4 reals; escudo = 10 reals; a dollar = 50d., but varies with the market price of Silver and the current exchange. 5 dollars = £1 0s. 10d. = 100 reals. A gold onza (ounce) = 16 dols. = £3 6s. 8d. Besides bronze centimos of a peseta, there are 2½ and 5 cent. pieces of an escudo = ¼ and ½ real respectively. In Catalonia (Barcelona, &c.,) these hundredths of a peseta are not recognized; but the bronze coins are called cuartos; and 8½ cts. = 1 real, or 34 cts. = 1 peseta. "Much bad money is current, especially gold. Silver coins with holes in them should not be taken. Railway buffets pass off a good deal."—*H.P.P.* When receiving change at diligence offices, railways, hotels, or from boatmen, examine your coin. Provide small change before starting for a journey.

Language.—French, English (at some of the ports), and German are sometimes spoken at the principal hotels in large cities. See Bradshaw's *Anglo-Spanish Phrase Book* for Travellers and Students price 1s., W. J. Adams. Cervantes, the author of *Don Quixote*, was born at Alcala de Henares, near Madrid; but for a beginner he is hard and old fashioned.

Travelling—The Railways are slow but comfortable; the railway stations indifferent; the fares high,—and now higher than ever, since a government tax of 15 per cent. was imposed. The conveniences for ladies and families are miserable. Refreshments are dear and indifferent. The trains start at Madrid time. Baggage is examined at your destination station—unless a pour-boire is given. Smoking is rarely prohibited. Use coloured spectacles. Ask the price of everything at hotels and shops; as a rule less will be taken than is asked. Travellers are usually put into expensive bed-rooms on their arrival; inquire the charge for the night. Living in hotels by the month is cheap,—from 25 reals a day; usually 35 reals. For two days' stay, 40 reals per day is charged. Living *en pension* should include room, breakfast, dinner, service, and lights. The Diligences are generally crowded and dirty; and Spaniards love smoke and closed windows. Diligence fares are high; if quick, £2 per day may be calculated on. Spanish steamers are irregular, and not clean. Keep your temper, as Spaniards will not be hurried, and have a keen sense of personal dignity. *Circular Tickets* for the Peninsula, at reduced rates, issued at Irun and Perpignan.

During March, April, and May, travelling is agreeable. The summer heats subside in October. In Andalusia, winter may be pleasantly spent. It begins to get hot in April and increases till July. Granada is much frequented for relief from summer heats; Malaga is then a good resort for warmth.

General Hints.—An experienced Courier, Mr. R. Marsch, says, "*Passports* are required in Spain. Before you leave England, get the visa of the Spanish and French Consuls. When embarking in a Spanish port, the Passport must be left at the office before Tickets will be issued. Do not trust agents for information, but go straight to the office, or, better still, go to the English Consul. As to *Money*, provide yourself with sovereigns and napoleons; paper is not easily changed. Even with gold, a deduction of 5 per cent. must be submitted to; that is, you will get only 19 (instead of 20) pesetas for a napoleon, and only 21 (instead of 25) for a sovereign. Do not expect the comforts of a Swiss or French Hotel; be content with plain food; wines are poor and dear. Take meals at the public table; the first from 10 to 1 o'clock; the second about 6.30. Servants are charged in the bill, but they expect something more. Telegraph for apartments; and a conveyance will be sent to the station, with a porter to clear your things. Going from Paris to Madrid, *Luggage* can be registered. At Irun it is examined, the Spanish officers being very particular; on return, it is examined at Hendaye on the French side. As to *Expenses*, everything is dear—railways, porters, cabs, diligences, boats; and people will take advantage if they can." The conclusion is, that a Courier speaking the language will save the traveller much trouble and extortion.

Caution.—The climate of Madrid is one of the most trying and treacherous in Europe. The town is at a great altitude on a bleak plain, exposed to a broiling sun and dry icy winds from the Sierra de Guadarrama. The spring is especially dangerous; be sure to cloak well morning and evening. Madrid is cold and damp in winter; hot and dusty in summer. The agreeable months are March and April, October and November; the rest are almost unbearable. Mean temp. 43° (Jan.) to 79° (July).

Madrid, 538 m. from Bordeaux, in one of the five provinces of New Castile, was made the capital of Spain, by Philip II., from being supposed to be at its centre. It is built in an uninviting locality, on some sandy hills upon the left bank of the Manzanares; and has a fine view from the Palace of Guadarrama range. The valley of the Manzanares, has some orchards and woods.

The city is about 8 miles in a circuit of brick wall, and contains upwards of 8000 houses, with 146 churches and other religious buildings, 18 hospitals, 13 colleges, 15 academies. 15 public libraries, 6 prisons, 15 granite gates, 85 squares, and plazas, 33 fountains, and 50 public wells which supply the city with a little excellent water brought from the mountains, 30 miles distant. The modern part has good houses, and straight streets paved with flint, and lined with foot-pavements. *Calle de Alcalá* is the best street. The *Puerta del Sol* is a large open area, where eight of the principal streets meet, and in which there is a great thoroughfare. In the pretty square of the Prado is the *Dos de Mayo* (or 2nd of May), an Obelisk, surrounded by allegorical figures dedicated to 3 artillery officers, killed at their guns, in the massacre of 2nd May, 1808, by order of Murat. In Plaza Mayor (or de la Constitucion) the Autos de Fé took place; Plaza S. Ana contains the Teatro Espanol; Plaza de la Cebada has a new Market; in Plaza S. Anna is a statute of Calderon.

The royal *Palace*, in Plaza del Oriente, is a magnificent square edifice, each front 470 feet long and 100 feet high, all built of white stone and enclosing a court 140 feet square. On the south side of the palace is the royal Armoury

(armeria) which contains Columbus's armour among his other historical relics. It is open to any person with passport (no difficulty). In the Plaza are statues of Spanish Sovereigns, including the great equestrian statue of Phil. IV.; and the Opera House or Teatro Real, facing the Palace. Near the Palace of the Cortes is a statue of Cervantes. The royal Stables contain 300 horses, 250 mules, and 124 carriages, with endless apartments for livery dresses and harness rooms. Bull fights, generally on Sunday and Monday; office for tickets in Calle de Alcala.

La Fuente Castellana is a walk, about 1½ m. long.

Besides the Opera House there are six *Theatres* and three Circuses. Among the scientific and literary institutions are the Royal Spanish Academy, containing a museum of Natural History, and a few very fine pictures; the Royal Academy of History; and the Estudios Reales de San Isidro, a kind of university, which has sixteen professors. The two largest *Libraries* are, the Royal Library, containing 200,000 vols., some valuable MSS., and a rare collection of coins, illustrative of Spanish history; and the Library of San Isidro, consisting 60,000 vols.

The new *Museo*, in the Prado, near the Dos de Mayo, is a magnificent gallery of 2000 pictures, of which 46 are by Murillo; 10, Raffaelle; 52, Rubens; 54, Velasquez; 34, Tintoretto; 43, Titian. Admission free on Sundays and festdays; on other days, 2 rls.

Many olive trees date from the 15th century when planted by the Venetians. Few traces of the legendary glories of the city of the Phæacians

or of old *Corcyra* exist; but the Homeric enthusiast may, perhaps, identify the sites of the palace and gardens of Alcinous, of the landing place of Ulysses, and of his meeting with Nausicaa, or may see his Ship turned into a rock at the entrance of the old harbour.

The town has St. Spiridion's Cathedral, a hospital, asylum, aqueduct, and light-house. Fine view from the dismantled Citadel (in lat. 39° 37' N., long. 20° 6'E.—to be seen by a pass from commandant), the seat of the English Lord High Commissioner down to 1864. Here are Sir T. It is intersected by the Bavella mountains, a picturesque granite ridge of snowy peaks, rising 8690 feet Paglorbo or Monte Rotondo; from which may be seen on a clear day the whole amphitheatre of the Mediterranean from Toulon to Naples, as well as the island of Sardinia.

Two lakes—"Creno" and "Ino"—are craters of extinct volcanoes. Its splendid forests include beech, birch, oak, and pines occupying the higher regions; then the chestnut trees, covering a wide tract of the "Castegneccia;" and the olive trees towards the coast. The wines of Cap Corro and Salano are excellent. The lowland where uncultivated, is all covered with brushwood, termed "maquis," which consists of myrtle, lentiscus, cystus, and various heaths, &c. The "moufron" or wild sheep, and the wild boar still afford good sport. Coal, iron, marble, porphyry, and various granites are found. Copper, silver, lead, antimony, and asbestos, are worked by two English companies. The chalybeate waters of **Orezza**, and the sulphur springs of Guagno, near Ajaccio, are in much repute. Most of the streets bear the name of some member of the family.

Notice an allegorical statue of Napoleon in marble, in the market-place; and another of himself and four brothers. The town is very clean, and the principal street is planted with a double row of acacias. Orange, lemon, and cedrat trees, are abundant. It is well supplied with water by an aqueduct from the Gravona, and with gas. There are some good villas; hired carriages can be got. The climate of Malta is excellent in the winter; and, there being an admirable new market, provisions of every kind are good and cheap. As the residence of a Governor and large garrison as well as of the Admiral of the Mediterranean fleet, from October to May, it is a favourite resort of visitors. Bands play every evening, alternately at St. George's Square (Valetta), Floriana, and Sliema; and excursions are daily made to places of interest. Temp. in the shade, in Oct., about 74° F., decreasing till Jan.; then about 52° to 68° to May; then 78° to 95° to Oct.; but the wind is often keen in winter, and warm light clothing is worn till May. The sirocco or S.E. wind occurs throughout the year at intervals, producing lassitude and dyspepsia; and Malta is not a good place for persons with delicate lungs or weak hearts. Large sewage works have been made. Fountain water is supplied by the Wignacourt Aqueduct, 9 m. long, made 1616. Rain water in cisterns is not good. Average rainfall (1867-77), 19.4 inches. No wood seen except at the Governor's gardens.

The *Church of St. John*, built 1576, during the time of Grand-Master La Cassière, is full of monuments of knights in the side chapels; and contains rich tapestry, with a mosaic pavement of coloured marbles, jasper, agate, and other stones. All the churches in Malta are handsome. St. Paul's was built by Q. Adelaide. The other **Sights** in the City and Island are—the Naval Arsenal, and the Hydraulic Lift; the Forts (Sir R. Abercrombie is buried at S. Elmo); Boschetto and S. Antonio Gardens, belonging to the Governor; Mounta Church, like a beehive; and Città Vecchia, the old capital (7½ m.), where the R. C. Archbishop lives. Further on are the Church in St. Paul's Bay, where the Apostle was wrecked inside Salmonetta Island, where the "two seas" met; Mellicha Church; and the Convent and Grotto of Calypso, with dried mummies of monks in the catacombs.

Malta is governed by its own laws, passed by the Governor and a Council of sixteen members. The R. C. Archbishop is appointed by the Pope, the revenue being above £4,000 per annum.

The modes of conveyance,—the time occupied *en route*,—the probable expense of the journey,—together with a list of the best Inns and halting-places are given. Tourists are supposed to start from the termination of the Swiss, Bavarian, Italian, and French railways.

They can also make selection from any one of the different Passes, starting from or leading to Innsbrück, Bregenz, Coire, Brigue, St. Michel, Briançon, and Nice. On these Passes, religious houses were established from very early times, to take toll of Pilgrims going to Rome.

A.—ITINERARY OF THE PASS OF THE SIMPLON.

Leaving the Railway at **Brigue**, proceed by diligence to Domo d'Ossola, 40½ miles, time 10 hours, cost 16 frs. 15 cents. Proceeding thence to Arona at the foot of Lago Maggiore, and ascending the same, the tourist would choose between the Bernardino and the St. Gothard passes for his return route. The expense and time occupied are about equal. Selecting the Bernardino for the return route, the calculation will be made accordingly. From Domo d'Ossola by diligence to Baveno; boat to Isola Bella and back, thence by steamer, three times a day, in about 2½ hours; cost, 2 francs, to Arona, 22 miles: from Arona ascend the Lake by steamer to Magadino, 40 miles, time 5½ hours, cost 4 frs. 85 cents; thence by diligence to Bellinzona and Bernardino, 49 miles. time 10 hours, cost 14 frs. 50 cents; thence to Coire by diligence, 58 miles, time 9 hours, cost 12 frs. Total expense for the tour of the two passes, and the Lago Maggiore, distance 303 miles, time 50½ hours, cost 70 frs. 85 cents. The best season to pass the Alps is from 15th June to 30th October. From the Italian side of the Alps the passes are approached from Domo d'Ossola, Bellinzona, Chiavenna, Fenestrelles, Cuneo, Susa, Trent, &c. In the winters of 1829 and 1838, the writer of this made two journeys from Arona to Geneva on a sledge, in about 40 hours each journey; the travelling was free from danger, and most agreeable; the cold anything but intense.

Pass of the Simplon.—This stupendous work was commenced by order of Napoleon I.

Digitized by Google

in 1801 (after the battle of Marengo), and was finished in 1806, costing £5,000 per mile; upwards of 25,000 workmen were employed daily on this magnificent road, which measures throughout the passage 25 feet in width. There are 60 bridges thrown across the rocks, 302 viaducts, 5 tunnels hewn out of solid granite, and numerous galleries which required great skill and ingenuity to construct. French engineers executed the road on the Swiss side of the mountain, whilst the most difficult and almost insurmountable part on the Italian side, was accomplished by the distinguished Chevalier Fabbroni (author of the Collection of Wax-work in Florence).

On leaving Brieg the traveller commences ascending the Simplon by long zigzags. On the right is seen the handsome covered wooden bridge thrown over the Saltine, a river larger than the Rhone, with which it unites but a few miles distant; the road winds at the foot of Glysthorn Alp, and directs its course towards the Kienhorn. After skirting some precipices, it ascends by bold windings through gloomy forests of Alpine firs, to the First & Second Refuge; there were originally twenty of them at equal distances between Brieg and Domo d'Ossola.

Beyond the first gallery is a bridge 80 feet in height, thrown over the Gantar, and beyond the second refuge there are fine cascades. The openings of the forests and the sinuosities of the road present beautiful views of the valley of the Rhone, encircled by gigantic snow-crowned Alps, the Jungfrau towering above the rest. The Post Inn of Berisal is attained (the Third Refuge), an excellent resting place; a clean house, good cooking, civil landlord, and moderate charges. After passing the Gantar, we pass, on the left, a fine cascade, and arrive at the Fourth Refuge. This part of the road is lined by larches mixed with firs; two bridges, those of the Asback and Saltine, and a tunnel 90 feet long, are arrived at. To the left is the glacier of the Kaltwasser, whence descend four cascades, whose waters, falling on the rocks on the side of the road, are conveyed under its foundations in aqueducts. Continuing to ascend by a beautiful winding road, the Fifth Refuge is attained, which stands on an eminence exposed to violent gusts of wind. Before reaching it is the gallery of Schalbeck. Here trees cease to flourish, flowers are no longer seen, and an avalanche has rooted up the blighted firs and larches, and suspended them on each other over the abyss.

A long and dreary gallery leads from this desolation to the Glacier Grotto, 180 feet long, immediately beyond which is the most elevated part of the whole passage. The traveller now arrives at the Sixth Refuge, & the barrier where toll is taken. A little above this is a large wooden cross, indicating the culminating point of the **Pass**, which is 6500 feet high, and from whence is descried the magnificent chain of the Bernese Alps, and nearer, the Glacier of Aletsch. On the left of the road is seen the NEW HOSPICE, founded by Napoleon, but not completed till after his overthrow, when the brotherhood of the monks of St. Bernard purchased it in 1825, for the sum of 15,000 francs. In the establishment they placed four of their brotherhood (of the order of St. Augustine), with a sufficient number of domestics, and dogs of the original St. Bernard breed. The edifice contains several sleeping rooms, a saloon, a refectory, a chapel, and about thirty beds for indigent wayfarers, who are lodged and fed free of expense. In stormy weather the dogs are used to go with the monks to trace out the paths, and the dangerous places in the snow, in search of travellers; from 12,000 to 15,000 of whom are received by the brotherhood annually.

From the New Hospice to Simplon the road descends gradually on rocky and treeless slopes. The village of Simplon is a scattered hamlet, encircled by the summits of the Alp whose name it bears; it is situated 3,260 feet above the level of the sea.

The descent to Domo d'Ossola displays on each side lofty and barren rocks, with spaces between them occupied by pasturages, firs, and feathery aspens, and watered by the same impetuous torrent which is seen from the heights. Soon after leaving the village of SIMPLON, these rocks gradually approach each other, becoming perpendicular, and scarcely leaving sufficient space for the road, which descends by four or five zigzags to the Gallery of Algaby, and enters the valley of the Vedro. Just before reaching the village of Gondo, the road enters the Great Gallery 600 feet long, and on emerging from it, crosses the Fressinone by a stone-bridge. The hamlet of GONDO and the village and post-house of ISELLA (which last affords very good quarters), are then passed. At Iselle is the Italian custom-house. From thence to the Bridge of Crevola is about nine miles.

As the traveller advances, green fields, vineyards, orchards, elegant villas, and cheerful hamlets, meet the eye on every side. The rocks and mountains recede, and the road traverses a wide and fertile valley to **Domo d'Ossola.**

ANCIEN HOTEL DE VILLE ET DE LA POSTE.—(Diligence Office).

A party preferring to pass the Simplon *en voiture*, may hire a carriage and pair of horses at Brieg, the cost of which, comprising the *chevaux de renfort*, the barrier tax, and the coachman's fee, will not exceed 80 or 90 francs.

Pass of the Stelvio.—This pass opens annually on the 1st of July and closes on the 1st of October. The ascent commences at Prad, 3275 ft. in height: eight miles beyond which is the hamlet of Trafoi. The ascent now becomes steeper, and the road ascends by repeated zigzags to the Post House of Franzenhöhe. Extraordinary solidity is visible throughout the whole construction of this masterpiece of engineering—the work of Italians—begun in 1821, and finished in 1824. The summit of the pass is 9175 feet, and to effect an easy incline, forty-eight zigzags had to be constructed; the road is 15½ feet in width, and cost 3 million francs. Here are seen the Ortler Spitze and Madatsch towering majestically over the fearful pass, and covered with eternal snows. The summit is the highest carriage pass in Europe, and forms the limit of the Tyrol and Valtelline (Italian); the snows rarely leave this elevation in the hottest day in summer, and even then the winds are cold and very keen. From hence is a descent to Santa Maria (the custom-house for Lombardy), a spacious square building, erected for the triple purpose of custom-house, inn, and refuge, at an elevation of 8153 feet. Beyond this we continue to descend for an hour to the third refuge. Here is the extremity of the immense plateau of the Braulio. From hence commences another descent by numerous zigzags. Three miles below is the cantoniera of Spondalunga. No less than seven tunnels and galleries are constructed here for the protection of the road, their length being 2953 ft.; opposite is a fine cascade 525 feet high. In one hour from Spondalunga we arrive at the first gallery (Piatta Martina;) with a handsome bridge over a profound gorge. This spot is called "Wormserjoch," on the left is seen another fine cascade falling from a precipice into the bed of the Adda below. Beyond the last gallery is seen, close to the road, an immense rock, upwards of 56 feet high, brought down from the mountains by avalanches. Below this are the Baths of Bormio (p. 513), famous for its mineral waters, and the excellence of its honey. From Bormio an excellent road leads through the Valtelline, celebrated alike for the excellence of its wines and the richness of its pasturage. The Adda passes in its course the pretty towns of Bolladore, Tirano, and Sondrio (capital of the Valtelline), Morbegno, and Colico, on the Lago di Como.

C.—ITINERARY OF THE PASS OF MONT CENIS.

Mont Cenis (as the French call what the Italians call *Monte Cenisio* or *Moncenisio*), is the general name of the dividing ridge between the valley of the Arc in French Savoy, & the Dora Riparia valley in Italy, lately traversed by two railway routes, viz. the *Pass Route* along the road, and the *Tunnel Route* under Col de Fréjus. The two lines diverged, so that the Tunnel Line through the Col was 16 miles south west of the Pass Line; but the distance by either, between St. Michel and Susa, was about the same, 48 to 50 miles.

Pompey is said to have attempted making a passage over these Alps; but Napoleon in 1810 was the first to provide a road practicable and safe all the year round, though it traverses a part where it rises 5900 feet above sea level. His engineer was the Cavallere Fabbroni; 3000 workmen were employed, and the cost was eight million francs.

Mont Cenis Pass Rail.—At St. Michel the old break of 49 miles to Susa, formerly done by diligence in 9 to 10 hours, was in 1867 filled up by Fell's Climbing Rail, which was laid on the road, at its outer edge, and performed the distance in 4 to 5¼ hours. The first train went over the Pass 15th June of that year. The line was single with a middle or catch rail for safety. It ceased on the opening of the Tunnel Route, and the permanent-way was taken up. From St. Michel cross the Arvan on a stone bridge, then the Arc by another bridge, facing which is a rivulet of water which petrifies every substance it touches, and has consequently made for itself a natural aqueduct. Modane 13 miles. Here are situated Forto Lesseillon, which commands the pass of Mont Cenis. Near this the Tunnel Line diverges. La Verney, 10 miles, close to the double cascade of Benoit-Lanslebourg. (Hotel de Post.)

From Lanslebourg the ascent of Mont Cenis commences, and the road traverses picturesque and beautiful forests to La Ramasse. The most elevated part is a plain of 6 miles, encircled by the peaks of Mont Cenis, and containing the post-house and another inn (the Grand Croix,) the barracks, and a beautiful lake. Excellent trout, cheese, and butter are procured here. At the end of the lake, on the Italian side, stands the Hospice, at an elevation of 6365 feet. It was founded by Charlemagne, and restored by Napoleon. One room contains the bed used by Napoleon. Half of the Hospice is occupied by carabineers and custom house officers, and the other half by Benedictine monks.

The descent into Italy is much finer than the ascent from Savoy. The first gallery on this side is 650 feet in length, cut through solid granite. Opposite Ferriere is another gallery above 2000 feet in length. Here a wall of nine feet in height, and 600 in extent, defends the gallery from earth and loose stones. The scenery in this part is enchanting. Near Molaretto rise the fruitful hills of Chaumont, watered by the Dora Riparia. On the road are established 28 small Inns or "Houses of Refuge," provided with bells, which, during the prevalence of fogs, are rung to guide travellers from one refuge to another. The cantoniers who inhabit these inns are 50 in number, and form two companies, 25 on each side of the mountain. From St. Michel (as above) there is a way to Valloires

under the three *Aiguilles d'Arve*, one being 11,515 feet high.

Tunnel Route, about 48 miles long. This diverges from the other route at Fourneaux, a mile and half below Modane: winds up the Arc by a loop of easy gradients to Modane and the Tunnel mouth, 3904 feet above sea; then strikes through the great *Tunnel* under the Grand Vallon near Col de Fréjus; first, by an incline upwards of 1 in 45, to the middle, which is 4377 feet above sea, or 3480 feet below the crest of the mountain; it then slopes down by a very gentle decline of 1 in 2000, to the Italian mouth at Bardonnechia (which is about 440 feet higher than the French mouth); issuing out at the top of a magnificent glen. This is descended by 20 to 25 short tunnels, and about as many viaducts; past Oulx on the Dora Riparia, and Salbertrand, to Bussoleno, on the Susa and Turin main line.

The **Tunnel** is 13 kilomètres, or 13,393 yards, or 7½ miles 193 yards long; that is 4½ miles longer than the Lenerthe Tunnel, on the Paris and Lyons line. It is 19½ feet high, and 33 feet wide, widening a little at the mouths; is traversed by a double rail, the approaches outside being single; and is well ventilated, with an average temperature of 65 to 70 degrees.—See pages 54. and 250. It was begun 1857, finished December 1870, and formally opened 17th September, 1871; it cost about 6 millions sterling, divided between Italy and France. It was drilled from both ends, at the rate of 2 to 3 yards in 24 hours; the two parts at the final joining were only 1½ feet out of line vertically, and without any error horizontally. The tools were driven by hydraulic pressure supplied from the hills above; compressed air is supplied in iron tubes. The idea of this great work was first conceived by Medail, a road-maker of Bardonnechia; encouraged by Professor Paleocapa (afterwards Minister of Public Works), and carried out by his pupils—Sommeiller, a Savoyard, (died 1871), Grandis (also dead), and Grattoni, both Piedmontese. Many will still prefer to visit the sublime scenery of the Pass; but to the greater number the Tunnel will be an immense gain.

Susa.—Pop—3,635 —HOTEL DE LA POSTE.

Here as also at St. Michel on the other side of the mountain, Voituriers may be hired with carriage and pair of horses, to convey 2 or 3 persons, including all extras for Chevaux de Renfort, barriers and coachman's fee, from 60 to 65 frs.

Lago Maggiore.—The traveller visiting the lakes by the Pass of the Simplon will leave Domo d'Ossola, and proceed to Arona at the bottom of the Lago Maggiore; on his right he is accompanied by a lofty chain of mountains, stretching from the Simplon, and decreasing gradually in altitude until they are lost in the plains of Piedmont. Twelve miles from Domo d'Ossola is the village of Vogogna, (at the entrance to the valley of Anzasca, leading to Monte Rosa), hence to Ornavasso, known as the principal white marble quarry, which supplied that material for the construction of the cathedral of Milan. A short distance beyond this we come to Gravellona, (the road to Omegna, on Lago d'Orta, branches from hence to the right, distant 4 miles). In the vicinity are the celebrated rose granite quarries, in which are found abundance of that beautiful felspar, the flesh-coloured crystal, which furnishes the lapidaries, and may be met with in every jeweller's shop at the different watering places throughout Europe. Four miles hence we arrive at Baveno, delightfully situated on the shore of the lake; arrange at any of the hotels at Baveno to refresh there, and go at once direct from Baveno to the Isola Bella, either by steamer or by row-boat, which occupies 2 to 2½ hours, charge 4 fr., and *buonamano* 1 fr., and go after return to Arona, either by *road*, or by steamer three times daily: before taking a small row-boat, take care to ask for the tariff card.

The Borromean Islands.—On the surface of the Lago Maggiore rise four small islands. Isola San Giovanni is the smallest; it is situated close to the promontory of St. Remigio, dividing the waters of the lake which bathe the shores of Intra and Pallanza; the old chateau is partly occupied as a granary and partly going to decay. Isola dei Pescatori, (Fisherman's Island), is very picturesque, and although the circumference of it may be walked in ten minutes, yet within these limits a population of

830 is domiciled, chiefly occupied as fishermen and boatmen for the navigation of the lake. Isola Madre rises in the centre of the lake and is distant from the shore about 1½ mile. It consists of five gardens on terraces, rising one above the other, embellished with luxuriant flowers, shrubs, and forest trees, among which are seen the cedar and the cyprus in great perfection; the latter are near the pheasantry in the vicinity of the palace which crowns the whole, and which contains landscapes &c., by Tempesta, who is said to have taken refuge here after destroying his wife to make way for a mistress. Isola Bella, about one mile distant from the latter island, consists of eight terraced gardens one above the other, carpeted with flowers, refreshed by fountains, shaded by forest trees, and crowned with a noble palace which contains an exquisite collection of marble, some fine specimens of gilding, and a few good paintings by Tempesta, Luca Giordina, Procaccini, Schidone, and Le Brun; the subterranean apartments or grottoes contain fine statuary, mosaic pavement and fountains. In the chapel may be seen the tomb of R. Borromeo, elaborately executed by Bambujo, and considered a *chef d'œuvre*. The gardens and the palace are open to the public daily at a fee of 1 fr. to the custodian and 1 fr. to the gardener who accompanies the visitor. The Hotel Dauphin, on the island, is convenient, very good, and the charges are reasonable. Steamers call here three times a day in their upward, and three times a day in their downward course.

Nothing can possibly be more charming than the drive of 14 miles, between Baveno and Arona, by an excellent road winding along the margin of the lake on the left, while on the right the lawns extending from the villas to the handsome terraces on the side of the road, are covered with hedges of roses, eglantine, and *bignonia radicans* (this beautiful climbing flower grows most luxuriantly all along, in the gardens); a profusion of flowers and shrubs cover the lawns and terraces, among which, shaded by tall forest trees, are the hydrangia, the oleander, the aloe, the myrtle, the cyprus, the orange, olive, and a numerous family of magnificent trees and plants from every clime. This road is seen best from the steamer, which coasts along the shore. Nothing can prove more grateful than the genial mildness of the climate in early spring and late autumn; for the rose tree never ceases bearing during the year, while the inhabitants of the villages follow their avocations in the open air. In the neighbourhood are extensive palaces and numerous beautiful villas belonging to the nobility and gentry (and even Royalty), who divide their time between the retirement of the country and the attractions of Milan and Turin. Approaching Arona, and at one mile distant from it, we come to the bronze statue of San Carlo Borromeo, a short distance off the road on the right; a few minutes walk suffices to arrive at its base which is situated on an eminence overlooking Arona and the lake. It is not advisable, as heretofore was necessary, to descend the lake to Sesto Calende, since the railway conducts hence to Milan direct.

The Lago Maggiore is formed by the river Ticino, and is from N. to S., about 40 miles in length, and 7 miles wide at the greatest breadth, is 2460 feet deep, and is at an elevation of 680 feet; its waters produce quantities of excellent fish. The navigation is less dangerous than either the Lake of Como, or Garda: the prevailing winds in winter are south and south-east. On its shores are quarries of marble and granite, mines of minerals, of iron, copper, and lead. The largest traffic on the lake consists of stones and slates for building purposes, timber and charcoal. The timber is floated by the Ticino into the lake and navigated to Milan and other parts of the country. The scenery met with in ascending the lake is very interesting. Immediately on the left is seen Mont Rosa, then the Simplon, the St. Gothard, Bernardino, and Splugen, besides the numerous minor Alps; the contrast between the pure white mantles of snow of the former and the sombre hues of the latter, is at once grand and imposing. Ascending, the scenery on the left, or northern side, is rugged, wild, and grand; on the right, or southern side it is remarkably fertile and undulating. The fine expanse of water is animated with numerous boats and large craft with bleached sails winging their course over the lake in all directions. Now is seen a steamer, now a market-boat with its cargo of fruit and flowers, the peasantry singing their national airs, while the *contadini* on the shore are heard to take up the air and sing in concert.

Proceeding from Arona up the lake, the names of all the towns are given as they come in succession. On the right, Angera, opposite Arona, there is an old castle built in the 14th century, belonging to the dukes of Milan—it contains some fresco paintings of that period. Railway from Arona to Sesto Calende. On the left, Lesa, beautiful scenery, rich in villas, among which are those of Villa Stampa, belonging to Alessandro Manzoni; on the left, Belgirate, a continual series of elegant villas, surrounded by luxuriant gardens; also on the left, Stresa, with church and convent of Rosminiani. Palace of H. R. H. the Duchess of Genoa, formerly the ancient palace of Bolongaria, where Rosminiani died, the palace of the Duke of Vallombrosa at Baveno, opposite the Borromean Islands, the steamer calls; here is an ancient church and baptistery, beautifully situated on the lake, and surrounded by gardens and villas; in its vicinity are those of Hudson and Cavour, granite quarries of some note, &c.; on the left, Feriola, junction of the Simplon road; on the right, Laveno, with fortifications and extensive barracks 15 miles distant from Varese, a beautiful drive, omnibuses twice daily, thence to Como, 17 miles. On the left, Pallanza, commanding the finest views of the lake; (The Grand Hotel, M. Seychab, proprietor,) perched in a beautiful position on its shores on the left, Canaro, romantically situated at the foot of a gorge; for the sweetness of its climate, for its vineyards, cedars, olives, and vegetation, it vies with the finest part of Lago di Como. The Isoletta, in the lake opposite, contains the ruins of an old castle of mediæval origin, called the Cannero, belonging to the bandit Mazzarda, who resided there. On the left, Intra, manufactories of cotton and silk thread, glass, &c., a fine palace, a handsome church and an elegant theatre; a beau-

tiful road hence to the head of the lake; a delightful drive to Pallanza about 2 miles. On the right Luino, the birth-place of Bernardino di Luino, the Raffaelle of Lombardy; here is the palace Crevelli. Omnibuses in connection with the steamers to Lugano in 3 hours, (19 miles); carriages with 2 horses, 12 frs., coachman 1 fr. 50 cents; on the right, Maccagno, on the left, Canobbio, containing two churches, in one of which, Pieta, there is an immense-sized altar-piece by Gaudenzio Ferrari; behind the town there is a deep gorge where the mountains, lofty and sombre, frown over the lake. On the right, Magadino, the principal emporium between Italy and Switzerland, whence there is an excellent road to Bellinzona and Locarno; on the left Brisago, containing an extensive manufactory of cigars; the wine here is noted for its excellence; the small islands of same name opposite abound in rabbits. On the left, Locarno, (Pop 2840), contains the ruins of a castle, the churches of St. Francisco and St. Antonia; in the latter there is a fine painting of the Temptation of St Anthony by Arelli. It was from this place that the Protestants were expelled in the 16th century—they settled at Zurich. The view from the tower of the church of the Madonna is magnificent. Having arrived at Magadino or Locarno, the tourist may choose either the Bernardino or St. Gothard Pass for his return route. On the other hand, by taking the diligence from Magadino he can proceed to Lugano, the capital of Canton Tessin, which is situated in the midst of enchanting scenery; from thence, proceeding up the Lago Lugano to Porlezza, (the Italian frontier and custom-house), thence by diligence or carriage to Menaggio, 2 hours, 9 miles, on the Lake of Como, or, on the other hand, proceed to Capo Lago, and thence by carriage to Varese and Como. The usual way is to leave the steamer on Lago Maggiore at Luino, and thence, in 3 hours. 19 miles, through a lovely country, on the banks of the Tresa, to Lugano; nothing can be more agreeable than this drive.

Lago di Orta.—This beautiful miniature lake is worthy of the tourist's notice. It may be approached by leaving the high road from Domo d'Ossola to Baveno at Gravellona, thence to Omegna and Orta, on the shores of the Lago di Orta, returning by same route. Distance in all, about 24 miles; time, 9 hours; cost, 14 frs. Lago di Orta is 13 miles in length by about ½ to 1 mile in breadth. It contains quantities of excellent fish and its shores are covered with every variety of fruit and vegetation, adorned with handsome casinos of the gentry, and pretty villages with houses white as snow. The drive around this enchanting scene is most agreeable. Immediately opposite to the little town of Orta, rises from the bosom of the lake, the little Isola de San Giulio, 370 yards in length by 200 yards in breadth, containing about 200 inhabitants. This fairy island was the habitation of San Giulio in the 4th century—during the epoch of the Longobards it was considered the principal place in the dukedom—and in which king Berengario took refuge; the tribune is adorned with strange figures. There is also a fine Mosaic of the 4th century, and in the crypt of the chapel reposes the relics of the saint. From Orta ascend the Sacred Mount, passing on the way 29 chapels each of which contain statues and paintings representing the different episodes in the life of San Francesco d'Assisi—at the summit the little church and convent of the order of the Franciscans. During the ascent the view of the lake with the surrounding scenery forms a variety of pictures unequalled for diversity of mountain, wood, and water. The magnificent snow clad Alps appear in the immediate neighbourhood although distant, and the chain of Monte Rosa stands out in bold relief. From Stresa, on Lago Maggiore, Orta may be visited by mule path over the **Motterone** in 6 hrs.; a guide is indispensible, 4 frs.; the views from the summit are very extensive and diversified in mountain, wood, and water scenery; the other carriage road is from Arona *viâ* Varallo, the starting-point for excursions in the Southern and Eastern Alps—24 miles, 7 hours, from Orta by boat to Omegna—6 miles, 1¼ hour; 2 rowers, 4 frs.; and 50 cents *buonamano*—thence to Gravellona, 4 miles, half an hour; Ferioli on Lago Maggiore, 2 miles, quarter of an hour. By omitting Varallo the drive from Arona direct across the hills to Orta may be accomplished in 3 hours—distance, 12 miles.

Laveno (Lago Maggiore) to Varese.—Laveno is situated at the foot of the Sasso del Ferro, 3287 feet. Omnibuses twice daily to Varese, 13 miles, 2¼ hours, 2 frs. 50 cents. The road to Varese lies through a highly cultivated but hilly country, abounding in silk, fruit, corn, and wine. The mulberry is everywhere met with; the cultivation of silk is much and profitably attended to here. Proceeding through the hamlets of Cisiglie, Germanio, and Gaverati, constantly ascending, to Comerio, 10 miles, 800 feet above the lake, the views are everywhere beautiful; on our right are seen the Lago Varese, Lago di Monate, Lago di Comabbio, and two minor lakes of no note. The lake is 20 miles in circumference, and about 2 miles in width; it is very well stocked with different kinds of excellent fish, and is distant about 2 miles from Varese.

Varese—Pop. 12,605, Hotels, Grand Hotel de Varese, Angelo and La Stella. The principal church is that of Vittore called the Pelegrini; notice the carving of the organ and the pulpit, by Castelli, among the paintings, those of St. Gregoria, by Del Cerano, and a Maddalena by Morassone. In the Battisteria there is a magnificent vase (the font) in marble, adorned with exquisite basso relievi. The Palace of Verata, with its fine gardens, may be seen on application. In the neighbourhood of the town and the lake are distributed many beautiful and chaste villas, among which the following are distinguished: Villa Taccioli, Litta, Ponte, Berra; these are generally surrounded by spacious lawns, sumptuous gardens adorned with numerous garden statuary, orange and citron groves, with here and there magnificent forest trees, the flat-topped pine distinguishable. The Madonna del Monte, five miles distant from Varese, is well worth visiting. It is a sanctuary, dating from A.D. 397, commemorative of St. Ambrose's

extermination of the Arians. There are fourteen chapels met with during the ascent, illustrative of gladness, sorrow, and fame; there is a carriage road past Rafarello village, 2½ miles, thence for 1½ mile ascend on ponies; the view is among the finest in these parts, and second only to that of St. Salvadore at Lugano. Carriage and 2 horses, 10 frs. Diligences several times daily. 1 fr. 50 cents. ponies, 1 fr. 50 cents. The ascent of the Madonna del Monte may be taken on the way between Capo di Lago, Lugano, and Como. There are several silk-thread factories in this part of the country, which are highly interesting and well worth an inspection. Strangers are admitted and politely received.

FROM LUINO (LAGO MAGGIORE) TO LUGANO.—LUINO, Hotels: Hotel Simplon, newly built, well furnished, fine garden, &c., moderate terms; Poste and Del Vapre. Leave the steamer here, and proceed by diligence 13 miles, 2½ hours, 3 frs., or carriage & 2 horses, carrying 4 persons, 12 frs. The Swiss frontier and custom-house are but a short distance beyond the town. Before arriving at the village of Sessa, passports are shown—no difficulty. The road follows the course of the river Tresa, constantly ascending and descending through a romantic and densely wooded country. The scenery about the town of Ponte Tresa, at the lower extremity of the Lago di Lugano, is singularly wild and diversified, adorned with mountain, forest, and flood, the scenery constantly changing; in our progress are the pretty villages of Agno and Muzzano. Ascending from Ponte Tresa, the road is lined on each side with gigantic walnut trees, and higher in the mountains quantities of chestnut trees adorn their slopes. Descending on Agno, from the summit of a chain of lofty hills, all at once the most romantic panorama develops into view, and reveals a picture rarely met with by the stranger, Lugano proudly perched on the margin of the still dark lake, Mont Salvadore immediately in the front, rising like an immense tumulus from the promontery, stretching into the lake, the whole surrounded by mountains of every variety of form and colour; those on the opposite side of the lake to Lugano, embracing Monte Caprini and Generosa, rising perpendicularly from the bosom of the lake, rocky in some places, in others wooded from their summits to the water's edge. The scenery in our descent and approach to Lugano is supremely beautiful, and certainly may be entitled to rank as a highly favoured spot, such as is rarely met with, and scarcely can be equalled. Having passed the river Agno, one of the tributaries of the lake we reach

Lugano (Hotels Du Parc and Washington), situated on the lake of the same name. Pop. 6,020, the capital of the Canton Ticino (Switz); its elevation above the sea is 900 feet. The town lies on the west side of the lake, between Monte Brè, on the east covered with villages, country seats, vineyards, citron and orange plantations, &c., and San Salvadore to the south-west. The finest view of the lake is seen from the tongue of land from San Marino and Castagnola. From these edifices we observe three convents and three monasteries.

Lugano contains but few churches; that of St. Lorenzo (the cathedral) as yet unfinished, that of Santa Maria Degli Angeli, situated next to the Hotel du Parc on the quay, and once belonging to the convent of same name, which was suppressed in 1853; the latter contains several frescoes by Luini—the Crucifixion and a Madonna are among the best. The palace of the governor, the ground floor of which is converted into a café; the hospital, the foundations of which date from the 13th century; the handsome theatre, the only one in the canton, was originally the residence of the Archbishop of Como; several palaces, and handsome mansions, with a Statue of William Tell, by Vincent Vela, on the quay opposite Hotel du Parc, constitute the lions of Lugano. The town contains manufactories of paper, silk-thread, leather, &c.

The territory of Lugano was given by Maximilian Sforza, Duke of Milan, in the 15th century, to the Swiss confederation, for the assistance rendered by them in expelling the French from the country

Excursions in the vicinity. The Park of Mr. Ciani on the borders of the lake. The ascent of Monte Salvatore (a spent volcano) the summit of which is 3050 feet, wooded the whole way. It occupies 2 hours to ascend; horse, 5 frs.; guide unnecessary. The view in front comprises the lake and the rich plains of Lombardy, as far as the cathedral of Milan. Turning round, the opposite view displays the line of Alps, extending from the Splugen to Monte Rosa, a magnificent view. Among excursions around Lugano, occupying from 15 to 40 minutes, the following will be found most agreeable—Monte Brè, Melide, Agno, Ponte Tresa, the Convent of Bigoria, and Monte Caprino.

Lago Lugano. This lake resembles that of Lucerne in shape; it is a reunion of gulfs, called by different names, commencing at Porlezza, in Lombardy; it runs from north-west to south-west, to Lugano, 3 hours, and from Lugano south to Melide, 1 hour, where it branches into two arms, one of which extends south to Capo Lago, 1½ hour, The other takes a south-west direction to Porto, 2 hours, from whence returning north-west, 1½ hour. It divides into two other branches, the principal of which in about one hour, stretches to the village of Agno, while the other about half an hour, descends to Ponte Tresa. The length of the lake may be taken at 14 miles (some say 18 miles), and the widest part about 3 miles, its depth 575 feet, its elevation 760 feet. It enjoys a delicious climate, an almost continual spring. Lago Lugano possesses other and striking characteristics in its diversified scenery, its several gulfs present a succession of varied pictures. The Lugano side of the lake is Swiss; part of the opposite shore is Italian. Steamers traverse the lake daily between Lugano, Porlezza, and Capo Lago, see page 335.

LUGANO TO LAKE OF COMO, *viâ* PORLEZZA AND MENAGGIO. to within two miles of the lake of Como, near Piano and its tiny lake, where, after passing Croce, we commence descending the richest country imaginable, commanding the most sublime views of the rich and classic lake of Como with its surrounding scenery, the whole appearing at our feet; the Alps, extending from the Spügen to the Ortler Spitz, beyond the Valtelline are seen distinctly, and, although distant, appear close at hand. We arrive at MENAGGIO (Hotel Corona; Grand Hotel Victoria, "comfortable, reasonable, and beautifully situated."—W.P.P.) from whence boats are hired for different parts of the lake, but more frequently to Bellaggio and Gennazzini; fares, two rowers, 5fr.; and *buonamano* Steamers ply three times a-day up and down the lake, calling at the different towns in its course from Como to Colico, and vice versa. Menaggio is convenient, as being the landing place for Porlezza and Lake Lugano.

LUGANO TO COMO, *viâ* CAPOLAGO AND MENDRISIO. The rail is open all the way. The high road to Como runs between the lake and the base of Mount Salvatore, whose porphyry rocks, overhung with extensive green woods of many hues, have a beautiful effect. After skirting the lake, and crossing it, among enchanting scenery, for nine miles, we come to Capo Lago, the drive is preferable to the steamer, hence to Lugano. Fares by steamer, first class, 90 cents.; time, about half an hour. From the lake we proceed through a lovely and fruitful country for two miles to **Mendrisio,** a *Stat.*, in Canton Ticino (switz.). pop. 2340. The ascent of *Monte Generoso*, 5500 ft. high, is made from here. About 1 hour from the top is HOTEL DU GENEROSO, kept by Dr. Posta; a good spot for consumptive and delicate persons. A fine panorama from the top. Near the town, one of those interesting sights may be visited—a silk-winding factory in operation. Strangers are admitted. Three miles further bring us to Chiasso, the Italian frontier; passports, and little delay at the custom-house. Four-and-a-half miles hence, through a highly cultivated and densely populated country bring us to Como; half an hour more, by a direct route leaving Como on the left brings us to Camerlata, on the Monza and Milan Railway.

Rail from Lugano to Chiasso, &c, see p. 241.

COMO.—Pop 24,350: Hotels Angelo, l'Italia and Monte di Brianza, near the harbour, Hotel Corona, without the gate of Milan, is the best. The population of Como is chiefly employed in the manufacture of stucco images, and other ornaments, and the winding of silk and cotton. The city possesses little of interest or attraction for the tourist, except its splendid and picturesque Cathedral. Town hall, and the fine statue of Volta in the market-place; the surrounding scenery makes ample return for the deficiency of the town. Its history is of a remote date; the ancient city was taken and burnt by the Milanese in 1127 and 1271. It then became incorporated with the Duchy of Milan in 1335. It is the birth place of several distinguished men; Pliny the younger, Paul Jove, the Popes, Clement XIII. and Innocent X. Volta, and Canova, were born here. The Cathedral is the handsomest and most interesting of the ten churches of Como; it is a splendid structure, commenced in 1396, and finished in the 15th century. The Baptismal Chapel is after the design of Bramante, and is an elaborate piece of workmanship.

Steam-boats ply three times a day from each end of the lake, from Como and from Colico, fares, 1st Class, 4 frs.; 2nd Class, 2 frs. 10 c. There is a steamer leaves Como for Lecco, and *vice versa*, in 3 hours, see page 333. Small boats are always ready; fares, 1 man, 1 fr. 50 c. to 2 frs. per hour; per day, 5 frs. each man. Bargain before starting, reserving the right to give *buonamano*. There is a char road on one side of the lake and a post road on the other. Railway to Milan, see p. 236.

The Lago di Como.—This lake is formed by the Adda and the Maira: it is 32 miles in length, and from two to three miles in width, is 1805 feet in depth, its elevation about 656 feet above the level of the sea. It resembles the letter Y in its form. At Bellaggio it divides into two branches the one towards Como, the other descends to Lecco, from whence the Adda pursues its course to the river Po. The deep waters of the lake are abundantly supplied with fish of various kinds, among which are distinguished trout, some of a considerable size; luccio, a sort of whiting, tenca (tench); carpio, and of more importance than all the others, in point of profit, the agoni, of which there is much caught and sold throughout the country. The Lago di Como is incontestibly the most beautiful and picturesque of all the lakes in Europe; in fact, no other can compare with it for the sweetness of its climate, the richness of its shores, the varieties of its panoramas, the magnificence of its villas and sumptuous gardens. On the borders of the lake are excellent roads, communicating from one village to the other. The enchanting scenery of the Lago di Como is described in glowing terms by travellers from every clime. In every language and in every age its scenery and local beauties have been extolled. It evidently has been, and ever will remain, the elysium of the tourist.

Ascending the Lake from Como to Colico, the various towns and places of interest will be taken as they are arrived at in succession. The letter *r.* right, and *l.* left, will indicate their position.

Ponte de Geno, once the Lazzaretto, now Villa Cornaggio, *l.* Borgovico, Villas Battaglia, Mandelli Raimondi, Brambella, *l.* Cernobbio, the Monastery Cluniacensi, Villa Calderara, Barogi; above the village rises the lofty Monte Bisbino, of which the natives say, when the clouds rest on its summit, it portends rain, hence the verse.

"Vanne prendre l'ombrella,
Che Bisbino ha il suo capella."

(Take your umbrella, for Bisbino has his hat on.) Here is also a Sanctuary of the Madonna. Villa d' Este, now Ciani, once belonging to the unfortunate Caroline, Princess of Wales; near to this is the excellent Hotel del Regina d' Inghilterra, beautifully situated and well patronised; Villa Pezzo, of the Count Muggiasco, afterwards became the property of the Archduke Rainerl, the gardens are very fine; Villa Curie, containing good

paintings; *l* Moltrasio, celebrated for its grottoes so highly esteemed for preserving wines; the Villa Passalaqua, of splendid design and architecture; Belvio, a delicious climate, numerous country seats. Here are the Villas Pasta, Taglioni, Schovaloff, Mylius, &c.; *r* Torno, at one period this town rivalled Como for its arms and its commerce; the church is of interest, one of its doors dates from the 14th century. Villa Pliniana, constructed by Count G. Agulssolo, one of the four who were sworn to take the life of the Duke of Farnese, which tragedy took place at Piacenza; at the extremity of a court there is a fountain of intermittent water, issuing from a rock mentioned by Pliny the younger. This villa is certainly one of the most interesting sights on the Lake. *l* Urecarate, a small village, whose inhabitants are engaged in boat building; villas Visconti and Battaglia. *l* Giuliano and Laglio; on the promontory of the latter stands the Villa Antongina, and the pyramidal monument to Giuseppe Franck. *l* Torriggio, a very picturesque and romantic situation, on the narrowest part of the lake. *r* The Molina, in the vicinity there is a mountain gorge, from whence issues a fine cascade, 60 feet in height; it is called "L'Orridio di Molina." *r* Nesso, with a fine waterfall. Brienno; the houses composing this village rise one above the other, and from the lake they have the appearance of huge steps, leading to the top of an eminence. *r* Argegno, a small mercantile place from whence there is a good road, eight miles to the Lake of Lugano. *r* Lezzeno, noted for the excellence of its figs; they remain on the trees all the winter, and ripen in May; this village is situated in a kind of alcove at the foot of a dark mountain, hence these lines,

"Lezzeno della mala fortuna,
D'Estate senza sol, d'Inverno senza luna"

"Unfortunate Lezzeno,
Without sun in summer, in winter without moon."

Colonna, with the fine cascade of Camoggia; it is supposed that this water comes by a subterraneous channel from the Lake of Lugano. *l* Sala, Villa Beccaria. *l* Isola Comacina, celebrated in the history of the Lombards, at which mediæval epoch it was well peopled, and fortified with high walls flanked with towers; at the present day the island is almost deserted, and nothing is met with beyond a few ruins of its former importance. *l* Campo Villa Balbianello, belonging to Cardinal Durini. *l* D'Osso de Lavedo, Villa Arconate; after passing the promontory, we enter the delicious scenery of Tremizzina. *l* Lermo, with its pretty church and Battisteria of the 9th century; it is also interesting for its archæological history; the following towns and hamlets occur in succession, *l* Portozzo, Mizzegra, Belvedro, Tremezzo, among which are the villas Busca, Cramer, Brentani, Giulini, &c. This is the finest point of view, and the loveliest part of all the lake, called "Tremezzina," in which are pretty good inns. In the vicinity, Villa Sommariva, or Carlotta, the most majestic of all others around the Lake of Como, it belonged originally to Count G. B. Sommariva, was built at a cost of £32,000, and sold for £20,000 in 1843, to Prince Albert of Prussia, and took the name of Carlotta, from having been occupied by his daughter. It is exquisitely situated in the midst of delicious gardens, supported with terraces overlooking the lake, and containing a precious collection of objects of the fine arts.

No one should neglect to visit this Palace; a fee of 1 fr. to the custodian suffices. Its paintings and statuary are renowned. Among the latter, "Mars departing for the War, delayed by Venus," by Aquisti. "The Triumphal Entry of Alexander the Great into Babylon," a stupendous basso relievo, by Thorwaldsen. The choice of all, perhaps, are the three following:—"Amore and Psyche," "Palamedes," and the "Magdalene," by Canova. "The Embrace of Romeo and Juliet," by Hayes; "Perseus and Andromeda," by Monger; "The Death of Attila," by Jorden; "Virgil reading his Sixth Book of Æneid to Augustus," by Wicard; a fine Landscape, by Breughel; "Cupid and Venus," by Serangli; "The Portrait of Laura," by Agricola; "The Sepulchre containing the Ashes of Themistocles," by Bassi; a "St. John," by G. Ferrari; "Vulcan tempering the Arrow of Cupid in the presence of Mars and Venus," a fresco transferred on to wood, by Bernardino Luini; "The Portrait of a Lady," by Leonardo da Vinci; an "Achilles," by Appiani. The Marble Sepulchre of Count John Sommariva, by Marchese. In the Chapel, which is embellished with statuary, there are two beautiful bassi relievi, one by Tenerani, on the tomb of Luigi Sommariva; the other by Marchese, represents Giovanni Sommariva counselling his son to cultivate the arts which had contributed so much happiness to his parent. *l* CADENABBIA (Hotel Belle Vue) and Majolica Villa Recordi (Albergo della Villa di Milano), towns on the shores of the lake. It is recommended to travellers who wish to take the scenery of the lake in detail, either to sleep at Bellaggio, or stop here for the night; it requires half a day to do justice to all that is to be seen in and about the Villa Carlotta; there is a Church of England service here on Sundays throughout the season. *r* BELLAGGIO, Hotels Gennazzini, Gran Bretagna, and Hotel Grandi. This village is beautifully situated in the angle which separates the lake into two branches. The villa Serbelloni to the east, is in one of the loveliest situations imaginable; it commands the different branches of the lake; the gardens are remarkably fine; fee, 1 fr. to custodian. Ascend to the highest point for the most extensive view. Observe the variety of flowers met with on the way.

VENNA, perched high and secure in the mountains above the village. During the mediæval epoch this was the retreat and refuge for the brigands. Villa Frizzoni, situated on the margin of the lake, Villa Trotti and Polde Pezzoli, and on a rise, Villa Melzi, erected by F. Melzi, vice-president of the Italian republic famous for the richness of its flowers; here is seen the portrait from life of Napoleon, by Andrea Appiani, in the chapel, a sepulchral canopy by Nissi, a statue of the Saviour by Comelli, and a *chiaroscuro* by Montecelle, the beautiful designs by Albertolli, and those of the figures by G. Bossi; this artist designed the arc

the door (*sopra porte*) which represents Leonardo da Vinci teaching his pupil Francesco Melzi the art of designing; in this composition is represented the actual likeness of Leonardo, who at his demise left his studio and its contents to his favourite pupil F. Melzi, who continued for some time the school of painting left him by his illustrious friend and master. There is a beautiful design representing Parnassus, attributed to Lavelli, in the garden, and also an exquisite group, Dante and Beatrice, by Comelli. The Villa Giulia, late the retreat of Leopold king of the Belgians; this palace has been extensively restored and embellished, and spring water has been conveyed from the mountains at a great outlay. *l*, Menaggio.—Hotel Corona—a lively commercial town; this is the landing-place for the road to Porlezza and Lake of Lugano. *r*, Fiumelatte this village derives its name from a rapid stream, whose waters have the singular property of becoming colder as the summer heat increases; this torrent issues from a cavern in the rocks, 1000 feet in height, and precipitates itself perpendicularly over the rocks into the lake below; for nearly a mile the vehemence with which this river pursues its rapid course covers it with foam of the colour of milk, hence the name Fiumelatte, (river of milk).

To the right, Varenna, a village in front of Menaggio, on the Splugen road; in the vicinity are long galleries; the scenery here is most charming. Situated on the heights above this village there is an excellent hotel and *pension* at the hydropathic establishment of Rigoledo, containing more than 200 rooms, admirably kept. Tourists may here recruit the fatigues of travel; the hotel is clean, and comfortable, and the charges are reasonable, 6 frs.

On the left, Rezzonico, with ruins of a castle of the 13th century, and the remarkable Sasso Rancio (orange rock), from which it is recorded that many of the Russians passing in 1799 were precipitated into a premature grave. *l*, Bellano, at the foot of Mont Grigna, 7415 feet, is the country residence of the Archbishop of Milan. A handsome church constructed by Azzone and Giovanni Visconti, manufactory of iron, wire, &c., the birth-place of Tommaso Grassi; the savage gorge formed by the river Pioverna, and the old castle, should be visited. *l*, Cremia; in the church is seen a painting by Paul Veronese, representing St. Michael and the Archangel. *l*, Musso, which still retains a portion of its ancient castle, of triple fortifications, constructed by General Trevalzi, afterwards occupied by Giovanni de Medici, who caused to be constructed secret chambers pierced in the rock for the purpose of coining money. *l*, Dongo, originally founded by a colony of Etruscans. *l*, Algiasco, celebrated for its mines of pure white marble. *l*, Gravedona (Hotel del Sasso), a remarkable town, teeming with richness in architecture and design, and objects worthy the inspection of the antiquarian and the man of taste. The church of Vincenzo, fine in architecture, and possessing some rare paintings, seen in the chapels of St. Girolamo, St. Rigio, and St. Orsola; the ceiling is elaborate, and of great antiquity; it is covered with exquisite ornamental enrichments; under the altar is seen the ancient oratory of St. Anthony, in the Lombard style, and containing a painting of the eighth century. In the vicinity, and immediately on the shores of the lake, is the Battistario of Santa Maria; the façade, constructed of grey and white marble blocks, in alternate layers, is embellished with numerous bassi-relievi; above the entrance rises the tower. In the interior is a gallery containing antique paintings, &c., and in the centre is placed the font; the churches of St. Gusmeo and Matteo possess some good paintings; a mile distant from the road is seen in the church of Peglio, "The Last Judgment," and "l'Inferno," St. Eusebio appearing to the Emperor Costanzo, several of the Saints, with Beata Virgina, magnificent works of art, principally by Fiammenghino. One hour from Gravedona we join, on the left, Livo; its church is embellished with frescoes of the quattro and cinquecento style. *r*, Pioria, with a church of the seventh century, now reconstructed, an ex-convent of Friars of the Order of St. Antonia del Tau, of date 1252; *l*, Domaso, in front of Colico, the seat of commerce with the Valtelline. *l*, Gera, a village situated at the mouth of the Adda, surrounded by malaria. *l*, Sorico once well-peopled, now almost abandoned, in consequence of malaria. *r*, Colico, once possessing a large population, which is now greatly diminished, its vicinity to the Lagoons rendering it unhealthy; in the neighbouring country there is nothing but vast plains and stagnant waters, which are called by the natives, the "Pian de Spagna;" near this are the ruins of the castle of Fuentes. Here is the station of the diligences to the Stelvio and the Splugen. For steamers, see page 533.

Lago di Lecco.—A branch of Lago di Como. Lecco, Pop., 6470, the most important town is Comascie; here is held every Saturday a much-frequented market, and a fair annually. Of the once extensive castle nothing remains but ruins. The bridge on the Adda, the Theatre, the Bovara, should be visited and the Casa Bovara contains some good paintings, and a collection of antiquities. Lecco possesses manufactories of iron, silk, cotton, and paper; it was in the environs of Lecco where Alessandro Manzoni passed his youthful days; here he conceived the scene of his "*Promessi Sposi*."

Lago d'Iseo.—An excursion can be made to this interesting Lake, by leaving the railway station of *Sarnico*, for steamer to *Iseo*, on the east side; and to Lovere, at the head of the Lake on the north side, past the island of St. Paul. N.B.—These small steamers are apt to be crowded with cattle and sheep. A carriage may be taken from Bergamo to Lovere, a fine drive.

This beautifully situated lake, formed by the river Oglio, is about 17 miles in length, and from 1 to 2 miles in breadth; its waters are limpid, and contain a variety of excellent fish. The country around is picturesque, the lake is encircled by hills sloping to its margin, which are highly cultivated and thickly populated. The vine, the fig, the mulberry, and every other tree common to Italy are found here. A handsome church, or tall campanile is seen emerging from among groups of the stately Italian pines. This magnificent picture terminates

with the lofty range of the Swiss and Tyrolese Alps clad in snow. There are excellent roads throughout the country, and a drive through the exquisite scenery on the shores of the lake will amply repay the traveller..

Lovere (Inns—Leone d'Oro, and S. Antonio) is a picturesque place on a hill-side, possessing a good harbour, two large churches, and the Tadini Palace, now an Academy of music and design; with an iron spring praised by Lady M. W. Montagu. The landlord of the Leone will drive you up the Val di Scalvi, along the torrent of the Dezzo to *Dezzo* and its smelting furnaces; then back by *Via Mala Bergamasca*, a wonderful piece of engineering work, with several tunnels and many cascades. Another drive is to the head of the Lake along its eastern shore, where the steep cliffs are pierced by a dozen tunnels for the road; past the island of Loretto and its mediæval, and St. Paul (Paolo) with its villas. To Brescia is a drive of 4 hrs. Fine walks to Pisogno, Clusone, etc.; and up the Val Camonica on the banks of the Oglio, to the pretty town of Brena, about 14 miles. The charges in the inns, and the hire of conveyances are much more moderate than on the line of railway. *Brena* has a Gothic church, and a castle, and in its vicinity there is a tunnel some 9,843 feet in length, leading into the Tyrol.

Lago di Garda.—The traveller wishing to visit this picturesque lake, should take it on his way from the Tyrol to Italy, in which case he will leave the railway at Roveredo, and proceed for 20 miles by diligence, over an excellent road to Riva, on the upper or north end of the lake. On the other hand, going from Italy to the Tyrol, he will leave the rail at Peschiera or Desenzano. Steamboats ascend and descend the lake between Peschiera and Riva, (Austrian Tyrolese frontier; passport somet mes not asked for; luggage examined on landing,) in 3¼ hours; fares, 1st class, 4 f. 53c. These steamers correspond with the diligences and railways at each end of the lake, see page 383. Some of the steamers from Desenzano only traverse part of the lake and return.

The Lago di Garda is formed by the river Sarca and several other small streams, among which are the Varrone, and the Torente Albola. It commences at Riva di Trienti, and terminates at Peschiera, situated on a small island at the lower or south end of the lake, from whence it forms the Mincio, which after forming the Lago di Mantua, debouches, and a few miles farther, unites with the river Po. The lake is situated between two chains of mountains; from south to north it is 34 miles in length, by about 4 to 10 in breadth, and its depth is about 985 feet. In the summer it rises from 4 to 5 feet during the melting of the snows, and heavy rains, in the Alps. Its ancient name was Benacus, the name of a city on its shores long since destroyed. This lake is frequently subject to storms and squalls from the mountains, which render its navigation dangerous in sailing boats, at certain seasons. In 1860, a fearful and sudden storm arose on the lake, which caused, in the space of three hours, the loss of 60 persons; hence Virgil's reason for saying "Fluctibus et fremitu assurgens Benace marino." In this lake are found abundance of various kinds of fish; sardelli, trout, carpione, (the latter held in high repute by ancient epicures,) and the sceppi. There are three small islands rising from the lake, that of *Trimo one* about the centre, is occupied by the Villa and English-looking gardens of Count Lecchi, well worth seeing, and rich in choice flowers, shrubs, and evergreens; the walks are shaded by delicious groves of orange and lemon trees. The proprietor is very liberal, and allows the public to land and visit the palace and grounds—a fee of 1 to 2 frs. to custodian. If any one is desirous of knowing what a mosquito is let him stop at Salo on the Lake.

Desenzano—Pop. 3450.—Hotel Vittoria; Albergo Reale.

One mile from the railway station, (conveyance to the trains), half-an-hour distant from Peschiera. The situation of this town at the bottom or south end of the lake, is very beautiful, surrounded by forests of orange, lemon, and all sorts of fruit trees. The apples, and particularly the pears of this locality are highly esteemed for the excellence of their quality, and delicious flavour. Projecting for some distance into the lake, and not far distant from the town, is a tongue of land called the promontory of Sermione. Here Catullus, the poet, seduced by the attractions of the lake, resolved to fix his abode. The ruins found there are called the "Grotto di Catullo."

In describing the scenery while ascending the lake, the words right, and left, will indicate the positions of the towns and villages on its shores. The mountains on the west are lofty and grand, their sides displaying valleys with deep ravines, producing bold, wild scenery, in the midst of luxuriant groves of lemon and forest trees, which descend to the shores of the lake. The opposite shore to the east is fertile and interesting, but far inferior to the western side, yet productive in wine, oil, corn, figs, &c.

Leaving Desenzano, we come to Peschiera, on the right, (Pop., 1700), forming part of the famous Quadrilateral, and containing a small harbour for the tiny fleet of gunboats and steamers belonging to Austria; this town is distant from Verona 15, and Mantua 20 miles. On the left Manerbio, which is said by antiquarians to occupy the site of the temple of Minerva, is surrounded with lemon and orange groves, and other fruit trees. On the right, Bardolino, with its small harbour and the handsome villa Gianfilipi; the town is constructed in the form of an amphitheatre. To the left Salo, population 3000, a bustling, commercial town of some trade; its situation is singularly beautiful, surrounded by one vast garden of rich landscape, teeming with every kind of fruit, and backed by lofty mountains, hanging as it were over the lake. On the left, Gardore and Maderno, containing a pretty Gothic church, and an extensive paper manufactory; it is thought that the latter town occupies the site of the ancient city of Benacus. On the right, Garda, from whence the lake derives its name; in its vicinity are the villas Albertini and Bozza, there is an old fort here also; the surrounding country is fertile in corn and wine.

To the left, Tremosine, with quarries of limestone. On the right, St. Vigilio, a point of land projecting into the lake covered with olives and fig-trees. On the left, Limone, one of the principal steamboat stations, deriving its name from the quantity of lemons grown in its vicinity and exported hence: it is a charming spot. On the right, Torre, containing an old castle, and in its vicinity extensive quarries and beautiful gardens. On the left, Panal; behind this village is seen the magnificent cascade of Ledro, which has a fall of 200 feet; the surrounding scenery is very beautiful. On the right, Maslsina; here is an old fort, attributed to the Venetians; this town is immediately under Mount Baldo, which appears comparatively bare as it hangs over the castle. We are now in the Tyrol, and shortly reach Riva, at the head of the Lake, Pop., 5000, Hotel, Il Sole. Giardino. This town is the principal port of the lake, and the steamboat station; it is a place of considerable importance from the trade carried on between Italy and the Tyrol; there are six fairs held here annually. Surrounded on three sides by lofty mountains, and by the shores of the beautiful lake on the other, its lovely position entitles it to be called the paradise of the South Alps. The Rocca castle on the lake was built by the Scaligeri family. There is a fine promenade in the colonnade on the little harbour. Diligences several times daily, corresponding with the steamers and railway trains. To Roveredo, 20 miles in 2¼ hours, fares, 3 and 4 frs.

It passes Tiefenkasten in a deep gorge at the entrance of the Oberhalbstein valley, (3½ h. from Chur). Stalla or Bivio is at the junction of Julier and Septimer Julier Col, 5990 ft. Another route is by Maloggia, or Maloya 11 h.; diligences every day. The Engadine takes name from the Inn which flows down it to the Tyrol, at the pass of Finstermunz after forming near its source the three lakes of Sils, Silvaplana, and St. Moritz, full

of trout. The people are mostly Romantsch and Protestants. The men go forth into the cities of Europe, where, as confectioners, they amass wealth, and, coming back, build substantial houses in these remote districts; a peculiarity of the Engadine. Florence.—Central station is near Santa Maria Novella. See p. 516. Florence is not healthy or agreeable in summer. It is in winter the pleasantest residence in Italy. The highest point of the Apennines within sight is Monte Morello.

Piazza della Signoria is the focus and centre of Florence life. Here the celebrated monk Savonarola was burnt, 1498. At hand are the Palazzo Vecchio, built 1298, and the seat of the ancient government of the Republic; the Loggia dei Lanzi; the Mint (Zecca); and the Portico degli Uffizi, with the Galleria de Uffizi, one of the richest art Galleries in the world. In fact, this Piazza is a perfect treasury of high art.

In the Palazzo Vecchio, or Della Signoria, are frescoes of Vasari, an unfinished statue of Victory by Michael Angelo; and in front of it the Hercules with Cacus, by Bandinelli. To the right of the Loggia dei Lanzi (which is decorated with sculpture), is the Rape of the Sabines (marble, 1583), by John of Bologna, with Perseus with Medusa's head in bronze, by Benvenuto Cellini, and Judith with the head of Holophernes, by Donatello. In the Portico degli Uffizii the niches inside and out are filled (1845-56) with marble *Statues* of eminent Tuscans, such as Giotto, L. da Vinci, Michael Angelo, Dante, Petrarca, Boccaccio, Amerigo Vespucci, the Florentine traveller, who has left his name to America, Macchiavelli, Guicciardini, Galileo, Benvenuto Cellini, Lorenzo dé Medici, &c.

ROUTE 8.

Florence to Rome, by Arezzo, Perugia, and Terni; or by Chiusi and Orvieto.

Florence to Rome by Empoli, Siena, Orvieto, and Orte, 195½ mi. The *Direct line to Rome*, runs *via* Arezzo and Cortona, to Terentola (as below); thence by branch, past Lake Thrasymene, to Chiusi, Orvieto, and Orte; all through interesting classical scenery.

Arezzo, 55½ ml. from Florence, (Hotels Victoria, Inghilterra, Croce d'Oro); with 10,587 inh.; is beautifully situated on an eminence, in a fine pure air. It is the ancient *Arretium*, and was one of the important cities of the Etruscan Republic. It is the birthplace of C. C. Mæcenas, the friend of Augustus, and protector of Horace and Virgil; also of Petrarch, Vasari, Aretino, Cesalpini the botanist, and others. Principal streets, Via Cavour and Corso Vittorio Emanuele. The church of Santa Maria della Pieve has a singular façade with very old sculptures, and is of the 9th century. The house in which Francesco *Petrarca* was born (July 20, 1304) is in Via dell' Orto. The cathedral is a fine church in the Italo-Gothic style. At the Museo Pubblico are—Saloon 1. Etruscan, Roman, and Christian inscriptions; funerary urns in red clay, called Vasa Arretina. Saloon 2. Majolica. Saloon 3. Fossils of the Chiana valley, including whale and elephant bones, &c. The Municipal Gallery contains about 50 pictures, and parts of frescoes.

Cortona.—Hotels; Europa; Casati, Nuinferior. A small town in the Chiana valley, which has been made very fertile by drainage. It is an ancient Umbrian city, conquered by the Etruscans. Natives—L. Signorelli (born 1439) and Pietro de Cortona (1596).

In the Palazzo Pretoni is a Museum of Etruscan antiquities, having a splendid lampadario of a circular form, with 16 jets, ornamented with satyrs, syrens, &c.; besides many interesting Etruscan bronzes and inscriptions. MSS. of Dante in the Biblioteca Ponbani. The Cathedral is a good basilica, having in the choir a Greek sarcophagus. Jesuits' church has 3 paintings of Fiesole; there is also a Madonna of Fiesole in the church of San Domenico. Fine view from the ruined fortress.

At **Terentola**, the next station, you may turn off for *Chiusi*, etc. past Castiglione del Lago and Panicale; the former station being close to *Lake Thrasymene*, the scene of Hannibal's great victory over C. Flaminius, A.D. 217. The whole country corresponds exactly to Livy's description (B. 22, 4) and to that of Polybius (3, 83). The shallow Lake is 20 miles round; has 3 islets, and is full of fish. A little beyond Terentola is

Perugia, near the Tiber, 47 m. from Arezzo. See p. 524. The Corso is a fine street, and the whole town has a venerable appearance; but it is especially interesting as the birthplace of Pietro Perugino the master of Raphael. Il Cambio, or the Exchange, has frescoes of Perugino. A little way beyond Perugia you reach the solemn city of

Assisi, 62 m. from Arezzo. See p. 511.

Proceeding, you reach **Foligno**, 72 ml. from Arezzo. Hotels.—Posta, Aquila d'Oro. 8,000 inh.; with a Cathedral; and in the Nunziatella, a painting of Perugino. Good frescoes by P. della Francesca, in St. Francis church. Passing **Spoleto**, with many Roman remains, temple, triumphal arch, &c, you come to **Terni**, 33 m. from Foligno, 70 m. from Rome. Hotels.—Posta; Europa. See p. 530. Distance to the *Fall*, or Caduta delle Marmore, 1¼ h; 1 horse carriage, 3 to 4 fr. Escort of beggars; charge 1 or 2 sous for a number of gateways. One of the finest views is obtained by passing through orange and citron groves of Villa Graziani to the rocks above the Velino. Thence, passing Narni and Civita Castellana, full of Roman remains, you reach Borghetto, in view of Mount Soracte; and then

ROME—162½ mls. from Naples. See p. 526.

Rome, the "urbe dell' orbe," is built on Seven Hills, the Palatine, Capitol, Quirinal, Celio, Aventine, Esquiline, Viminal. The Janiculum, Vaticano, and Pincio, were not included in the ancient city. Rome stands on both banks of the Tiber, united by five Bridges—San Angelo, Sisto, Quatro Capi, S. Bartolommeo, and Rotto; and has 12 Gates in the walls, which make a circuit of 12 to 14 miles. About 3 m. of the Tiber pass through the city. There are four or five great division —1. Lower Town, with the Corso and Pincian Hill, near Porta del Popolo, on the north, where the main thoroughfares meet 2. Upper Town, including the Quirinal, Viminal, and Esquiline Hills, and the railway station, with ancient Rome (5) beyond. 3. Pantheon and Ghetto, near the east bank. 4. Vatican, St.

Peter's, and Castel S. Angelo, in the Borgo, on the west bank. 5. Ancient Rome, to the south, including the Capitol, Forum, Stadium or Circus, and Palace of the Cæsars, on the Palatine, Celio and Aventine Hills. These are subdivided into 14 Regions. Antiquities, jewellery, photographs, &c., are sold in the shops in Via Condotti, the Corso, Piazza di Spagna, &c. Rome requires at least 8 days' hard driving, and 15 days steady work.

PAGAN MONUMENTS. Times of the Kings.—The *Cloaca Maxima*, supposed to have been established under Tarquinius Priscus, is evidence of the grand common sense of this practical people. Traces of the Wall of Romulus, and Porta Mugonia are seen near the columns of the Temple of Jupiter Stator. The *Mamertine Prison*, where Cicero had the accomplices of Catiline strangled.

2. Republican Period (B.C. 509—B.C. 30).—There are few remains of this period; consisting in traces of *Pompey's Theatre*, the *Tomb of the Scipios*, and perhaps the *Temple of Fortuna Virilis*.

3. Period of the Empire (B.C. 30—A.D. 417.)—It is a saying, that Augustus found Rome of stone, and left it of marble. In fact, most of the monuments of ancient Rome still extant are of his reign, or subsequent to it, including

THE FORUM.—Near the Capitol. Here are remains of the Via Sacra, the Capitolinus Clivus, the Temples of Castor and Pollux, the Temples of Saturn and Vespasian, the Arch of Septimius Severus, the Portico of the Dii Consentes, or Twelve Gods, the Tarpeian Rock and Mamertine Prison the Fora of the Emperors (Augustus, Nerva, Trajan, &c.) The present ground is twenty-six feet higher than the old level. The *Arch of Septimius Severus* was cleared by Pius VII. (1803); it is of the composite order. Three upright columns of the Corinthian order mark the *Temple of Vespasian*; close by are the eight columns of the *Temple of Saturn*. Three other handsome columns are remains of the *Temple of Castor and Pollux*. Other monuments of the Forum are three gigantic archways of the *Basilica of Constantine*, which is said to have poured molten gold into the Forum when burned at the great fire of Nero; the *Arch of Titus*, with bas-reliefs of his triumphs in Palestine; *Arch of Constantine*, with other bas-reliefs in decayed taste; ruins of *Temple of Venus and Rome*, &c.

THE COLOSSEUM is the impersonation of Rome—sublime, cruel, terrible, in its beauty; begun under Vespasian on his return from the Jewish war. Its inauguration was signalized by the slaughter of 10,000 captives and 5000 animals. It was the grand arena of Christian martyrdom. Built of travertine, it presents four orders of architecture, and has a circumference of 1823 feet and an elevation of 198 feet. Diameter, 640 feet at widest part. It could hold 100,000 spectators.

THE PANTHEON (Piazza della Rotonda), built by Agrippa to all the gods, is one of the most complete works left us of ancient Rome. The portico has sixteen blocks of solid monolith granite. The capitals are in white marble, and perfect in beauty. Diameter in the interior, 54 feet. It has been converted into a Church: the two low belfries were added by Bernini. Here are the tombs of Raphael, Annibale Carracci and Victor Emmanuel (1878.)

THERMÆ.—The largest, and best preserved, are the *Baths of Diocletian*, which have been transformed into the church of Santa Maria degli Angeli, by Michael Angelo; and the *Baths of Caracalla*, which used to have 1600 marble seats. Many of the finest statues remaining from antiquity were found in Caracalla's Thermæ, including the Toro Farnese, the Ercole Farnese, and the Callipyge Venus. Of AQUEDUCTS, many remain in and out of Rome, threading the Campania, and under the names of their Papal restorers, are still in use; as Acqua Felice, Paola, &c. The Acqua Acetosa and Acqua Santa are mineral springs.

Other vestiges of the grandeur of Rome from Vitruvius downwards, and even before are the *Arch of Janus Quadrifrons*, and the Palace of the Cæsars on Mount Palatine. The Palatine was the site of the oldest foundations at Rome and the abode of the Gracchi, Cicero, Marc Antony, and other noted Romans. The *Palace of the Cæsars* was celebrated for its splendour, and was even the residence of German Emperors in the middle ages. Napoleon III. caused extensive excavations to be carried on here, in the Farnese Gardens, which brought to light the torso of a Satyr attributed to Praxiteles, and other works of high art. These works are continued by the Italian Government. Here stood the house of Augustus (who was born on the Palatine), the house of Tiberius (also born here), the colonnade of Caligula, the house of Vespasian (Domus Flavia), and the Septizonium (Seven Stories) of Septimius Severus. The Golden House of Nero, built by him after the burning of Rome, stood near the Colosseum. The Mausoleum of Adrian or Hadrian, now the *Castel Sant Angelo*, is a grand pile still used as a Citadel, close to the Tiber Bridge (St. Angelo), and interesting, historically, as the place where Clement VII. was imprisoned at the time of the capture of Rome, by the troops of Charles V., commanded by the Constable de Bourbon (A.D., 1527).

The site of the *Circus Maximus* is still pointed out, showing its vast area, which, at the time of Constantine, could hold 400,000 spectators. The Arches of the *Theatre of Marcellus* at the Palazzo Orsini, are admired as masterpieces. The finest monumental COLUMNS are those of Trajan, and of Marcus Aurelius, the capitals of both being composed of vast blocks of marble. In the shaft of *Trajan's Column* are good bas-reliefs of his victories over the Dacians. The OBELISKS of Rome deserve attention, especially those on the Piazza del Popolo, of the Piazza Navona, of the Place of St. Peter's, and others. They are mostly of Egyptian origin.

MODERN MONUMENTS.—Foremost stands **St. Peter's**, unrivalled among churches, the great Basilica of Christendom. Begun under Julius II. (1506), on the site of an older church and of previous attempts; it was planned by Bramante, carried on by Raphael and Michael Angelo, and com-

plated 1626, under Urban VIII. Area 216,586 feet (St. Paul's in London, 111,171). St. Peter's has 390 windows, 748 columns, 47 altars, and 150 statues.

Curiosities:—The Confessional of St. Peter, where the body of this apostle and of St. Paul are said to be preserved. Fine statue of Pius VI. by Canova; 142 lamps always burning at this place. The Baldacchino of gilt bronze, by Bernini, above the high altar, is a wonderful work, supported by 4 composite columns, 29 yards high. Tribune and pulpit of St. Peter; the latter in gilt bronze is said to be of apostolic origin. Many monuments of Popes near it. There is a grand bas-relief of Attila on the altar of St. Leo the Great. In the Clementine chapel is a tomb of Pius VII. by Thorwaldsen; in that of the Presentation is George IV.'s monument of James III. (Stuart) and his sons, by Canova. The chapel of the Pietà has a fine marble group by Michael Angelo when 24 years' old. In the chapels of Saint Sebastian and of the Holy Sacrament are many tombs of other popes. In the north transept is a splendid tomb of Clement XIII., by Canova. The tomb of the late Pope Pius IX. is shown.

The mosaic paintings in St. Peter's are well worth a careful inspection. The *Treasury* in the Sacristy contains a number of reliques, including the dalmaticum worn by Charlemagne at his coronation, and miniatures of Giotto. In the subterranean church (Sagre Grotto, open 9 till 11, are a number of tombs of Popes, including the English pope, Nicholas Breakspeare, or Adrian IV., died 1159.—Best time to ascend the cupola, Thursday mornings, from 8 to 10. View over the Campania to Soracte the hills of Tivoli and Tusculum, Rome, and the sea.

CHURCHES.—The oldest and first metropolitan church at Rome, *St. John Lateran*, was founded by Constantine. The entrance is by 5 gateways; the interior has 5 naves. On a picture on a column to the right is a painting attributed to Giotto; the roof was planned by Michael Angelo; and in the treasury are many rare relics. At hand is the *Museo Gregoriana*, founded by Pope Gregory XVI., 1843, divided into Pagan and Christian churches, with many statues and remains recently found. The *Christian Museum* has been arranged by Cavaliere Rossi, and contains very old Christian sarcophagi, and other interesting objects from the Catacombs, illustrative of early Christian art with bas reliefs of scripture subjects and Christian inscriptions. The *Picture Gallery* contains early Christian paintings from different Catacombs, and illustrations of early art in Italy. The *Scala Santa* adjoining is reported to be formed of the staircase from the Palace of Pontius Pilate at Jerusalem.

The Basilica of *Santa Maria Maggiore* was founded A.D. 352. The spire is the highest in the city, and dates from 1376. The interior consists of 3 naves, with 44 ancient columns of the Ionic order; and has a grand sepulchral monument built beforehand for Pius IX., with some splendid chapels, especially those of Sixtus and Borghese. *Santa Croce in Gerusalemme* was founded by Helena, mother of Constantine, but was rebuilt 1743. *San Lorenzo fuori le mura* (outside the Wall) contains columns, arcades, and other remains of antiquity.

St. Paul's outside the Walls, founded by Constantine, was burnt 1823, and a new Basilica erected on its site was inaugurated 1847. The interior has 80 Corinthian columns of granite, and many relics of the earlier Basilica, including mosaics of the fifth century, 6 yellow alabaster columns presented to Gregory XVI. by the Viceroy of Egypt, medallion portraits of all the Popes, old frescoes restored, and modern stained glass windows. The general architecture of the church is not satisfactory, but the interior has an imposing effect.

Other old Basilicas are *St. Sebastian* and *St. Agnes*.

The number of secondary *Churches* in Rome is legion. We can only notice a few—1. The *Gesù* a very rich church, built 1568-75, and adorned by Popes and princes, contains the tomb of Cardinal Bellarmine, and the altar of St. Ignatius Loyola, with lapis lazuli pillars; and, under the altar a gilt bronze coffin containing bones of St. Ignatius, founder of the Jesuit order. The church of the Gesù presents a more splendid appearance during the 'Quarant' Ore," the two last days of the carnival. First rate preachers can be heard here during Advent and Lent Sundays at 11 a.m.

San Pietro in Vincoli contains the noted statue of Moses by Michael Angelo. *Trinita dei Monti* has a celebrated Descent from the Cross by Daniel di Volterra. *Santa Maria Sopra Minerva* possesses a statue of Christ by Michael Angelo, and the tomb of Fra Angelico, the heavenly painter.

Sant Augustino has a façade said to have been built with stones from the Colosseum (1483). The interior has 3 naves, the church being built in the shape of a Latin cross. The Madonna and Child by Jacopo Tutti, near the entrance, is surrounded with exvotos, especially daggers, presented by persons who have escaped assassination. The image of the Madonna on the high altar is attributed to St. Luke!

The interior of *S. Andrea della Valle* is handsome, but the chief interest centres in the paintings of the Evangelists and others, on the apse and ceiling, by Domenichino, representing St. John the Baptist, St. Andrew, and 6 allegorical figures. There are also fine frescoes of Calabrese.

St. Gregorio contains valuable paintings of Domenichino and Guido. The church of *Ara Coeli*, on the site of the Temple of Jupiter Capitolinus, has good frescoes of Pinturicchio. The church of the *Cappuccini* contains paintings of Guido and Domenichino. *Sant Onofrio*, on the Janiculum, is a convent where they show the cell in which Tasso died. *Sant Lorenzo in Lucina*, contains the tomb of Poussin; and *San Luigi de' Francesi* that of Claude. *San Silvestro* and *S. Carlo di Catinari* have many paintings of Domenichino.

The Vatican is the largest palace in the world, with portions contributed by Bramante, Raphael, Bernini, Fontana, &c. It consists of 3 stories, and has 20 courts, 8 great staircases, and 200 escaliers de service. It has only been the

residence of the Popes since their return from Avignon. The latest additions are the Museo Pio-Clementino, by Clement XIV and Pius VI., the Braccio Nuovo, by Pius VII., and the Etruscan and Egyptian Museum, added by Gregory XVI.

The chief points of the Vatican are: 1.—The *Loggie* of Raphael. These world-renowned galleries had this great Artist for their architect, sculptor, and painter. The gallery of the second story is that particularly associated with Raphael, who painted its walls with scenes from the Old and New Testament (1516-18.) The *Stanze* of Raphael are four in number, containing various specimens of high art of his school, including Perugino; Raphael's beautiful painting of the School of Athens; Heliodorus driven from the temple; St. Leo stopping Attila; the Miracle of Bethsaida; the Deliverance of Leo X. when prisoner at Ravenna, showing a wonderful contrast of lights &c.

The Vatican Picture Gallery has many masterpieces, especially The *Transfiguration* and the *Madonna di Foligno*, by Raphael; others sketched by him and finished by his pupils; the *St. Jerome* (chef d'œuvre of Domenichino); pieces by Guido, Guercino, Perugino, Paolo Veronese, Murillo, &c.

The tapestries of Raphael line a gallery above the garden.

The *Vatican Museum* is divided into several departments. The most interesting are Museo Chiaramonti, and the Museo Pio Clementino. The first has 700 marble *Sculptures*, including a number of characters from Greek mythology. The second has the *Apollo Belvedere* and the *Laocoon*, two of the finest statues in the world.

The *Egyptian Museum* and the *Gregorian Etruscan Museum* deserve inspection; especially the latter (in 12 rooms), and among them Saloon IX., with all sorts of curiosities, illustrating early Italian art, and Etruscan civilization. The chains, rings in gold, prove that this people worked the metals with great skill. The *Library* is noted for valuable archives and MSS., (40,000 of the latter, 17,400 Latin, 3450 Greek, 2000 Oriental). Printed books, 150,000. The noted works are a New Testament, 5th cent.; Virgil, 5th cent.; Terence, 4th cent.; a palimpsest of the Republic of Cicero; valuable orthographs, &c.

The *Museum of Christian Antiquities* contains many remains from the Catacombs, the Papyrus chamber, specimens from the 4th to 8th century.

The Studio Mosaico, or factory for mosaics, should also be visited; and the *Sistine Chapel*, noted for the grand chant of the *Miserere* on Good Friday, and for the *Sybils* and *Last Judgment*, and other frescoes, by Michael Angelo.

THE QUIRINAL PALACE, built 1574, is now the Palace of the King of Italy.

INSTITUTIONS.—THE CAPITOL has a Museum begun by Clement XII.; in front of which is an equestrian bronze statue of *Marcus Aurelius*, the only one that has reached us from antiquity. That part of the Capitol called the *Palace of the Conservatori*, as rebuilt by M. Angelo, has the Pinacoteca and Museum, rich in the *Dying Gladiator*, immortalised by Byron. The *Academy of Saint Luca* (especially for paintings—open 9 to 3, has some good pictures of Titian, Raphael, Guido, Rubens, and Vandyck. Among the learned bodies is the Sapienza or Roman *University*; the *Collegio Romano*, containing a celebrated Observatory, conducted by the late Father Secchi, and the Kircher Museum, with its Pagan and Christian Antiquities; and the *Propaganda*.

ROMAN PALACES AND VILLAS, see p. 229. The Palaces of the nobility are town houses; the Villas are their country seats. Thus there is a Borghese Palace in Rome, and a Borghese Villa outside the walls, both used by the family according to the season. For visiting days see p. 528-9. The Villas are adorned with statuary, casts, and busts; the Palaces, generally with Paintings. The principal objects of notice in the Palaces are as follows:

Palazzo Barberini.—Portrait of B. Cenci, by Guido. Raphael's Fornarina.

P. Borghese Palace.—Pictures in 11 rooms. Titian's Earthly and Heavenly Love.

P. Corsini.—Portraits.

P. Doria.—Portraits in the Mirror Gallery.

P. Regio [King's Palace, or the Quirinal].—Pictures by Guido.

P. Sciarra.—Paintings by C. Lorraine, Perugino, Raphael, Da Vinci.

P. Spada.—Paintings by Guercino and Guido. Pompey's Statue.

The CATACOMBS.—The interest attaching to these early relics of the Age of Martyr has greatly increased of late, owing to the learned and able researches of Cavaliere Rossi. One view is that these subterranean passages were excavated expressly for the tufa stone in building ancient Rome and afterwards used by the early Christians, for shelter and sepulture; another and later view is that they were made by the Christians expressly for interment. They are of different ages, extending from the 2nd to the 5th cent., and are 26 in number; one of the oldest being that of *St. Priscilla*, 2 miles from Porta Salara, including a Madonna and child, probably of the 2nd cent. The *Catacombs of St. Agnes*, outside the Porta Pia, contain several valuable mural paintings, and in a chapel, an image of the Madonna, supposed to be of the second half of the 3rd cent.

The *Catacombs of St. Sebastian* were those first discovered, and are most easily visited. The *Catacombs of Saint Nereus* and *Achilles*, or of Domitilla, on the Ardeatine Via, are perhaps the oldest; but those of the *Calixtus*, Via Appia, are the richest, having tombs of several Popes (including Saint Sixtus II., died, A.D. 252), inscriptions, paintings in byzantine style, &c. Nothing can be more solemn and touching, than the sight of these early Christian sepulchres.

Naples, the City of the Sirens, the *Parthenope* of classic times, and verily "un Pezzo del Cielo caduto in Terra"—a bit of heaven let down to earth. See p. 521.

The Strada di Toledo was built by the Spanish Viceroy Don Pedro 1532-33, and the Strada Chiaja in 1695 by the Duke de Medina Celi. The Strada di Toledo is 1¼ mi. long; and the town has a length of 3 and, including the suburbs, a circumference of 16 mi. The favourite walk is the Villa Reale by the Chiaia. Principal squares: Largo del Castello, Largo del Palazzo, by the King's Palace, adorned with statues of Charles III. and Ferdinand I. The Largo del Mercato is the spot where Masaniello's conspiracy broke out. Naples has 258 churches, and is divided into 12 quarters. The Harbour has a mole and pharos (142 slips, 1 f. to see it) with a very fine view of the town, Vesuvius, the bay, and the splendid neighbourhood.

CHURCHES.—One of these is Santa Restituta an old Basilica of the Greek rite, attributed to Constantine, and possessing the chapel of *Saint Januarius*, richly adorned with paintings of Spagnoletto and Domenichino. The pretended liquefaction of the Saint's blood takes place in this chapel every year, first Saturday in May, September 19th, and December 16th.

*** For detailed description of the churches of Naples, *see Bradshaw's Handbook to Italy*.

Paysage with the Nymph Egeria; Albert Dürer, The Nativity; Agostino Carracci's Rinaldo in the Garden of Armida, &c.

The Biblioteca Nazionale, is open from 8 to 2 p.m.; 250,000 vols. and 3000 MSS.

Naples has a University (1224), with 52 professors, and a noted collection of Mineralogy. The Palazzo Reale, built 1600, has some good paintings, by Raphael, Holbein and Rembrandt. The Royal Palace contains a library and a collection of natural philosophy. At hand is the celebrated Theatre of San Carlo, the largest in Europe, built 1737 (rebuilt 1816). The two great Castles at Naples are the Castel dell' Ovo, on an island, noticed by Pliny (Hist. Nat. III., 6), called Megaris: present structure, built 1154, by William I. The Castel Saint Elmo above the town (built 1343), commands a superb view, and is used as a prison.

Naples has many private Palaces, including the Fondi and Miranda, with good collections of paintings and the Saint Angelo (13th cent.), with splendid works of art; Italo-Greek vases and paintings, of best masters. The Albergo di Poveri is one of the most princely hospitals in Europe. Near that of San Gennaro de' Poveri, are the vast *Catacombs*, extending many miles; not presenting a painful spectacle in these; are still used for burial, called Campo Santo. The Palace of Capo di Monte has a good picture gallery, and a fine garden; near it is the Observatory. At the end of the Chiaja near the grotto of Posilippo, leading to Baiæ, is the supposed *Tomb of Virgil* (15 square feet, with 3 windows), having a glorious view, and an inscription, partly made up of the epitaph ascribed to himself, viz.:—

"Mantua me genuit; Calabri rapuere; tenet nunc Parthenope: cecini pascua, rura, duces."

"I was born at Mantua, snatched away in Calabria (at Brundusium), and Naples holds my dust. I sang of flocks, fields, and heroes."

EXCURSIONS.—The neighbourhood of Naples comprises Baiæ and its hot springs, Pompeii, and Cumæ; Vesuvius and Avernus, ("Facilis descensus Averni") with the Monte Nuovo; Sorrento and Puteoli where St. Paul landed in 60ds. Ovid's description takes in all the remarkable points — Capri, Sorrento, Herculaneum, Castellammare (Stabiæ), Naples (Parthenope), and Cumæ.

Unde legit Capreas, promontoriumque Minervæ Et Surrentino generosos palmite colles,
Herculeamque urbem, Stabiasque, et in otia natam
Parthenopen, et ab hac Cumæ templa Sibyllæ."—*Met.* xv.

The round of interesting objects on this excursion costs 5 fr. for a fiacre with 1 horse.

To reach Pozzuoli you pass the Grotto of Posilippo, a tunnel of half a mile, cut through a tufa rock in ancient times, and noticed by Seneca in the reign of Nero.—**Pozzuoli**, *(Puteoli)* half an hour's drive (two hours on foot) from: Bella Italia, Del Ponte di Caligola. Objects to see: the Temple of Serapis, the Amphitheatre, the Solfatara, and the Lake of Agnano. The Cathedral of St. Proculus is built on the foundations of the Temple of Augustus, erected by L. Calpurnius. The *Amphitheatre* is noted in profane and sacred history under Nero and Diocletian. St. Januarius was decapitated at the Capuchin convent (commanding a splendid view of the gulf) in 305. The *Solfatara* is 15 minutes from the Amphitheatre, and consists in the crater of a half extinct volcano, from which issue many jets of smoke, while the neighbouring rivulets are charged with alum. Half an hour thence is the Lake of Agnano, having on its banks the celebrated *Grotto del Cane*. The cause of the fit that overtakes the unfortunate dogs who are thrust into the cave is well known to be a great quantity of carbonic acid gas rising to a certain height.

Passing the ruins of the villa of Cicero you reach in half an hour from Puteoli, *Monte Nuovo*, raised by volcanic action in 1538. Boat from Pozzuoli to Baiæ, 1 fr. (3 to 4 persons); time, 30 to 40 min.; 1 horse carriage from Pozzuoli to Cumæ and Baiæ, 5 to 6 fr. The road continues past Lake Lucrino, renowned in ancient times for oysters, and very near *Lake Avernus*, the supposed descent into Hades, having on its south side a tunnel called Sibyl's Grotto, and containing evidences of ancient workmanship. It is necessary to bargain about entrance fee; 1 fr. to enter, and 1 fr. for torches. Road continues past the Baths of Nero, anciently known by the name of Thermæ Neronianæ, with natural hot springs that boil eggs (1 fr).

At **Baiæ**, the principal objects are what are popularly called the Temples of Minerva, Diana, and Venus, though evidently structures meant for secular purposes. Other objects at hand are the Piscina Mirabilis, a large reservoir, and *Cape Miseuum*, with a glorious view. The district beyond, in the direction of Cumæ, containing the Mare Morto and Lake Fusaro, acquired the name of Elysian Fields, from antiquaries, who wanted to assign a place for all Virgil's descriptions

Cumæ the seat of the great Oracle, consulted by Æneas before he descended to the shades at Avernus to see his father's spirit, has few remains to show, chiefly an amphitheatre and many tombs, besides a Grotto, thought to correspond with considerable exactness to the description of the Sibyl's abode in Virgil.—*Æneid.* vi. 41.

Procida and Ischia.—These charming islands are situated on the same side of Naples as Baiæ. To explore them properly takes 2 days. In June a daily steamer to the hot Baths of Cassamicciola in Ischia.

Ischia.—See p. 550. Its principal point, Mount Epomeo, was noted for eruptions before B.C. 474. The ascent is the most interesting excursion; (5 to 6 hrs., 3 to 4 fr., with an ass. Chestnut woods, and the hermitage of St Nicholas on the top (bread and wine supplied), commanding a perfectly admirable view, embracing Naples, its bay, Gaeta, Salerno, Capri, Vesuvius, &c.

Vesuvius.—See p. 522. It destroyed Herculaneum and Pompeii, A.D. 79, when Pliny the Elder perished in its flames; and it has been the theatre of about 50 eruptions since 1660.

Herculaneum, under the present town of Resina (p. 525), has not very many remains, and is eclipsed by Pompeii. They are at an average depth of 100 ft. under the ground, and were first discovered in 1719. In 1837, there were brought to view the House of Argus and several parts of the ancient city, including a triclinium with a painting of Mercury, Argus, and Io. The theatre contained 8,000 spectators. Taking the rail to Pompeii and passing Torre del Greco and Torre dell' Annunziata, the traveller reaches

Pompeii in 50 minutes (see p. 525). A day devoted to this interesting city, gives a more perfect insight into the manners of the ancient civilized world than we could otherwise obtain. Burnt wood, melted glass, and other evidences of the hailstorm of ashes, testify to the terrible nature of the eruption which overwhelmed it. It appears that after the town was buried under a bed of stones and ashes, a number of torrents swept the light fragile objects clear of the houses before their fall, and thus preserved them. Many of the inhabitants had time to fly; and returning afterwards, dug and recovered some of their valuables, and founded a new Pompeii, near the first one which was buried in an eruption A.D. 472. Researches daily bring to light bronzes, statues, skeletons, and other curiosities. Gate of Herculaneum, with 3 arcades (lava and brick), near the Houses of Sallust (one of the finest at Pompeii) and of the Vestals. The bakery and public oven are close by. The quarter of the Forum contains 3 triumphal arches in brick and lava, the temple of Venus (the largest at Pompeii), the basilica, the law courts, the civil forum, surrounded with porticoes, &c. In the street of the Thermæ is one of the handsomest houses, that of Pansa.

Castellammare is close to Pompeii, in a charming sheltered position on the Bay (see p. 514). A fine carriage road leads hence to Sorrento.

The trip to Pompeii may be extended to Salerno, Pæstum, and Amalfi. Rail from Naples to Salerno 34¼ miles. Train passes *La Cava* (Hotels Victoria and Londra), in a romantic country, near the convent of La Trinità.

Salerno, on the bay of that name, (Hotels: Nuova, Vittoria, Inghilterra), had one of the earliest and most noted law schools in Europe. Justinian's Pandects said to have been discovered there. Situation unhealthy.

At hand is **Amalfi**, in a delightful situation on the gulf: it may be reached by carriage road from Vietri, near La Cava, or from Salerno by boat, see page 511. Many noted maccaroni factories. Enchanting walk over the mountains to Sorrento.

Eboli, beyond Salerno, 49½ mls. from Naples, can be reached by rail. Pæstum is 15 mi. from Eboli and can be reached by carriage. March and October are the proper seasons to visit the temples but beware of malaria, not to speak of brigands.

Pæstum was a colony of Magna Græcia, and its ruins (first noticed, 1745,) consist of three Doric temples, 2000 years old. The *Temple of Neptune* is one of the finest examples of Greek Doric, 225 by 95 feet, having 6 columns on each face, and 14 at the sides. The columns are 7½ ft. in diameter, and 16½ feet in height, giving them a more massive look than those of the Parthenon, at Athens. The other temples are that of *Ceres*, and the structure incorrectly called the *Basilica*.

Sorrento is in a plain, covered with orange orchards gently sloping from the cliffs that border the bay, to the hills that form the watershed between the bay of Naples and that of Salerno. The whole country is full of delightful walks; see page 530. Sorrento is the birthplace of Tasso, and was known in Roman times. A temple of Neptune stands close to the waves, in an enchanting position, on the road to Massa.

From Sorrento a boat takes you easily to Capri (time, 2 hours; fare. 6 to 8 fr.), which should be visited for the beauty of its views, and for its marine grottoes; see page 550.

Naples to *Palermo* by Florio's steamers, daily, 193 m. See page 535.

In the Road the early table d'hôte is generally 4*fr.*, but if no table d'hôte, order a "déjeûner à la fourchette" for 2 *fr.* 50 *c.*, including vin ordinaire. It will consist of soup, vegetables, a mutton chop, a slice of roast meat, and sweets. In towns the "petit dîner" will cost 3 *fr.*; breakfast or tea generally 1*fr.* 50*c.* Cutlet with fried potatoes 1 *fr.*; fine, à la carte.

[Twelve days at 6 francs, with extras and sundries, and cost of return tickets (nearly £7) bring up the total cost to the sum mentioned above.]

SPECIAL DIRECTIONS.

Take very little luggage—25 kilogrs. (60 lbs) are allowed, but much less will do. The best kit for the tour will be two loose coats, one warm, the other light; one to go over the other, if needed; one pair of light tweed trousers on; one warmer ditto in a black bag; two vests; one pair of strong shoes on: one pair light ditto in the bag; four shirts—if flannel, three will do; four pairs of socks; six collars; six pocket-handkerchiefs; brushes, razors, &c. A good knapsack will be better than a bag; either can be carried in the hand from Rail to Steamer, from Steamer to Hotel, &c.

The Return Ticket, for Switzerland ought to be taken at the Station of the "Chemin de Fer de l'Est," in Paris; ask for the "Billet pour le Voyage Circulaire en Suisse, Seconde Classe;" it is available for a month. Take a good stout umbrella, which will answer for a walking-stick. A carpet, or black leather bag, may safely be left in the cloak-room, called "Consigne," while the tourist is absent seeing sights. Pay 10 centimes, and ask for a ticket for the bag.

ROUTE 11.

A Route through Switzerland.

We may premise that the *route* given underneath, applies to travellers entering Switzerland from Freiburg-in-Breisgau (in Baden), at Schaffhausen, and leaving it at Bâle. For further information, see *Bradshaw's Handbook to Switzerland.*

1. FREIBURG-IN-BREISGAU TO SCHAFFHAUSEN, BY THE HÖLLENTHAL.—Distance about 50, or perhaps 52, English miles, by diligence, performing the journey direct in about twelve hours. The *route* is through the charming valley of the **Hollenthal**, or Infernal Valley, which presents the appearance, at its opening, of a fertile plain, enclosed by sylvan hills. Nearing the ascent, at about 42 miles from Schaffhausen, it assumes a character of romantic grandeur. Its woods, rich in foliage, cover the steep sides of the ravine, from which project sharpened fragments of rock, rugged and naked, having running at their base the Dreisam, whose banks are verdant with turf, and studded with mills.

STRIG and HIRSCHSPRUNG are the spots most remarkable for the exhibition of this rugged grandeur. On the journey we pass **Burg**, remarkable from Moreau's retreat, in 1796. Ninety-four years previous to this Marshal Villars was deterred from attempting this pass, saying that he was not dare-devil enough. The first village is STRIG, a post station, where the traveller may obtain good accommodation, on reasonable terms. Here a steep slope of the road leads the tourist up the Höllensteig; and on leaving it, he parts with the finest scenery. At this juncture an extra horse is required for the ascent of the Höllensteig, for which 3 marks must be paid. Opening in the distance is Himmelreich. Passing Lenzkirch, and Bondorf, (nineteen miles from which is the Benedictine

Abbey of *St. Blaize*,) we arrive at the top of the ascent, whence may be had a magnificent view of the Lake of Constance. Close by is the Castle of Hohenlupfen; and a little further on, after passing Stuhlingen, we cross a stream, and, journeying on a distance of 11¼ miles, we enter

SCHAFFHAUSEN.—For a description of the Falls, see page 504.

2. SCHAFFHAUSEN TO ZURICH, BY EGLISAU.—Distance, 18 mls.; mode of conveyance, by rail; which crosses the Rhine just above the Fall. After traversing a small portion of the Baden territory, we arrive at

EGLISAU.—Situated on the Rhine, about 13 miles from Schaffhausen, and containing about 1700 inhabitants. The scenery of the passage of the Rhine at this place is very romantic. The water flows between hills covered with trees, and is crossed by an embowered wooden bridge. We next meet, at a distance of about four miles, BULACH, a town of 1,500 inhabitants, having some good inns. From here a magnificent view of the Alps, with their tops crowned by eternal snows, may be had. The descent to Zurich is very picturesque and romantic passing about two miles to the right is the hill of Weid, whence a rich view of the town and its lake may be enjoyed. After this, nothing worth special notice presents itself until our arrival at

ZURICH

3. ZURICH TO LUCERNE, ACROSS THE ALBIS, *via* HAUSEN.—Distance, 33 English miles.—The journey is made by diligence, occupying about 7 hours in the transit (also by rail, see page 243). A very fair zigzag carriage-road leads to Zug, and crosses the High Albis. All along the route a very beautiful view of the Alpine chain, can be enjoyed. After skirting the Lake for a short distance, it crosses the Sihl, and wends to the inn of the *Albis*, where the tourist can be well accommodated. Above the inn, about one mile, is a height commanding an excellent view of the entire Zürichsee. Situated at the foot is the picturesque vale of Sihl, remarkable as having been the favourite sanctum of the pastoral poet Gessner. On the south is seen the Lake of Turi; not far from which is the Church of *Kappel*, where Zwingli died. Farther off is the Lake of Zug, behind which rise aloft in sublime grandeur Mounts Pilatus and Rigi, the former on the right, the latter on the left. At this point the horizon, reflecting the snowy chain of the Alps from Sentis to the Jungfrau, presents a remarkably brilliant appearance. Attaining the summit, 2,500 feet above the sea and 1,000 feet above the lake, we descend, touching on the right the small Lake of Turi. After traversing the new road along the western slope of the Albis, we arrive at HAUSEN. Near this place is Albisbrunn—a Water-cure establishment—where general travellers can board and lodge for 6 or 7fr. a day. From here the Bernese Alps can be seen to advantage.

HAUSEN.—A village of 6,000 inhabitants, the scene of a religious conflict, in which Zwingli fell on the battle-field, 1531. A monument is now erected on the spot, bearing a Latin and German inscription. We next arrive at
